3.7-Liter VTEC® V-6 Engine

Dual-Stage Intake Manifold

Variable Flow Exhaust

LARGE ENGINES generate plenty of power, but add extra weight for the vehicle to overcome. That's why Acura engineers gave the MDX a V-6 capable of producing power well beyond what is expected for its size. To accomplish this feat, the engine incorporates two specialized breathing systems.

A dual-stage intake manifold utilizes a precisely tuned sonic wave to pack the maximum amount of air into the combustion chambers. The variable flow exhaust also plays a part, with valves that stay closed at low RPMs to provide proper back pressure. When pressure is built up, they open wide to provide a rush of power.

EXHILARATION. Brought to you by precise control.

THE PERFECT ACCOMPANIMENT to thrilling performance is an underlying sense of confidence. In the MDX, it starts with the Acura signature Super Handling All-Wheel Drive system. Sensing where extra torque is needed, it distributes power between the front and rear wheels accordingly. Through turns, the system can even send up to 100% of available rear power to the outside wheel and increase its rotation speed for more responsive cornering. The available Active Damper System can respond to driving conditions and adjust suspension compliance in as little as 5 milliseconds.

PLY
THE ART OF SELF-PRESERVATION.

Built to evade. Built to withstand.

ANTICIPATING WHAT'S AROUND THE CORNER is as much the province of our engineers as any other. With the well-being of passengers in mind, they've incorporated safety into almost every aspect of the MDX's design.

The chassis features the Advanced Compatibility Engineering ™ (ACE) body structure, distributing frontal crash energy more evenly throughout the front of the vehicle. Vehicle Stability Assist (VSA®) can detect under- or oversteer and take measures to help keep you on your intended path.* Brake Assist can detect emergency braking and apply maximum pressure to help stop the vehicle more quickly.

*VSA is not a substitute for safe driving. Control of the vehicle always remains with the driver.
