When Precision Crafted Performance is at the heart of everything you do, you don’t just build an SUV, you build the car you want to drive. You break the rules and check all the boxes. And you do it because you can.

The MDX does more than just embody what Precision Crafted Performance is all about—it defines it.
The Acura logo was designed to depict an engineering caliper and since its inception has served as a symbol and a constant reminder of our unwavering commitment to precision and craft. The caliper is our true north and a promise of the painstaking attention to detail that goes into every Acura.

The MDX is the manifestation of that commitment.
As athletic as it is spacious, the multifaceted MDX was designed to give you the best of all worlds. While the new MDX delivers maximum comfort for up to seven passengers, it was crucial that we didn’t forget where we came from. True to our roots and Precision Crafted Performance promise, the MDX is our most aggressively styled SUV to date, with performance to match.
The MDX was designed with the single-minded goal of putting the driver and passengers first, and not only did we hit our impossibly high standards, we exceeded them. With available features such as handcrafted and responsibly sourced Olive Ash Burl and Black Limba natural woods, premium contrast stitching and piping details, and your choice of seven-passenger seating or a six-passenger configuration with body-contouring second row captain’s chairs, wherever you’re seated, you’ll feel like the MDX was built with you in mind.

**INTERIOR DESIGN**

Natural Olive Ash Burl wood with metal trim. MDX with Advance Package shown with Ebony interior.

JEWEL EYE LED HEADLIGHTS

**PUT PERFORMANCE IN YOUR SIGHTS.**

Whether you’re on the racetrack or on a road trip, how far ahead you can see affects everything. Jewel Eye® LED headlights are standard on every Acura and provide maximum visibility, precise control, and refinement. Jewel Eye® LED headlights are designed to provide maximum visibility, precise control, and refinement. The result? Less fatigued driving, clarity, and more vivid colors.

Auto High-Beam can further enhance vision, increasing visibility by more than two hundred feet. A windshield-mounted camera continuously monitors the road ahead, automatically switching the high beams off to avoid blinding oncoming traffic.

The MDX was designed with the single-minded goal of putting the driver and passengers first, and not only did we hit our impossibly high standards, we exceeded them. With available features such as handcrafted and responsibly sourced natural woods, premium contrast stitching and piping details, and your choice of seven-passenger seating or a six-passenger configuration with body-contouring second row captain’s chairs, wherever you’re seated, you’ll feel like the MDX was built with you in mind.
Performance happens when driver and machine work together as one, when the car responds instantly and instinctively to the driver. When you no longer have to think of asserting control, and instead feel it. It’s why we look beyond zero-to-sixty times and spec sheets to measure our vehicles’ performance, because at the end of the day, the experience is something that can’t be communicated with numbers. Rather, it’s the rush. The exhilaration. The sensation of feeling simultaneously one with the car and road. When you climb into the driver’s seat of the MDX, you’ll know, as we do, that performance is more than a stat.
DIRECT CONNECTION BETWEEN DRIVER & VEHICLE
**PERFORMANCE YOU CAN FEEL.**

Super Handling All-Wheel Drive™ (SH-AWD®) was designed to adapt to the driver for superior handling under almost any conditions. This innovative torque-vectoring system sends power to the wheels that need it most to match driver input, weight distribution, and available traction, providing seamless power transitions and supreme control—control that goes beyond traction and forms a direct connection between driver and car.

**SH-AWD**

**Cornering**
When cornering on dry surfaces, up to 70 percent of the torque is distributed to the rear. Torque vectoring allows up to 100 percent of that power to distribute to the outside rear wheel, improving control and helping rotate the MDX through the turn.

**Lane Change**
For increased stability during lane changes, the SH-AWD system transfers power to the inside rear wheel.

**Slippery Road**
Under slick conditions, SH-AWD actively sends power to the wheel with the most traction.

**Highway Cruise**
For better fuel efficiency, up to 90 percent of the power is sent to the front wheels when cruising in a straight line.

MDX SH-AWD with Advance Package shown in White Diamond Pearl.
SUPERCAR-INSPIRED PERFORMANCE.

When independent thinking and world-class engineering intersect, amazing things happen, and Sport Hybrid SH-AWD is the latest result of our uncompromising pursuit to build the world’s most innovative vehicles. Sport Hybrid SH-AWD is a groundbreaking, electric-torque-vectoring, all-wheel-drive system we’d argue is the world’s most advanced. In fact, the MDX system uses some of the same next-gen technology we developed for the new NSX—including the Twin Motor Unit (TMU) and battery pack—all working to provide instant-response acceleration and precise handling to deliver a more direct connection between driver and vehicle.

The Sport Hybrid SH-AWD system consists of a powerful V-6 engine and three electric motors—a direct-drive motor paired with a rapid-shifting 7-speed Dual-Clutch Transmission and a rear Twin Motor Unit for individual, instant torque vectoring. The vehicle is tuned to supply positive or negative torque instinctively based on driving conditions and the driver’s input, resulting in dynamic acceleration, direct response, and precise handling in all conditions. And unlike even the most advanced AWD systems, the MDX’s electric Sport Hybrid SH-AWD system delivers torque vectoring while off throttle, providing always-on and instant precision and performance.

SPORT HYBRID SH-AWD

The Sport Hybrid SH-AWD system consists of a powerful V-6 engine and three electric motors—a direct-drive motor paired with a rapid-shifting 7-speed Dual-Clutch Transmission and a rear Twin Motor Unit for individual, instant torque vectoring. The vehicle is tuned to supply positive or negative torque instinctively based on driving conditions and the driver’s input, resulting in dynamic acceleration, direct response, and precise handling in all conditions. And unlike even the most advanced AWD systems, the MDX’s electric Sport Hybrid SH-AWD system delivers torque vectoring while off throttle, providing always-on and instant precision and performance.

Regeneration

When braking, coasting, or cornering, the ever-efficient system captures kinetic energy and uses it to recharge its advanced lithium-ion battery.

Cornering

When cornering, the rear Twin Motor Unit allows for instant torque transfer side to side in the rear, independently applying positive or negative torque to each wheel. This torque-vectoring effect directly controls the yaw rotation around a vertical axis, twisting the MDX through corners, tightening its line, and precisely tracing the driver’s desired path.

Acceleration

From a standstill, Sport Hybrid SH-AWD uses the rear electric motors to deliver torque instantly, translating to dramatic acceleration off the line. During light acceleration, only the rear twin electric motors operate; under more aggressive acceleration, the gasoline engine and all three electric motors kick in simultaneously to maximize performance.

Highway Cruise

At low cruising speeds, the system can operate in electric-only mode, with power being sent to only the rear wheels. At higher speeds, up to 100 percent of the power is sent to the front wheels when cruising in a straight line.

Slippery Road

Sport Hybrid SH-AWD monitors speed, wheelspin, driver input, and more to actively and instantly distribute power to the wheels with the most traction or send negative torque to a specific wheel to act as a stabilizing force.
INTUITIVE RESPONSE, ACCELERATION & PRECISE HANDLING
ANTICIPATES YOUR EVERY MOVE.

Agile Handling Assist® uses active braking to aid in the accurate tracing of your desired line through a turn. The system can brake individual wheels as needed, effectively using brake torque vectoring to directly control the vehicle’s rotation. Working jointly with amplitude reactive dampers—dual-valve suspension technology that reacts to the road and available Super Handling All-Wheel Drive—the MDX’s highly precise handling feels more like that of a sports sedan than a seven-passenger luxury SUV.

It also happens to be the lightest in its class, in some cases by more than a thousand pounds. To reduce weight and increase rigidity, the body structure features lightweight materials such as ultra-high-strength hot-stamped steel, aluminum, and magnesium. And less weight equals more performance, which is why we cut every unnecessary ounce.
With Comfort, Normal, and Sport, our Integrated Dynamics System (IDS) delivers three modes of Precision Crafted Performance. If you’re looking to raise your pulse, Sport mode dials up throttle response and weights the steering for a sports car–like feel while inciting a more aggressive response from the available SH-AWD system. And for an even more engaging experience, put full manual control of the 9-speed transmission at your fingertips with our race–inspired Sequential SportShift paddle shifters.

MDX Sport Hybrid SH-AWD takes things a step further, adding a Sport+ mode, disabling EV-only operation, and offering maximum battery assist at launch. In addition, its Active Damper System makes adjustments to ride and handling depending on which mode you’re in. Comfort mode delivers improved ride comfort, while Normal mode provides a good everyday balance. In Sport and Sport+ modes, the Active Damper System boosts response and control with limited roll, increased damping, and improved precision. The system continuously monitors vehicle sensors, making micro–adjustments in milliseconds for exceptional road holding and stability.
People are more important to us than any vehicle or industry accolades, so when it comes to protecting our passengers, we ask ourselves one simple question, "Is it safe enough for our own families to ride in?"

It’s our greatest goal to one day drive in a zero-collision society, and the MDX was designed and engineered with that goal in mind. For us, safety is personal.
AcuraWatch™ combines a network of next-level sensing technologies designed to increase awareness and support the driver, working to help prevent, avoid, and mitigate impacts.* Sensors continuously monitor the vehicle’s surroundings and can recognize not only cars, but also the shapes of motorcyclists and pedestrians—even shrubbery and mailboxes. AcuraWatch can warn of potential threats, provide steering input to help keep you in the center of a detected lane, brake to maintain a set interval from cars detected ahead, and emergency-brake to help avoid collisions.

In addition, our available Surround-View Camera System with exterior cameras gives you a 360-degree view of the space around the MDX. With six unique camera views, parking sensor information, and dynamic guidelines that show your expected path, you’ll feel more connected to your surroundings than ever before.2

*Driver remains responsible for safely operating vehicle and avoiding collisions.
Acura’s next-generation Advanced Compatibility Engineering™ (ACE™) body structure is designed to absorb and disperse frontal impact energy so less force is transferred to what really matters: the people inside. But we didn’t stop there. Crash compatibility is designed into the structure as well, so in the event of a collision, the occupants of all vehicles involved are more protected.

It’s just one reason the MDX received the highest possible overall safety rating from both the National Highway Traffic Safety Administration (NHTSA) and the Insurance Institute for Highway Safety (IIHS) for 2017.
EVERYTHING

We designed the MDX around its passengers, because our definition of performance is one that extends beyond the traditional—one that encompasses ergonomics, sound, connectivity, and comfort, all working together to enhance the driving experience.
To build the best, you need to work with the best, which is why we collaborated with eight-time Grammy® award-winning music producer, mixer, and engineer Elliot Scheiner to create the critically acclaimed ELS Studio® Premium Audio System available in the MDX.

Whether you’re listening over the airwaves, streaming digitally, or enjoying your own music library, ELS Studio was designed to produce music as it’s meant to be heard, so even the most familiar tunes will become a whole new listening experience. The result is the perfect combination of engineering and artistry, and it’s totally unique to Acura. Yet another example of Precision Crafted Performance.

The full studio experience comes together with the help of acoustic spray foam and Active Sound Control, which uses the audio system’s speakers to fight unwanted sound with sound, creating a quiet listening environment.

“Acuna cares, unlike some other providers that put systems in automobiles. Others come from a scientific background, meaning they tune using numbers and charts. Not ears. That’s not what music is about, and it is the key to why the ELS Studio systems are so highly regarded.”

— Elliot Scheiner
The MDX supports both Apple CarPlay™ and Android Auto™, keeping you connected to everything you love about your smartphone, including maps, texts, emails, music, and more, all seamlessly and safely integrated into your MDX, so you can stay focused on the road.

APPLE CARPLAY

Place the power of your iPhone® in your dash with Apple Carplay. A redesigned OS seamlessly integrates your iPhone with the car’s built-in display and controls, so you can make calls, access your music, send and receive messages, get directions, seamlessly tap into the power of Siri® with the press of a button with Siri Eyes Free, and more.12

ANDROID AUTO

Android Auto brings the Android™ experience to your car by projecting all your favorite apps and services right onto the MDX’s display, and it’s highlighted by an intuitive interface that populates suggested directions, upcoming appointments, and weather conditions, to name a few. The powerful new Talk to Google voice feature allows you to access directions via Google Maps™ or Waze™, send and receive text messages, and access your favorite music, providing an easier way to get the information you need, when you need it.13
AcuraLink

It’s not enough to simply be connected anymore; we need tools that work harder for us. Beyond conventional navigation, available AcuraLink® seamlessly connects you to the information and media you want.* Pair it with your smartphone to keep up on emails, texts, and tweets,* find a new restaurant, plan your weekend adventures, and drive with the assurance of AcuraLink Assist services.*

If traffic backs up, available AcuraLink Real-Time Traffic™ pulls surface-street information and can reroute you for a faster commute. And for the most demanding drivers, Live Concierge Link puts personal assistants at your fingertips, night and day, to ensure that all your journeys go off stress-free.*

*Responsible. Some state laws prohibit the operation of handheld electronic devices while operating a vehicle. For safety reasons, always launch your audio application or perform any other operations on your phone or audio device only when the vehicle is safely parked.

When you purchase a vehicle with the exceptional quality of an Acura, you expect service and support to be of the same caliber. After all, a premium automobile is only part of the ownership experience. With Acura, you also benefit from Acura’s commitment to your satisfaction doesn’t end with the delivery of a world-class vehicle. As an Acura owner, you’ll enjoy an array of services, like the Acura Concierge, for 24-hour weather information, insurance claims assistance, or to help you plan a trip, trip-interruption benefits, like alternative transportation, lodging, and meals, and a 24-hour Roadside Assistance program.

**Acura Financial Services**

From leasing to financing to protecting your vehicle after your warranty expires to helping you determine which Acura fits your budget, Acura Financial Services (AFS) provides you with the convenience, options and service to complement your life. For more information, go to acurafinancialservices.com.

**AcuraCare**

Additional peace of mind can be had with the Acura Care program—comprehensive vehicle and travel protection beyond the initial warranty period. See your Acura dealer for all the features and benefits available with this program.

**Total Luxury Care (TLC)**

Acura’s commitment to your satisfaction doesn’t end with the delivery of a world-class vehicle. As an Acura owner, you’ll enjoy an array of services, like the Acura Concierge, for 24-hour weather information, insurance claims assistance, or to help you plan a trip, trip-interruption benefits, like alternative transportation, lodging, and meals, and a 24-hour Roadside Assistance program.

**Owners.acura.com**

The help online doesn’t end when you take possession of your vehicle. Your complimentary Acura Owners personalized website gives the most current information about your vehicle, provides tips on how to care for your Acura, lets you keep a personalized maintenance record, sends you service reminders, and lets you schedule service appointments online.

**AcuraLink Mobile App**

Use your smartphone to connect with an Acura at the push of a button. Access a full range of Acura roadside assistance services using your Apple device or iPhone, including comprehensive towing, lockout assistance, battery jump-start, tire change, and fuel delivery, with your phone’s GPS technology providing your exact location. You can use the app to view scheduled time of arrival and contact information for the dispatched service provider. The app also offers a priority emergency button for urgent situations. Visit the Apple iTunes Store or shop Google Play to download this free app.

**Acura.com**

Learn more about Acura vehicles, including the latest specifications, see photo galleries and technology videos, and find dealer locations with the convenience of the catalog. You can also build and price your Acura, see current offers, and even get a quote from an internet-certified Acura dealer.
