

NSX

A rush like no other.

"Crank it up to the 8000 rpm redline in any gear, and that VTEC marvel behind your head instantly starts playing the sound track from Le Mans. There isn't a sports car in the universe that can match the NSX for ethereal scintillation in full cry." Sports Car International, Dec/Jan 1999.

Thank you, we couldn't have said it better.

NSX

street
legal...

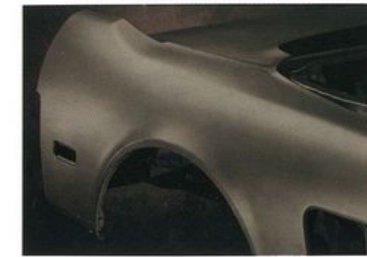

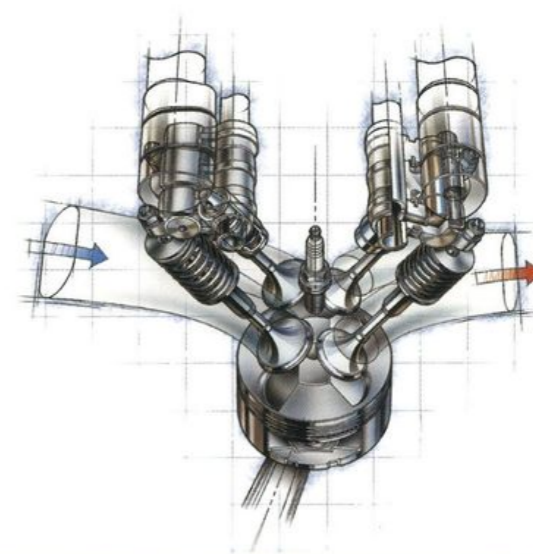

The world's most advanced automotive engineering and design are not created in offices and design studios. Rather, they are won at the legendary racing venues of Le Mans, Monte Carlo, Rio de Janeiro, and Laguna Seca. These are the proving grounds of Honda and the breeding grounds of NSX.

one by one...

The space age strength of titanium. The awesome power of VTEC advanced technology. The sheer beauty of aluminum. This is NSX.

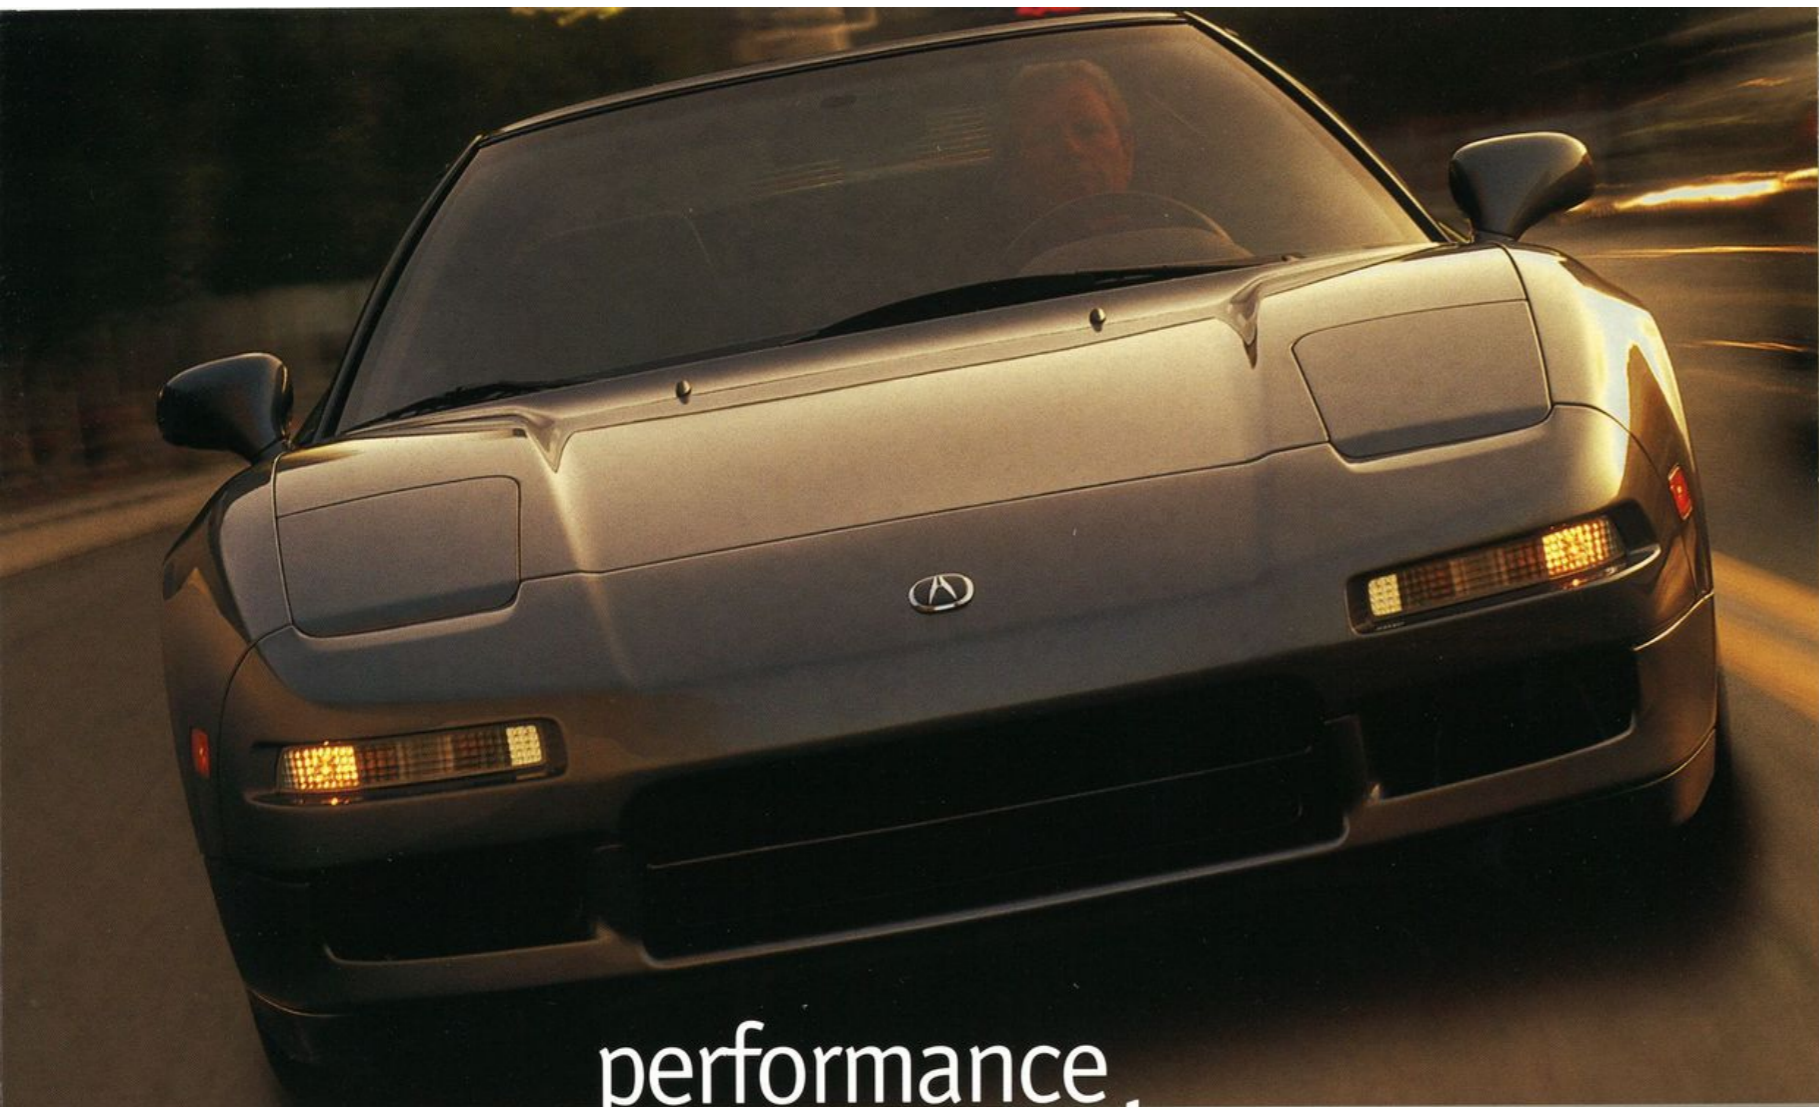

Advanced technology and craftsmanship converge.

Meticulously hand-crafted in its own custom facility within the confines of one of the world's most elaborate and secretive proving grounds, the NSX is quite simply a work of art. From its aluminum alloy body and chassis, to its titanium connecting rods and suspension members, the NSX is a perfect blend of advanced technology and rare craftsmanship. Experience it.

In six colors.

Each handcrafted NSX body is meticulously inspected prior to painting. This is but one step in a rigid 27-step paint process that insures an absolutely flawless finish.
