When you put the driver first, when you build around their desires, when you make sure every innovation is an improvement in performance, that is the spirit of Precision Crafted Performance, and that is how we create the Acura RDX.
IMAGINATION IS OUR MOST POWERFUL ENGINE
NOT ALL EMOTION COMES FROM THE ENGINE

Every car is designed to take you on a journey. Truly great design begins the journey long before the engine is turned on. One glance, and the lines of the RDX take the eye, hold it tight, and dance it across the sculpted body. Low and wide with flared fenders, the aggressive lines announce a focus on performance. And once the engine roars to life, Jewel Eye® LED headlights and dragon tail taillights make sure both arrival and departure are mesmerizing.
Turbocharged Style

Too aggressive? No such thing. A-Spec® takes what was already an aggressive design and turns it up to eleven. Massive 20-inch five-spoke Shark Gray alloy wheels give this SUV unmistakable presence in a crowd. Confidence is furthered with an aggressive front bumper complete with LED fog lights. Even the smallest details—dark exterior trim accents, a matte-black diffuser, dual exhaust outlets—add to the demeanor, all of it proudly finished with prominent A-Spec badging.
A-SPEC INTERIOR STYLE

In the RDX, every decision, including styling, is made first for the driver, which is why A-Spec styling begins at the steering wheel. Front and center, it’s the most dominant feature, so we outfitted the RDX with an A-Spec sport steering wheel finished with race-inspired paddle shifters. It’s a styling attitude furthered at the driver’s feet with eye-catching metal sport pedals, as well as throughout the cabin, with red ambient lighting and a silver-faced instrument panel that glows red. It’s all there to make sure your RDX has as much performance style as it has performance abilities.

A-SPEC INTERIOR COMFORT

When you enter the RDX A-Spec, comfort is found immediately in a selection of fine leathers. You can choose either the exclusive red leather interior complete with luxurious black Ultrasuede® inserts or a full-black leather and Ultrasuede combination. Both leather selections are finished with precision crafted sports-oriented stitching.
The second you are wrapped by the calm, quiet, well-appointed interior of the RDX, you realize the cabin is engineered to offer not only a premium experience in comfort, but also in focus and control. Fine leather, rich with its bold aroma, adorns the seats, its calm notes contrasting nicely with the strong, taut lines of the cabin’s natural wood or brushed aluminum trim.
HERE COMES THE SUN

Of all the amenities inside the RDX, two of the finest are space and silence, which is why we equipped every RDX with a class-leading panoramic roof to dramatically fill the cabin with comforting light and increase its sense of space. It’s also why we triple-sealed the doors, used acoustic glass, and even engineered Active Sound Control to cancel out unwanted noise.

Silence and space, more and more limited in the outside world, are plentiful in the RDX.

A-Spec
Thrones don’t hold this much power. Available sixteen-way power-adjustable front seats, including four-way adjustable lumbar support, a four-way adjustable head restraint, a power thigh extension, power side bolsters, heating, and ventilation were designed completely from scratch on a frame made from ultra-high-strength steel. Why? The better the seat, the better the connection to the road.
Kime, in martial arts, means both “focus” and “power,” as the two are considered dependent on each other. This perspective led us to a driver-centric command-center approach we call the True Touchpad Interface. First, we moved the “touch” off the dash-mounted display, eliminating awkward reaches and endless fingerprints, to where it makes much more sense: an ergonomically friendly tactile surface in front of the center armrest. Then, we installed the world’s first application of absolute positioning in an automobile: where you touch on the pad is where you engage on the display. The result? A natural, instinctive, nearly effortless command of navigation, music, cell phone, and vehicle information, all while keeping the driver focused on what matters most: driving.

A DRIVER’S FOCUS CREATES A CAR’S PERFORMANCE

In the RDX, even information management is a high-performance experience. Rising above the dash, in concert with the driver’s natural line of sight, a 10.2-inch HD display effortlessly delivers audio and available navigation. Effortlessly, because it’s managed by both the True Touchpad Interface and a brand-new natural-language voice-recognition system. No more distracting robotic commands and multilevel requests to find a destination. Now, simply say the address or the name of your destination—and ask for suggestions like the best sushi or Italian restaurant in the area—and the route will be delivered. AcuraLink Real-Time Traffic™ with Traffic Rerouting™ pulls surface-street information, including traffic flow, incidents, and construction, and can thoughtfully reroute you for a faster commute. Along the way, you’ll stay connected thanks to standard Apple CarPlay® integration, offering access to Siri, Apple Maps, and more, depending on your iPhone® model.2

EFFORTLESSLY NAVIGATE YOUR NAVIGATION SYSTEM

In the RDX, even information management is a high-performance experience. Rising above the dash, in concert with the driver’s natural line of sight, a 10.2-inch HD display effortlessly delivers audio and available navigation. Effortlessly, because it’s managed by both the True Touchpad Interface and a brand-new natural-language voice-recognition system. Performance isn’t just about horsepower. If it were, the RDX offers plenty, 272 horsepower. But there is much more to the story. The new direct-injection, all-aluminum, VTEC® turbo engine is also a revolution in low-end torque. Red-light-to-green-light go power is perfectly mated to a 10-speed transmission and instinctively connected to your desires through Sequential SportShift paddle shifters.
NOT EVERY ROAD IS RACETRACK PERFECT

Developed on the most demanding tracks and roads around the world, available Super Handling All-Wheel Drive™ (SH-AWD®) delivers superior performance and control in high-performance driving conditions, even when the weather and road conditions are far from high-performance. SH-AWD is already renowned for its ability to create a stable driving platform by instantly distributing power to each wheel based on wheel speed, steering angle, lateral G-forces, and yaw rates, but we thought we could make it even better. Rain and sun, snow and sleet, track-perfect corner after snow-covered corner after gravel-filled corner, we were able to further improve both the torque capacity and torque vectoring, a chalkboard-filling equation that turns the RDX into one of the best-performing vehicles on the road, regardless of the road.

**Cornering**
When cornering on dry surfaces, up to 70 percent of the torque is distributed to the rear. Torque vectoring allows up to 100 percent of that power to be distributed to the outside rear wheel, improving control and helping rotate the RDX through the turn.

**Lane Change**
For increased stability during lane changes, the SH-AWD system transfers power to the inside rear wheel.

**Slippery Road**
Under slick conditions, SH-AWD actively sends power to the wheel with the most traction.

**Highway Cruise**
For better fuel efficiency, up to 90 percent of the power is sent to the front wheels when cruising in a straight line.
PERSONALIZE YOUR PERFORMANCE

Inside the RDX, Acura’s Integrated Dynamics System (IDS) offers four unique drive modes that match the dynamic responses of the SUV to both your mood and your driving environment. Just as you would click on a song, the turn of a dial is all it takes to instantly adjust many aspects of how intimately the vehicle and driver engage. Depending on the drive mode selected—Snow, Sport, Sport+, Comfort—you can increase the throttle response, adjust shift points, steering feel and SH-AWD settings (if equipped). With the Advance Package, you can further personalize your RDX with adjustments to the suspension settings.

Choose Snow mode for those snow days you just can’t stay inside, Sport+ for those weekend days when you want to conquer an empty mountain road, and Comfort when all you want to do is cruise home after a day at work.
ELS STUDIO
3D AUDIO
THE FUTURE
OF SOUND

SUV OR CONCERT HALL?
The world’s best concert halls are engineered to offer a fully immersive listening experience. So too is the RDX. Rather than taking the conventional route of asking a top-end audio manufacturer to slap in its sound system, we asked eight-time Grammy® award–winning producer and engineer Elliot Scheiner to craft an audio system engineered exclusively for the cabin of the RDX. The result: the available ELS Studio® 3D Premium Audio System with sixteen speakers, including four in the ceiling, and 710 watts of power that create a three-dimensional midair suspended sound image that’s precisely tuned for each occupant, completely immersing them in the music. It is most likely the world’s only 272-horsepower concert hall.
There’s no such thing as too much storage

The interior of the RDX is designed to support you in everything you do. If you’re buying an SUV, odds are you are doing a lot and doing it with a lot of family and friends. Not only is rear-seat comfort as refined as front-seat comfort, thanks to its flat-floor design, but the RDX also offers a generous 79.8-cubic-foot cargo capacity,* including smart underfloor storage, all of which is easily accessed through the power-operated and available hands-free tailgate.

*Max cargo capacity behind front seats. Based on SAE J1100 cargo volume measurement standard plus floor space between front and second seats and seat backs moved forward. This figure compares more accurately with most competitive measurements.
The most important person on the road is every person on the road

AcuraWatch™ forms a network of sensing technologies hard at work in the RDX. These advanced safety and driver-assistance features constantly gather information and offer warnings, and some features can even take action when necessary, all to help prevent, avoid, or minimize threats.

a. Available Blind spot information system (BSI)

b. Available Rear Cross Traffic Monitor

c. Multi-View Rear Camera with Dynamic Guidelines

Available Surround-View Camera System

d. Lane Departure Warning (LDW) System

Lane Keeping Assist System (LKAS)

Road Departure Mitigation (RDM) System

e. Adaptive Cruise Control (ACC) with Low-Speed Follow

f. Collision Mitigation Braking System™ (CMBS™)

Forward Collision Warning (FCW) System

RDX SH-AWD with Advance Package shown in Performance Red Pearl.
ADVANCED COMPATIBILITY ENGINEERING

The safest collision is the one you avoid. That’s reason enough to consider the high-performance RDX with standard AcuraWatch advanced safety and driver-assistance technology, however, some collisions are unavoidable. That’s why Acura’s next-generation Advanced Compatibility Engineering™ (ACE™) body structure was designed to absorb and disperse frontal impact energy more evenly around the car, so less of it transfers to what really matters: the vehicle’s occupants. Moreover, frontal crash compatibility is designed into the structure, so in the event of a collision with a smaller or larger vehicle, the occupants of both vehicles, not just those in the Acura, are more protected. But we didn’t stop there. We innovated the structure around the doors, making them four to five times stronger than traditional-grade automotive steel, through laser welding, hot stamping, and the use of ultra-high-strength steel, all to improve cabin strength and the chance of literally walking out the door after an impact.
PERSONALIZE YOUR PERFORMANCE

When it comes to personalizing, choose Acura Genuine Accessories, which are crafted with the same precision and attention to detail as the rest of your Acura. The RDX has over 54 accessories to choose from. Visit your Acura dealer or acura.com for a complete list.

When you purchase a vehicle with the exceptional quality of an Acura, you expect service and support to be of the same caliber. After all, a premium automobile is only part of the ownership experience. With Acura, you also get a commitment to personalized care, to attentive service. This commitment is apparent the moment you first enter an Acura dealership and for years down the road. It comes from a belief that every aspect of owning an Acura should be an enjoyable and rewarding experience.

Acura Limited Warranties

All Acura vehicles and any Acura Genuine Accessories installed by the dealer at the time of vehicle purchase have a four-year/50,000-mile limited warranty. Acura vehicles are also covered by a six-year/70,000-mile limited powertrain warranty. In addition, outer-body rust-through is covered by a five-year/unlimited-mile limited warranty.

Acura Financial Services®

From leasing and financing to protecting your vehicle after your warranty expires to helping you determine which Acura fits your budget, Acura Financial Services (AFS) provides you with the convenience, options, and service to complement your life. For more information, go to www.acurafinancialservices.com.

Acura Care®

Additional peace of mind can be had with the Acura Care program—comprehensive vehicle and travel protection beyond the initial warranty period. See your Acura dealer for all the features and benefits available with this program.

Total Luxury Care® (TLC®)

Acura's commitment to your satisfaction doesn't end with the delivery of a world-class vehicle. As an Acura owner, you'll enjoy an array of services, like the Acura Concierge® for 24-hour weather information, insurance claims assistance, or to help you plan a trip; trip-interruption benefits, like alternative transportation, lodging, and meals; and a 24-Hour Roadside Assistance program.
