20/32/24

Performance is in our DNA, and we believe it’s best achieved when the car responds instantly and instinctively to the driver. When you no longer have to think about asserting control, and instead feel it. The rush. The exhilaration. The sensation of feeling simultaneously one with the car and road. It’s what driving was meant to be. And it’s what Precision Crafted Performance is all about.

This is the 2018 Acura TLX. And this is how we make it.
TLX V-6 SH-AWD with A-SPEC Package shown in Bellanova White Pearl.
From the beginning, it’s been our goal to create performance vehicles with an unrivaled level of precision. Every detail meticulously crafted, and all with the single-minded goal of designing the world’s most cutting-edge, experience-boosting, driver-first performance vehicles.
Inspired by the Acura Precision Concept, the 2018 TLX was reimagined to reflect the bold and distinctive future of Acura vehicles. Highlighted by our new Diamond Pentagon Grille and featuring a low, wide stance that prioritizes precision handling, the aggressively redesigned TLX delivers a sporty and modern look that speaks to the exhilarating performance to be had behind the wheel.

The V-6 with Advance Package provides even more elevated design features, such as 18-inch, pewter-gray, machine-finished, fifteen-spoke wheels; LED fog lights; a body-colored rear spoiler; and rectangular dual-exhaust outlets.

**JEWEL EYE LED HEADLIGHTS**

Whether you’re on the racetrack or a road trip, how far ahead you can see affects everything. Jewel Eye® LED headlights are standard on every Acura and provide impressive down-road visibility with an intense, wide beam of light designed to mimic natural sunlight—the light our eyes are designed to see in. The result? Less fatigued driving, clarity, and more vivid colors.
The cockpit of the 2018 TLX was designed to support the driver and front passenger by creating a personal sanctuary where every performance-inspired detail is deliberate and intuitive. The center stack features two display screens, one dedicated to phone, navigation, and information, and a second that is touch-friendly and controls audio and climate functions. Available premium sport seats with contrast stitching and piping details provide ample support when cornering and comfort when cruising, while the V-6 with Advance Package delivers heated rear seats, a heated steering wheel, and white ambient cabin accent lighting that creates an environment for an unmatched driving experience.
Engineered to attack the turns, the A-SPEC® Package’s upgraded performance features include 19-inch Shark Gray split five-spoke wheels with road-grabbing 245-section tires, along with retuned steering and suspension.

The available A-SPEC Package takes the TLX’s bolder, sportier design to another level with performance-driven details that include our signature Diamond Pentagon Grille with unique dark-chrome surround and gunmetal mesh, a front bumper with oval fog lights, a rear bumper with a piano-black diffuser and dual oval exhaust outlets, a piano-black rear spoiler, smoked headlights and taillights, side sills, A-SPEC badging, and optional exclusive Still Night Blue Pearl color.

Step into the driver’s seat to find either an all-red leather or an Ebony leather with Alcantara-trimmed interior, sport A-SPEC seats with more aggressive side bolsters, a unique A-SPEC steering wheel, a black headliner, red accent lighting and instrumentation, brushed-aluminum metal-look trim, and A-SPEC badging.
a. Red instrument illumination.
b. Sport A-SPEC seats with premium Alcantara-trimmed interior with contrast stitching and piping.
c. Exclusive A-SPEC rear bumper with diffuser and exposed dual exhaust finishers.
d. Dark-chrome taillights, a piano-black decklid spoiler, and A-SPEC badging.

TLX V-6 SH-AWD with A-SPEC Package shown with Full Red interior.
While the TLX’s available 290-hp V-6 and 206-hp inline-4 definitely get it done in a straight line, the TLX was built for the corners. We believe cars should respond instantly and instinctively to the driver’s input, and with innovative handling technologies such as Precision All-Wheel Steer™, available Super Handling All-Wheel Drive™ and Agile Handling Assist®, the 2018 TLX delivers a direct connection to both car and road.
Our Integrated Dynamics System (IDS) delivers four modes of Precision Crafted Performance. If you’re looking to raise your pulse, Sport mode dials up throttle response, increases shift points, and weights the steering to deliver a sports car–like feel while inciting a more aggressive response from the P-AWS® or SH-AWD® systems. Sport+ pushes it further with even higher shift points and rev-matched downshifts to punctuate gear changes and preserve balance.

And for an even more engaging experience, put full manual control of either the 8-speed Dual-Clutch or 9-speed transmission at your fingertips with race-inspired Sequential SportShift paddle shifters.
206-HP 4-CYLINDER

The sporty and high-revving 2.4-liter DOHC i-VTEC engine matched with a world’s-first automotive 8-speed Dual-Clutch Transmission (DCT) with torque converter delivers lightning-fast yet smooth gear changes for direct and responsive performance.

290-HP V-6

For those looking for more exhilaration behind the wheel, the 3.5-liter i-VTEC® V-6 paired with the smooth-shifting 9-speed automatic provides 267 lb-ft of tarmac-punishing torque, delivering instant power and an always dynamic driving experience.
PRECISION ALL-WHEEL STEER

Precision All-Wheel Steer (P-AWS) takes advantage of the untapped steering potential of the rear wheels, adapting intuitively in support of the driver and responding to their inputs with constant and immediate adjustments. This intelligent, world’s-first system adjusts the toe angle of each rear wheel independently for increased agility and stability while cornering, changing lanes, and braking, delivering an unprecedented level of handling precision and performance.

AGILE HANDLING ASSIST

Agile Handling Assist uses active braking to aid in the accurate tracing of your desired line through a turn. The system can brake individual wheels as needed, effectively using brake torque vectoring to directly control the vehicle’s rotation, delivering a more intuitive handling experience.

TLX V-6 SH-AWD with A-SPEC Package shown in Bellanova White Pearl.
A DIRECT CONNECTION BETWEEN DRIVER AND CAR
Available Super Handling All-Wheel Drive was designed to adapt to the driver for superior handling under almost any condition. This innovative torque-vectoring system sends power to the wheels that need it most, distributing power from front to back, or side to side on the rear wheels, to match driver input, weight distribution, and available traction. In a corner, the system sends up to 100 percent of the rear power to the outside wheel, effectively rotating the car and significantly enhancing maneuverability and control. This groundbreaking performance technology provides seamless power transitions and supreme control.

When cornering on dry surfaces, up to 70 percent of the torque is distributed to the rear. Torque vectoring allows up to 100 percent of that power to distribute to the outside rear wheel, improving control and helping rotate the TLX through the turn.

For increased stability during lane changes, the SH-AWD system transfers power to the inside rear wheel.

Under slick conditions, SH-AWD actively sends power to the wheel with the most traction.

For better fuel efficiency, up to 90 percent of the power is sent to the front wheels when cruising in a straight line.
Safety is our greatest priority, and the 2018 TLX was built with that belief in mind. Full of leading-edge safety features such as our ACE™ body structure and standard AcuraWatch™ advanced safety and driver-assistance technology, the TLX received the highest possible overall safety rating from the National Highway Traffic Safety Administration (NHTSA).
AcuraWatch

Equipped with AcuraWatch, the TLX is the only vehicle in its class to come standard with a full suite of advanced, active safety and driver-assistance technologies. AcuraWatch is a network of systems designed to increase awareness and support the driver, working to help prevent, avoid, and mitigate impacts.

Sensors continuously monitor the vehicle’s surroundings and can warn of potential threats, provide steering input to help keep you in the center of a detected lane, help brake to maintain a set interval from cars ahead, and emergency-brake to help avoid frontal collisions.

In addition, our available Surround-View Camera System gives you a 360-degree view of the space around the TLX. With six unique camera views, parking sensor information, and dynamic guidelines that show your expected path, you’ll feel more connected to your surroundings than ever before.2

f. Multi-View Rear Camera with Dynamic Guidelines8
Surround-View Camera System9
ACE BODY STRUCTURE

Acura’s Advanced Compatibility Engineering™ (ACE) body structure is designed to absorb and disperse frontal impact energy so less force is transferred to what really matters: the people inside. But we didn’t stop there. Crash compatibility is designed into the structure as well, so in the event of a frontal collision, the occupants of all vehicles involved are better protected.

ACE incorporates extra bracing at the front corners (yellow) to absorb and distribute impact energy from narrow-offset collisions to the primary crash structure.

The outer braces (red) are designed to transfer impact load toward the center of the frame, where the energy can be distributed around the cabin area more evenly.

This enhanced frontal-crash-energy management helps reduce the forces transferred to the reinforced cabin (blue) and can help to more evenly disperse the forces transferred to other vehicles in a collision.

TLX V-6 SH-AWD with A-SPEC Package shown in San Marino Red.
Technology bridges the gap between car and driver—and not technology for technology’s sake—to enhance the driving experience. Our definition of performance extends beyond traditional standards, encompassing ergonomics, sound, advanced connectivity, and comfort, and with new available features such as heated outboard rear seats, wireless device charging, four-door smart entry, and a heated steering wheel, it can be felt the moment you climb into the TLX’s driver’s seat.
**KEEP CHARGING**

Cut the cord with the TLX’s available wireless charge pad, compatible with Qi-enabled phones and cases, and keep your device powered up when on the go.

**ELS STUDIO PREMIUM AUDIO SYSTEM**

To build the best, you need to work with the best, which is why we collaborated with eight-time Grammy® award-winner Elliot Scheiner to create the critically acclaimed ELS Studio® Premium Audio System. Whether you’re listening over the airwaves, streaming digitally, or enjoying your own music library, ELS Studio was designed to produce music as it’s meant to be heard, so even the most familiar tunes will become a whole new listening experience. The result is the perfect combination of engineering and artistry, and it’s totally unique to Acura. Yet another example of Precision Crafted Performance.
The On Demand Multi-Use Display™ (ODMD™) provides everything you need right at your fingertips. An easy-to-use and intuitive 7-inch touchscreen, ODMD consolidates the controls and information you may need at any given moment, including audio, climate control, and phone.

**Apple CarPlay™ and Android Auto™**

The TLX supports both Apple CarPlay™ and Android Auto,™ keeping you connected to everything you love about your smartphone, including maps, texts, emails, music, and more, all seamlessly and safely integrated into your TLX, so you can stay focused on the road.

**Apple CarPlay™**

Place the power of your iPhone® in your dash with Apple Carplay. A redesigned OS seamlessly integrates your iPhone with the car’s built-in display and controls, so you can make calls, access your music, send and receive messages, get directions, seamlessly tap into the power of Siri®, and more.1

**Android Auto™**

Android Auto brings the Android™ experience to your car by projecting all your favorite apps and services right onto the TLX’s touchscreen display, and it’s highlighted by an intuitive interface that populates suggested directions, upcoming appointments, and weather conditions, to name a few. The powerful new Talk to Google voice feature allows you to access directions via Google Maps,™ send and receive text messages, and access your favorite music, providing an easier way to get the information you need, when you need it.10
*Drive responsibly. Some State laws prohibit the operation of handheld electronic devices while operating a vehicle. For safety reasons, always launch your audio application or perform any other operations on your phone or audio device only when the vehicle is safely parked.

It’s not enough to simply be connected anymore; we need tools that work harder for us. Beyond conventional navigation, available AcuraLink® seamlessly connects you to the information and media you want.* Pair it with your smartphone to keep up on emails, texts, and tweets, find a new restaurant, plan your weekend adventures, and drive with the assurance of AcuraLink Assist services. If traffic backs up, available AcuraLink Real-Time Traffic™ pulls surface-street information and can reroute you for a faster commute. And for the most demanding drivers, Live Concierge Link puts personal assistants at your fingertips, night and day, to ensure that all your journeys go off stress-free.*
