THE NEXT CHAPTER IN A HISTORY OF NONCONFORMITY
IT IS A BADGE BORN OVER 105 YEARS AGO THAT STILL STANDS FOR SOMETHING ORIGINAL TODAY: A PASSION FOR MOTORING UNLIKE ANY OTHER. THE DNA OF ONE OF THE WORLD’S MOST HIGHLY REGARDED BRANDS RUNS DEEPER THAN THE ENAMEL OF ITS BADGE. WITH EACH RACETRACK WIN, EACH MILESTONE ALONG THE WAY, THAT REVERENCE HAS ONLY GROWN. IN 1962, THE LEGENDARY ALFA ROMEO GIULIA SEDAN DARED TO BRING TRACK-WORTHY TECHNOLOGY TO THE STREET. BY COMBINING AN ULTRA-POWERFUL ENGINE WITH A LIGHTWEIGHT BODY, IT FOREVER REVOLUTIONIZED THE SPORTS SEDAN.

ALFA ROMEO HAS ALWAYS TAKEN A UNIQUE AND INNOVATIVE APPROACH TO DESIGNING AUTOMOBILES; IT IS THE POINT OF CONVERGENCE BETWEEN DESIGN AND PASSION, BETWEEN A LOVE FOR THE MOST CUTTING-EDGE TECHNOLOGY AND A STRONG INSTINCT TO INSPIRE EMOTIONS. TODAY, ALFA ROMEO IS WRITING A NEW CHAPTER IN ITS HISTORY, INTRODUCING A FUTURE WHERE ONCE AGAIN THE DRIVER IS AT THE CENTER OF THE DESIGN. HERE IS THE ALFA ROMEO GIULIA.
The latest Giulia is a true original, yet it retains its Alfa Romeo heritage with optimized aerodynamics and the signature “Trilobe” shield grille. For this new generation of Giulia, two senior Ferrari design leads were given a clean, white sheet of paper and direct access to the finest technology, resources and talent. It was a rare opportunity to create a vehicle made entirely from their “wish list” priorities. Time was spent to perfect proportion — the proper ratio of body to wheels, the cabin position, the size of overhangs — the underpinnings on which a great car is built. The result is a vehicle that exudes a rare level of performance and passion that is instantly apparent to any eye.
Each Giulia is expertly and artfully assembled at a newly renovated, world-class sustainable plant in Cassino, Italy. Significant investment went into restructuring the plant, which will be home base for the Alfa Romeo Giulia and Stelvio production. It’s a clean, high-tech environment using World Class Manufacturing processes with a special emphasis on innovation, precision, energy efficiencies, teamwork and engagement. The Cassino plant paint shop is one of the first in the world to employ a dry-scrubbing technology that uses zero water and zero added chemicals. Individual work stations are created with the highest ergonomic standards and the assembly line is built around people, creating an operation that is as finely tuned as an orchestra. It all works to forge true passion for each Alfa Romeo that rolls off the line.
SHIFTING THE BALANCE OF POWER

near-perfect weight distribution 50:50
AGILITY COMES NATURALLY
The latest evolution of Giulia began with an all-new architecture that’s characterized by a longitudinal engine framework. The design emphasizes precise placement of lightweight materials to help achieve near-perfect 50/50 weight distribution across the front and rear axles. The Giulia’s side profile proportion highlights its optimized balance and seductive Italian design with short overhangs, along with a long hood and front fender proportions. Designers gave Giulia an organic design for timeless character.

A carbon fiber rear spoiler gives Giulia Quadrifoglio functional and visual aerodynamic advantages.

A patented rear multilink suspension with a vertical rod is engineered with aluminum and composite materials for reduced weight and provides a perfect balance between cornering speed and premium comfort. The carbon fiber driveshaft, a class-exclusive feature on every Giulia model, is an important weight-saving component in its near-perfect 50/50 weight distribution story.

Chassis Domain Control (CDC) acts as the “supervisor” to manage all active vehicle dynamic systems: Electronic Stability Control, 3 torque vectoring, adaptive suspension, active aero front splitter and Integrated Brake System (IBS) all work together in real time to optimize performance and drivability.

The carbon fiber driveshaft, a class-exclusive feature on every Giulia model, is an important weight-saving component in its near-perfect 50/50 weight distribution story.

The innovative all-new aluminum 280 hp 2.0-liter, Direct-injection I4 Turbo, and the 505 hp 2.9-liter, Twin-Turbo V6 Giulia engines are excellent examples of how engineers created the lightweight Giulia by strategically placing ultralight materials within Giulia’s architecture.

Brakes, doors, fenders and suspension components, including front shock towers, plus front and rear door frames, are all made of aluminum.

Forward Collision Warning Plus (FCW) provides autonomous braking and has the ability to slow or bring the vehicle to a full stop under certain circumstances if a frontal collision is imminent.

Giulia boasts exceptional torsional rigidity which contributes to greater comfort and excellent handling, even in challenging conditions.

Giulia reins in all that speed with the stopping power of all-aluminum brakes from Brembo®. They feature large, ventilated discs, plus four-piston front and one-piston rear aluminum monoblock calipers. On Giulia Quadrifoglio, there are six-piston front and four-piston rear calipers, or the available ultra-high performance carbon ceramic brake system shown here. Both front and rear rotors feature a two-piece design and deliver a 50 percent weight reduction compared to using cast iron discs.

On Giulia Quadrifoglio, torque vectoring optimizes launching during lateral acceleration. Unlike traditional systems that cut power, a two-clutch differential optimizes torque delivery to each wheel separately for improved power delivery, traction and control on all types of road surfaces.

A carbon fiber split front spoiler gives Giulia Quadrifoglio functional and visual aerodynamic advantages.

On Giulia Quadrifoglio and Giulia models, all doors, fenders, doors, suspension components, including front shock towers, plus front and rear door frames, are all made of aluminum.

A note about this brochure: all disclaimers and disclosures can be found on page 41.
EVEN LEGENDARY, WORLD-CLASS TALENT WELCOMES A BIT OF LUCK

It began as a simple request for good luck and ended up becoming a symbol for something even greater: track records and race victories from Alfa Romeo and the drivers who championed them. In 1923, legendary Alfa Romeo race car driver Ugo Sivocci wanted to break a string of second-place finishes.

To prepare for the legendary Targa Florio race through the mountains of Sicily, he painted a white square with a “Quadrifoglio,” or four-leaf clover, on the front of his Alfa Romeo RL Targa Florio. As luck would have it, he finished in first place. Weeks later, Sivocci was track-testing a new car that didn’t yet bear his lucky symbol. Tragically, he crashed and lost his life.

This marked the beginning of a tradition: all future Alfa Romeo race cars would bear the four-leaf clover on a white triangle instead of a square — with the missing corner symbolizing the loss of Sivocci. Post-World War II, the Quadrifoglio was also used to designate performance Alfa Romeo street vehicles like the 1963 Giulia Ti Super, the 1966 Giulia Sprint GTA and now, the all-new Giulia Quadrifoglio. Today, Sivocci’s clover remains a symbol of race-worthy capabilities and, of course, a symbol of good luck.
THERE IS NO HIGHER VALIDATION

It is a 12.9-mile-long serpent that has broken the hearts of even the most courageous racers. With a 1,000-foot elevation change from its lowest to highest point, the deceivingly picturesque Nürburgring in Germany’s Eifel Mountains has long served as the ultimate test for the spirit of man and machine alike. A track record here takes more than an extended right leg — it takes everything an engineer, designer and dreamer can incorporate into the art of motoring itself. With its unrivaled 505 horsepower engine and advanced performance features, the new Alfa Romeo Giulia Quadrifoglio arrived with serious intentions. The end result? A jaw-dropping, record-breaking 7:32 lap that places Giulia Quadrifoglio in a league with the world’s most exotic sports cars. What’s more, the same advanced chassis design and rigidity that led to its unsurpassed performance wasn’t something merely destined for the intimidating expanses of the Nürburgring; it’s something which can be found in every Giulia across the board.

7:32

the fastest lap ever by a four-door production sedan at the Nürburgring, one of the most demanding tracks in the world

RACING LEGACY
A MASTERSTROKE OF POWER
UNTOUCHABLE

GIULIA QUADRIFOGLIO

The most powerful production engine ever created by Alfa Romeo: an ultralight all-aluminum direct-injection, 2.9-liter V6 Twin-Turbo engine delivering 505 horsepower\(^5\) and 443 lb-ft of torque between 2,500 and 5,500 rpm launches Giulia from 0 to 60 mph in a class-leading\(^1\) 3.8 seconds and up to a best-in-class\(^1\) top speed of 191 mph. Thanks to an innovative, electronically controlled cylinder-deactivation system, the Giulia Quadrifoglio is also fuel-efficient.

505\(^5\) 443\(^5\) 3.8\(^1\) 191\(^1\) mph

CLASS-LEADING\(^2\)

GIULIA AND GIULIA TI

With 280 horsepower and 306 lb-ft of torque, the all-new Alfa Romeo direct-injection turbocharged four-cylinder engine is the top of its class. Lightweight and compact in design, it lives beneath the hood of Giulia and Giulia Ti models. This 2.0-liter direct-injection all-aluminum powerplant features a 2-in-1 turbocharger design that delivers exceptional turbo responsiveness. 16-valve design with MultiAir\(^\circledR\) technology makes for exceptional efficiency while clocking in a class-leading\(^2\) performance of 0 - 60 mph in 5.1 seconds.

280\(^2\) 306\(^2\) 5.1\(^2\) 149\(^2\) mph

1. Horsepower and torque figures are measured at a specified engine speed and represent peak values during the certification process. Actual production numbers may vary. Official figures are available from the EPA. 2. Based on Alfa Romeo’s testing. Actual performance may differ. 3. Engine speed at which maximum torque is measured. 4. Maximum engine speed. 5. Based on Alfa Romeo’s testing. Actual performance may differ.
Giulia puts the most direct steering available in the hands of its drivers. It starts with the double-wishbone front suspension and its semi-virtual steering axis. It creates a steering ratio of 11.8:1, guaranteeing an accurate steering feel.

Giulia proudly introduces Alfa Romeo’s newest-generation 8-speed automatic transmission, available with steering column-mounted aluminum paddle shifters. Co-developed with ZF, a global leader in driveline and chassis technology, it features an innovative compact gearset design that minimizes drag loss and increases efficiency, while a shift-by-wire design greatly improves safety and comfort. Its integrated transmission control unit shifts in less than 100 milliseconds — faster and more precisely than a professional driver.

THE PILOT PLOTS
THE COURSE
EVERY JOURNEY MADE EXTRAORDINARY

ALFA DNA

Thanks to the interaction with the Chassis Domain Control (CDC), Alfa DNA instantaneously adapts the car behavior to the selected driving mode:

- **RACE** activates the overboost function for increased torque limits and allows for maximum pedal response for ultimate sport driving (Giulia Quadrifoglio only).
- **DYNAMIC** delivers sharper throttle, brake and steering-wheel response for sporty on-road driving and a throatier exhaust note.
- **NATURAL** is a comfort setting for a perfect balance in daily driving.
- **ADVANCED EFFICIENCY** is an eco-saving mode engineered to achieve the lowest fuel consumption. On Quadrifoglio, it includes cylinder deactivation.
The most impressive performances are carried out with unwavering confidence — with a level of expertise that makes all seem effortless, mistake-proof. The innovative Q4 AWD system brings that commanding approach to every roadway, every condition. Linked to the Chassis Domain Control (CDC) and the driver-adjustable Alfa DNA Drive Mode Selector, ever-changing surface and climate factors are diagnosed and adjusted for, within 150 milliseconds. With Q4, Giulia is able to step up its all-season traction and optimize performance by transferring up to 60 percent of its engine’s torque to the front axle. It’s how both car and driver can confidently begin each and every journey.
ALL-WHEEL DRIVE.
ALL-AROUND AGGRESSIVE.
BUILT TO GRAPPLE WITH ANYTHING

UNIQUE SUSPENSION The front double-wishbone suspension with semi-virtual steering axis is an Alfa Romeo exclusive and is standard on all Giulias. It creates the segment’s most direct steering ratio (11.8:1) and boosts driver confidence with rapid and accurate steering feel. The patented Alfa Link™ rear suspension design with vertical rods is an expert multitasker; it enhances performance, driving pleasure and passenger comfort all at the same time.

INTEGRATED BRAKE SYSTEM (IBS) Standard on all Giulias, this innovative electromechanical system is an industry first, replacing traditional braking systems. It combines the stability control and brake system resulting in a significant reduction in weight and a faster increase in pressure, while optimizing the feeling of the brake pedal. In Giulia Quadrifoglio, drivers can customize brake feel using the Alfa DNA Drive Mode Selector and the available ultra-high-performance carbon ceramic brake system. It features six-piston front and four-piston rear aluminum monoblock brake calipers and larger 15.4-inch rotors, plus larger 14.2-inch rear rotors enabling 60 – 0 mph in 102 feet.
THE EXTENDED FAMILY

GIULIA TI SPORT  Clearly, there’s a competitive edge to this Giulia. Its short overhangs, elegantly sculpted silhouette, long hood and muscular rear fender emphasize its aggressive, road-holding stance. A racing pedigree emerges from its Giulia Sprint-inspired profile, featuring rounded angles and enveloping pillars. Sleekly styled front and rear Sport fascias, Gloss Black window surrounds and unique grille appliqué forecast a truly exhilarating driving experience, while the standard 19-inch 5-hole aluminum wheels with colored brake calipers make the most of Giulia’s considerable talent. For those who take the game of driving very seriously, Giulia Ti Sport brings back the thrill.

GIULIA TI LUSSO  It stands with a confidence that is at once carefully calculated and entirely natural. The lines of Giulia Ti Lusso are so exquisitely drawn that the attitude they project is simply second nature. This is stunning Italian style based on brilliant technical architecture, marked with memorable design features: the signature “Trilobe” grille is sculpted within the front fascia, while its “drop-shaped” profile recalls classic Alfa Romeo design. Bi-xenon headlamps exemplify Giulia’s advanced technology and 18-inch 10-spoke aluminum wheels assert themselves in both look and feel. Overall, Giulia Ti Lusso is a place where driving dynamics and refinement complement each other in the best possible way.

GIULIA QUADRIFOGLIO  Bearing the legendary four-leaf clover badge, symbolic of race and street performance engineering, the Giulia Quadrifoglio embodies the essence of Alfa Romeo’s motor-sport legacy. With machines that bear more than a resemblance to the racetrack champions that came before them, Giulia Quadrifoglio announces its dominance with a unique Quadrifoglio grille and distinctive front and rear fascias that help to achieve unsurpassed aerodynamics (0.32 Cd). A segment-exclusive carbon fiber active aero front splitter helps the Giulia Quadrifoglio achieve maximum aerodynamics. Advanced lightweight materials further enhance performance and looks, including a carbon fiber rear spoiler, carbon fiber rocker moldings and 19-inch Quadrifoglio wheels. A dual-mode quad exhaust system with chrome tips sums the entire experience up with the signature Alfa Romeo exhaust note. Clearly this is an Alfa Romeo that doesn’t take legend lightly.
The ferocious roar, the immediate throttle response, the agile steering, the harnessing brakes — intense sensory feedback like this is something only Italy can create. The passion that flows from Giulia Quadrifoglio can only come from the unhindered efforts of a specialized design and production team with relentless dedication. With peers that have long leaned solely on technological talents, this latest four-door marvel breaks away from the crowd with a spirited yet perfectly balanced approach to high-performance driving. Giulia Quadrifoglio: conquering one sense at a time.

EXPLICITLY RATIONAL.
DELIBERATELY POWERFUL.
A COCKPIT WHERE ENGINEERING TAKES FLIGHT
GIULIA QUADRIFOGLIO shown in Black Leather/Alcantara® trim with Red Accent Stitching.
A FOUR-PIPE SYMPHONY
Giulia Ti Sport stirs up the adrenaline with athletic talents that reward drivers at every turn. Its flat-out performance exceeds the high expectations its fierce cladding suggests: Sport front and rear fascias, available 19-inch 5-hole aluminum wheels and three-season performance tires help deliver on a visual promise. Playing to the crowd, Giulia's dual exhaust is showcased within an aggressive sport fascia. Its Formula 1™ inspired flat-bottom steering wheel with push-button start brings out the extraordinary direct-steering feel of the chassis, and puts every road in hand.
With Giulia Ti Sport, delivering 110 percent is no cliché — and the Sport Package only enhances its overachiever tendencies. Look forward to Sport leather seats, power bolsters and adjustable thigh support, Gloss Black window surrounds, Sport leather-wrapped steering wheel, bright aluminum pedals, steering column-mounted aluminum paddle shifters and colored brake calipers.

Eyes are truly the window to this restless soul. Bi-Xenon projector headlamps with LED daytime running lights exude its highly competitive nature with a furrowed expression and laser-sharp focus.

An integrated rear diffuser, unique to Giulia Sport, helps channel air and provide additional stability at high speeds, while a Sport fascia neatly integrates the dual-mode exhaust tips for a precise aesthetic.

Sport packages feature 18-inch or 19-inch Alfa Romeo signature wheels. The 19-inch Bright 5-hole aluminum wheels radiate the athletic prowess of Giulia Ti Sport.
With Ti Lusso, Giulia steps up its Italian propensity for high style. This is a performance sedan whose competitive side extends to creature comforts. Giulia Ti Lusso offers amenities that both anticipate and surprise in a way that treats every occupant as an distinguished guest. Materials are exhaustively vetted; craftsmanship is vigorously scrutinized, to a degree that makes its superiority plain to even the most discerning. For those lucky enough to travel in a Giulia Ti Lusso, every sense will be rewarded.
The interior of Giulia Ti Lusso is striking for its combination of materials: surfaces are found in genuine wood, light walnut or dark gray oak, and full-grain leather. They surround the all-new 8.8-inch integrated widescreen Information and Entertainment System. It offers an intuitive yet sophisticated series of features, including available vehicle performance pages and navigation.
Nature inspires design of the highest order, and it’s well-represented in the Ti Lusso with genuine walnut or dark oak wood trim. Revel in luxury leather with Cannelloni design seats, front power 12-way seats including 4-way lumbar and driver memory, luxury leather-wrapped steering wheel, leather-wrapped dash with accent stitching and leather-trimmed interior accents. This is distinctive Italian craftsmanship that puts high luxury at ease.

The spacious rear seating of Giulia Ti Lusso embodies the best of Italian style via luxury leather with unique Cannelloni leather seat design.

With the available dual-pane sunroof, Giulia effortlessly adds new dimension to the driving performance.

Materials are selected to be in full harmony of each Giulia model and to uphold the completely distinctive tradition of Italian craftmanship, including the finest Italian leather with meticulous accent stitching.
PASSION IS WHAT YOU FEEL INSIDE

DREAMS INTO ACTION  While the Ti Lusso, like all Giulias, is crafted with the driver in mind, special attention is paid here to provide both host and guests with a level of luxury and comfort that will impress long after the journey’s end. In every detail, designers made choices based on their own highest aspirations.
Giulia is more than eager to show its report card. The vehicle performance pages offer useful data that track tire pressures, engine oil, service visits and much more.

With navigation, drivers anticipate every turn and real-time route conditions with advanced graphics that offer quick, easily interpreted views of roads and surrounding buildings.

Like having an extra set of eyes on the subject, drivers get a better view of what lies behind with the Back-Up Camera with dynamic gridlines, standard on every Giulia. Screens also display music, radio and other essential information.

Alfa Romeo’s fabled racing history was built on communication among driver, crew and car. Today’s Giulia communicates instantly with a high-definition 6.5-inch or 8.8-inch integrated widescreen Information and Entertainment System, intuitively navigated with its rotary controller.

A WIDER VIEW
PREMIUM AUDIO SYSTEM BY HARMAN KARDON® Giulia drivers are quite naturally attuned to a certain level of performance, so Giulia offers an audio system designed to complement a highly tuned driving experience. Known for its detail-rich acoustics through enhanced sound control and superior high sound output, this Harman Kardon system is built specifically for Alfa Romeo Giulia to optimize the vehicle’s acoustics. Its 900-watt, 12-channel class-D amplifier and Logic 7® sound technology distribute clear sound through a system of 14 premium speakers and subwoofer. It all serves as proof that Alfa Romeo takes the notes from its sound system as seriously as it does the glorious ones produced from its engine.

harman/kardon
By Harman
Each speaker achieves its dynamic sound quality via highly refined material development and precision assembly.
Sophisticated approaches to tracking potential hazards and navigating harsh elements have transitioned from air to land — as impressively demonstrated by the Alfa Romeo Giulia. Beyond advanced structural design and materials that create barriers for occupants, Giulia is equipped to deliver visual, audio and engineering prompts that help elevate driver awareness and performance. In short, this is confidence that’s built-in.

**THE EVOLUTION OF AWARENESS**

**Air Bag System** Giulia features a standard comprehensive system that includes: driver and front-passenger dual advanced air bags, seat-mounted side air bags (pelvic-thorax), inflatable knee air bags, plus supplemental front and rear side-curtain air bags.

**Blind Spot Monitoring** This available system has dual ultra-wideband radar sensors which aid the driver when changing lanes (and when vehicles are in the blind spot) via an illuminated sideview mirror icon.

**Cross-Path Detection** is activated any time the vehicle is in Reverse. With illuminated icons on the sideview mirror, as well as an audible chime, this available feature lets the driver know vehicles are crossing behind.

**Back-up Camera** and **Rear Park Sensors** with dynamic grid lines are standard on all Giulias which include Rear Park Sensors, as well. **Front Park Sensors** are standard on Giulia Ti and Giulia Quadrifoglio.

**Lane Departure Warning** (LDW) Drivers benefit from this available feature that emits an audio and dash light visual warning during an inadvertent lane departure. It works to remind the driver to stay the course.
