La meccanica delle emozioni

ALFAROMEOUSA.COM
Etched into the mountainous Northern Italian border stands a rite of passage for those entering Italy by road. Forty-eight hairpin turns at 9,000 ft above sea level present a challenge only the bravest driver, equipped with the finest machine, would dare to conquer in order to reach the epicenter of automotive performance, design and style. Inspired by the immensity and grandeur of the Stelvio Pass, the dreamers of Milan, the engineers of Modena and the artisans of Cassino have created the optimal vehicle for those demanding the highest level of performance and utility in equal measure. This is Stelvio. An SUV only Alfa Romeo could create.
From past to fast

It began as a simple request for good luck and ended up becoming a symbol of something even greater: track records and race victories from Alfa Romeo and the drivers who championed them. In 1923, legendary Alfa Romeo race car driver Ugo Sivocci wanted to break a string of second-place finishes. To prepare for the legendary Targa Florio race through the mountains of Sicily, Sivocci painted a white square with a “Quadrifoglio,” or four-leaf clover, on the front of his Alfa Romeo RL Targa Florio. As luck would have it, he won the race. Weeks later, Sivocci was track-testing a new car that did not yet bear his lucky symbol. Tragically, he crashed and lost his life. This marked the beginning of a tradition: all future Alfa Romeo race cars would bear the four-leaf clover on a white triangle instead of a square—with the missing corner symbolizing the loss of Sivocci. Today, Sivocci’s clover remains a symbol of race-worthy capabilities and, of course, a symbol of good luck.
Since 1923, Alfa Romeo has bestowed the Quadrifoglio symbol on its most powerful race and street vehicles. Placed front and center on highly expressive V6 Twin Turbocharged engines, it marks the auto industry’s most iconic celebration of Italian performance.

The force of a legend
It makes a breathtaking first impression, and every part of it lives up to that very powerful visual promise. Alfa Romeo’s first entry into the SUV segment, the Stelvio design stays true to the Alfa Romeo tradition of mixing heritage, speed and beauty. Special attention was paid to muscular proportion and fluid lines: there is true strength in simplicity and craftsmanship. The Stelvio’s outline develops from its signature Scudetto grille to a steeply raked, aerodynamic rear hatch. Artful surfacing creates the vehicle’s muscular sides that further convey its high-performance capability. Stelvio is a true Italian SUV.
2.0L Turbocharged 4-Cylinder Engine

- Top speed: 144 mph
- 0–60 mph: 5.4 seconds
- 306 lb.-ft. of torque between 2,000 and 4,800 rpm
- 280 horsepower

*A note about this brochure: all disclaimers and disclosures can be found on pages 56 and 57.

2.9L Twin-Turbocharged V6 Engine

- Top speed: 177 mph
- 0–60 mph: 3.9 seconds
- 443 lb.-ft. of torque between 2,500 and 5,500 rpm
- 505 horsepower

*Note: This is the performance data for both engines. The values may vary based on specific conditions and driving modes.
The long-standing tradition of Alfa Romeo powerplants includes the 316i’s 3.0-liter V6: a multi-fuel engine that utilizes electrohydraulic valves for more dynamic and direct variable-valve-lift system. The revolutionary system controls both intake and exhaust valves, creating a more precise and efficient combustion. Incredibly, power is improved by 15 percent, torque is increased by 10 percent; while emissions, up to 10 percent, are reduced an impressive 20 percent. This engineering is symbolic of Stelvio as a whole, with its win-win, no-compromise solutions that improve performance.

For those who have gained a high level of respect and admiration, reinvention is the key to longevity. Alfa Romeo continues its formidable track record of class-leading innovation, most notably under the hood. Stelvio drivers benefit from award-winning engine technology that is born from the minds of motorings most passionate designers.

Alfa Romeo’s Stelvio is a vehicle in a whole new generation that represents the very best in all-aluminum engine design technology. Nuovo Quadrifoglio delivers race-exceptional 525 hp* and 443 lb.-ft. of torque! It’s born from the remotest, powerful combination engine ever created by Alfa Romeo: an all-aluminum 3.0L twin-turbocharged V6 engine. Quadrifoglio’s V6 engine produces 525 hp* at 6,500 rpm and 443 lb.-ft. of torque at 1,750 – 5,500 rpm. With Stelvio and Stelvio Ti, acceleration here is into excitement with class-leading 0-60 mph in 3.9 seconds and zero to 60 mph in 3.87 seconds. (With Stelvio and Stelvio Ti, acceleration here is into excitement with class-leading 0-60 mph in 3.9 seconds and zero to 60 mph in 3.87 seconds. In turn, are reduced an impressive 20 percent. This engine is symbolic of Stelvio as a whole, with its win-win, no-compromise solutions that improve overall performance.

The transmission has a lock-up clutch to give the driver a powerful, feeling-of-in-gear acceleration once the gear is engaged. Depending on vehicle make-up, the Alfa Romeo Drivelogic 8-speed (Drivelogic 6-speed Selectable) transmission optimizes shift mapping, throttle response and shifting comfort. With its all-wheel advantages, Q4 AWD creates unparalleled driver confidence in every environment, including the unique challenges of everyday driving.
ALFA DNA DRIVE MODE SELECTOR

Thanks to the interaction with the Chassis Domain Control (CDC), Alfa DNA and Alfa DNA Pro Drive Mode Selector (exclusive to Quadrifoglio) instantaneously adapt the behavior of the vehicle to the selected driving mode:

- **RACE** activates the overboost function for increased torque for maximized performance.
- **DYNAMIC** delivers sharper throttle response, enhanced steering feedback and performance shift mapping for sporty on-road driving.
- **NATURAL** is a comfort setting for a perfect balance in daily driving.
- **ADVANCED EFFICIENCY** is engineered for maximum fuel economy. On Quadrifoglio, it includes cylinder deactivation.

**Alfa DNA: seamless transformations**
Stelvio excels at high-lateral acceleration by forming a near-perfect footprint, thanks to its front double-wishbone suspension. Its semi-virtual steering axis guarantees rapid, accurate steering. The rear suspension uses a four-and-a-half-link system — patented by Alfa Romeo — representing the best combination of lateral grip and comfort level, even on rugged road surfaces.

**STopping Power: Integrated Brake System (IBS)**

Stelvio introduces advanced braking technology previously unheard of in an SUV: the innovative Integrated Brake System. This electromechanical system combines stability control and other traditional brake system components into one unit, providing the power to rein in all that Stelvio dishes out. Pedal feel is heightened, resulting in precise feedback while exercising Anti-lock Braking System (ABS) vibrates; response time is instantaneous, making for impressively short braking distances. Clearly, this is an SUV that takes sport seriously.

**CLASS-Exclusive Carbon Fiber Driveshaft**

The ideal power-to-weight ratio of Stelvio is the outcome of lightweight, high-tech materials, such as carbon fiber for the driveshaft and aluminum for the engines, suspension systems, hood, doors and liftgate. These elements enhance Stelvio’s overall balance, providing excellent precision and performance — a guarantee of exceptional handling even in extreme conditions.

**The Intrinsic Value of AWD**

Stelvio features the multi-talented Q4 All-Wheel-Drive (AWD) system, which cleverly delivers the advantages of all-wheel drive, plus the performance and driving pleasure of rear-wheel drive. All-weather confidence begins with the CDC (Chassis Domain Control), manages and integrates all the active systems of the SUV by optimizing performance and stability. The Active Transfer Case (ATC) with advanced active clutch technology continuously monitors road conditions to deliver ideal torque distribution. In normal conditions, Q4 can send 100% of the torque to the rear axle, acting like a rear-wheel-drive vehicle; as the tires approach their grip limit, the system can transfer up to 60% of the torque to the front axle for ultimate responsiveness and stability.
WITH AN EXTREMELY STUNNING VEHICLE LINEUP, THE FEATURES AND PACKAGES OF STELVIO RANGE Far and wide — EACH MODEL FINDS ITS OWN WAY TO TRULY IMPRESS BOTH DRIVERS AND PASSENGERS. EVERY STELVIO MODEL CLAIMS IMPRESSIVE PERFORMANCE STATISTICS, ROUNDING OUT ITS CONSIDERABLE ABILITIES WITH A MIX OF SPORTINESS, SOPHISTICATION AND CRAFTSMANSHIP. STELVIO IS AN SUV THAT HAS IT ALL, INCLUDING CUSTOMIZABLE CHOICES DESIGNED TO PERFECTLY MATCH YOUR PREFERENCES.

STELVIO
This is a vehicle that starts out where most vehicles end up. From stem to stern, Stelvio is equipped to impress right from the get-go. It starts with standard 280 hp1 and 306 lb.-ft. of torque1 from its all-aluminum 2.0L Turbocharged 4-cylinder engine. It’s paired with an advanced 8-speed automatic transmission with fast and smooth shifts that make even the most seasoned racers. The standard Q4 AWD system encourages adventure, while its 18-inch aluminum wheels with 235/60R18 run-flat all-season tires garner glances from enthusiasts and admirers alike. Intelligent Bi-xenon headlamps with Adaptive Front Lighting offer advanced functions, while LED Daytime Running Lights (DRLs) and taillamps attract the right kind of attention. Stelvio reveals its racing DNA with accents like dual-chrome exhaust tips, brushed-aluminum window surrounds and brushed-aluminum roof rails. The sport-tuned suspension, standard with the Sport Package, brings driving to a whole new level.

STELVIO TI
The Ti takes Stelvio to a more expressive and personalized place, allowing drivers to opt for either performance or luxury amenities. Sharing much of what the well-appointed Stelvio offers, Ti takes measures to assert its own personality, starting with 19-inch aluminum wheels with 235/55R19 all-season tires. The Ti indulges drivers with heated front seats and a heated steering wheel. The Ti Sport Package revs things up even more with 20-inch Sport aluminum wheels with 255/45R20 all-season tires, Gloss Black window surrounds and Black roof rails, and your choice of premium painted brake calipers (Red/Black/Yellow). Alternatively, the Ti Lusso Package adds rare refinement with either genuine Dark Gray Oak or Light Walnut wood interior trim, a luxury leather-wrapped steering wheel, and 12-way power front seats including 4-way lumbar support and luxury leather with Cannelloni design.

STELVIO QUADRIFOGLIO
For those who are rarely satisfied, Stelvio Quadrifoglio delivers an unparalleled driving experience. Marked with the four-leaf clover badge reserved for Alfa Romeo’s most powerful machines, Stelvio Quadrifoglio boasts best-in-class 505 hp.1,2 A checklist of high-performance features complement its power: 20-inch Dark 5-hole aluminum wheels with front 255/45R20 and rear 285/40R20 high-performance tires, Quadrifoglio front and rear fascias and dual-mode quad exhaust. Power for control has never been more personal with the 4-mode Alfa DNA Pro Drive Mode Selector, featuring Race Mode. A Twin-Clutch Rear Differential optimizes traction. Quadrifoglio also utilizes Torque Vectoring to control wheel spin by optimizing the power distribution between wheels with traction — so there’s no loss of power, just greater traction and controlled cornering. Stelvio’s Integrated Braking System (IBS) ensures a near instantaneous response for reduced braking distances. To intensify the thrill while stepping up safety, the available carbon ceramic Brembo® brakes are designed and engineered for the track.
With the all-new Stelvio Quadrifoglio, Sivocci's clover becomes a new symbol of race-worthy capabilities among SUVs. It’s impressive across the board—505 horsepower and 443 lb.-ft. of torque that help produce a top speed of 177 mph and 0–60 in 3.9 seconds. For Alfa Romeo, speed and handling are never sacrificed for utility.
STELVIO QUADRIFOGLIO, BRED TO BE SECOND TO NONE

0-60 in 3.9 seconds¹

The best arrivals begin with a great departure.
FOR THOSE WHO VALUE SUBSTANCE AND INTEGRITY, STELVIO DELIVERS. DESIGNERS CONSIDERED EVERY ASPECT OF THE DRIVER EXPERIENCE, AMPLIFYING ITALIAN STYLE, CRAFTSMANSHIP AND MATERIALS. THE EXPERIENCE BEHIND THE STEERING WHEEL PROVES TO BE UNIVERSALLY FULFILLING. EVERY TRIP THEREAFTER IS SURE TO REVEAL THOUGHTFUL TOUCHES THAT ONLY MAGNIFY ITS CHARM.

With Stelvio, Alfa Romeo reasserts its tradition of finely crafted interiors, drawing on exquisite Italian refinements to completely redefine the premium SUV segment. Designers considered every aspect of the driver experience, using premium materials such as carbon fiber, genuine wood, leather and fabric, chosen for their tactile and visual appeal. Stelvio draws on the subtle elegance of aluminum and carbon fiber for a modern twist on Italian craftsmanship.

Colors and materials have been carefully curated to create a space that is both welcoming and exclusive. The interior of the Stelvio is a testament to Alfa Romeo’s expertise in design, with materials such as leather, Alcantara® and genuine wood chosen for their visual and tactile appeal. Stelvio offers an upscale and luxurious driving experience, with details that improve the confidence and driving pleasure for all those aboard.

The sporty seats promote an assertive driving experience. The Alfa Romeo driver-centric design philosophy is further demonstrated with a cluster of controls that are conveniently located. What’s more, the full-color 7-inch information display supplies the driver with all essential information through accessible graphics. Rotary controls serve as the driver interface for the Alfa DNA Drive Mode Selector, available Advanced Key and Apple CarPlay™ and Android Auto™. Italy is a tradition of producing exquisite leather goods, and Stelvio’s interior reflects this heritage. In the Quadrifoglio, sport seats are designed with 14-way power performance leather, including 4-way power lumbar support and power bolsters. In the Stelvio Ti, drivers can settle back in 12-way power front seats, with 4-way lumbar support and manual thigh support. The leather-wrapped steering wheel is a highlight, providing a tactile and visually appealing experience.

Natural accents lend distinctive style to the Stelvio models, whether it’s the warmth of genuine Dark Gray Oak or Light Walnut wood interior trim or the eye-catching contrast of carbon fiber. Available in the Quadrifoglio, carbon fiber interior trim adds a race-inspired look and feel. Discover genuine carbon fiber interior accents, available carbon fiber Sparco® racing seats and a carbon fiber-trimmed steering wheel as part of the Quadrifoglio offerings. Stelvio also takes its SUV duties quite seriously. The cargo area is enhanced with the available aluminum cargo compartment adjustable rail system to securely transport your gear. Stelvio approaches things from the most important perspective there is: yours.

*Late availability.
FOR THOSE WHO VALUE SUBSTANCE AND INTEGRITY, STELVIO DELIVERS. DESIGNERS CONSIDERED EVERY ASPECT OF THE DRIVER EXPERIENCE, AMPING UP ITALIAN STYLE, CRAFTSMANSHIP AND MATERIALS. THE EXPERIENCE BEHIND THE STEERING WHEEL PROVES TO BE UNIVERSALLY FULFILLING. EVERY TRIP THEREAFTER IS SURE TO REVEAL THOUGHTFUL TOUCHES THAT ONLY MAGNIFY ITS CHARM.

With Stelvio, Alfa Romeo reasserts its tradition of finely crafted interiors, drawing on exquisite Italian refinements to completely redefine the premium SUV segment. Reflecting its highly cultured birthplace, Stelvio provides a spacious and welcoming interior that is exclusive and elegant. Colors and materials have been carefully curated: premium materials such as aluminum, carbon fiber, genuine wood, leather and fabrics have been chosen for their visual and tactile appeal. Stelvio gives the driver a feeling of complete control and mastery of the road, which improves the confidence and driving pleasure for all those aboard. The sporty seats promote an assertive driving experience. The Alfa Romeo driver-centric design philosophy is further demonstrated with a cluster of controls that are conveniently located. What’s more, the full-color 7-inch information display supplies the driver all essential information through accessible graphics. Rotary controls serve as the driver interface for the Alfa DNA Drive Mode Selector and available Android Auto™ and Apple CarPlay™ systems. 3*

Italy has a tradition of producing exquisite leather goods, and Stelvio beautifully upholds that reputation. In the Quadrifoglio, drivers can settle back in 14-way power performance leather/Alcantara® sport seats including 4-way power lumbar support with power bolsters and manual thigh support. The leather-wrapped steering wheel with Red push-button start, leather-wrapped dash and upper door trim all serve as luxurious touchpoints. Stelvio Ti models offer options such as a luxury or sport leather-wrapped steering wheel, 12-way front power seats including 4-way lumbar support in luxury leather with Cannelloni design or sport leather, along with leather-wrapped dash and upper door trim with accent stitching.

Natural accents lend distinctive style to the Stelvio models, whether it’s the warmth of genuine Dark Gray Oak or Light Walnut wood interior trim or the eye-catching contrast of aluminum pedals, footrest or steering column-mounted paddle shifters. Carbon fiber goes beyond its technical advantages to add a race-inspired look and feel. Discover genuine carbon fiber interior accents, available carbon fiber Sparco® racing seats and a carbon fiber-trimmed steering wheel as part of the Quadrifoglio offerings. Stelvio also takes its SUV duties quite seriously with details that impress. Its spacious cargo area is enhanced with the available aluminum cargo compartment adjustable rail system (to securely transport your gear). Stelvio approaches things from the most important perspective there is: yours.

*Late availability.
The great passion that goes into building Stelvio is infectious: the people who drive it share an outsize zeal for life — and all the accoutrement that comes with it. Stelvio generously provides 56.5 cubic feet of free cargo space for all the things your daily adventure requires. A flexible, 40/20/40 split-folding rear seat and an available aluminum cargo compartment adjustable rail system assure everything and everyone arrive ready to go.

Properly secure all cargo.
The lines true drivers prefer

Stelvio drivers are naturally drawn to the kind of lines that keep things interesting — curves. Whether it’s hairpins or instrument panels, those lucky enough to be behind the wheel will appreciate the way Stelvio handles contours found inside and out. The view from inside the cockpit offers a natural leather landscape accented with crafted stitching that frames driver-centric details like a race-inspired steering wheel, Nappa leather seats, purposeful technology and a superior audio system. Alfa Romeo’s inaugural SUV is the ultimate expression of Italian craftsmanship.
PREMIUM AUDIO SYSTEM BY HARMAN KARDON® Designed to provide concert-like sound, the available 900-watt, 12-channel class-D amplifier and Logic 7® sound technology distribute clear sound through a system of 14 premium speakers and subwoofer. Proof that Stelvio is built to carry tunes as well as cargo.

APPLE CARPLAY™ COMPATIBILITY³ This is smarter iPhone® integration, so you will experience your favorite features through your dashboard. With Siri® all you have to do is ask — catch up on calls and messages, get directions from Apple Maps, or request a song through Apple Music. The system lets you browse music, or discover nearby gas stations, parking, restaurants and more. Plus, Maps helps predict where you’re headed.

ANDROID AUTOTM INTEGRATION³ For those who know and love Android™, Google™ goes with you with navigation 4 and “OK Google” voice detection. Just say “OK Google” to get voice-guided turn-by-turn directions, or access your favorite Google Play Music. You’ll hear your favorite songs while you stay focused and productive on the road with voice controls 5 that allow you to make calendar appointments, set timers, reply to emails and messages — and more.

Adaptive Cruise Control with Stop & Go (ACC Stop) 10
This available system helps drivers maintain a safe distance from the vehicle ahead and, under certain traffic conditions, the system can bring the vehicle to a full stop without driver intervention.

Anti-Slip Regulation (ASR) and Traction Control System (TCS)
The standard ASR limits the spin of the driving axle during a driver’s torque request in the event the adherence limit is reached, optimizing vehicle traction. Standard TCS limits the wheelspin of a single drive wheel by applying brake torque to the wheel while an equivalent amount of torque is transferred via the differential to the other wheel, providing the vehicle the torque required to drive away.

Hill Descent Control
This standard system aids the driver during maneuvers when the vehicle is on a slope, maintaining a constant speed by varying brake pressure, allowing a controlled vehicle descent.

Lane Departure Warning (LDW)
Drivers benefit from this available feature that emits an audio and dash-light visual warning of inadvertent lane departure, reminding the driver to stay on course.

Blind Spot Monitoring 6
This available system has dual ultra-wideband radar sensors that aid the driver when changing lanes and when trailing vehicles are in their blind spot, as an illuminated sideview mirror icon.

Cross-Path Detection 7
This available system is activated any time the vehicle is in Reverse. It lets the driver know when a trailing vehicle is crossing trail while the vehicle is in its path.

Back-Up Camera 7 with Dynamic Grid Lines and Rear Park Sensors 7 are standard on all Stelvio, Ti and Quadrifoglio models.

Forward Collision Warning (FCW) Plus 8
This available system provides continuous braking and brings to a full stop when an immediate collision is detected.

ALFA Steering Torque (AST)
The Alfa Steering Torque functionality helps to provide the complete braking torque (ESC in all models) and steering control and stability. In case of a difference in adherence between wheels, the ESC system orders the activation of an additional torque on the steering wheel.

Dynamic Steering Torque (DST)
ESC directs the Electric Power Steering (EPS) to produce optimal stopping stability. It provides greater stability in certain braking and dynamic situations, like a difference in adherence between wheels.

Air Bag System 9
Stelvio features a standard comprehensive system that includes: driver and front passenger dual advanced air bags and supplemental front seat-mounted side air bags (pelvic-thorax).

Dynamic Steering Torque (DST) 8
ESC directs the Electric Power Steering (EPS) to produce optimal stopping stability. It provides greater stability in certain braking and dynamic situations, like a difference in adherence between wheels.
**POWERTRAIN**
All-aluminum 2.0L Turbocharged 4-cylinder engine
280hp1 and 306 lb.-ft. of torque1

BEYOND THE WINNER’S CIRCLE
The unique aesthetic that is Alfa Romeo, derived from over a century’s worth of automotive innovation and finish-line wins, now extends beyond its four extraordinary wheels. Enthusiasts, start your collection.
