

As with any siblings, those we present here reveal very different personalities, even as they share an undeniable blood relation. The refined,

quiet power and sophistication of Range Rover. The secure, friendly confidence of Discovery. The rugged, dauntless defiance of Defender 90. ● All three share the rock-solid foundation of

steel chassis, aluminum body panels and full-time four-wheel drive. All are products of over 40 years of evolution and improvement by the world's only dedicated maker of four-wheel

drive vehicles. ● All are absolutely the finest vehicles in their class — bred from the legendary tradition of Land Rover.

# RANGE ROVER

Since its inception, Range Rover has defied conventional description. Equally at ease in the most punishing environments as in the most elegant, Range Rover is truly a vehicle without peer. The Range Rover County LWB is the first luxury sport utility vehicle to offer dual airbags as standard equipment. Furthermore, the dashboard has been completely redesigned, making the new Range Rover's Connolly leather and burl walnut interior more inviting than ever before. These refinements join previous Land Rover innovations (such as the unique computer-controlled Electronic Air Suspension) to further solidify Range Rover's legendary status as the world's most capable and luxurious four-wheel drive vehicle.

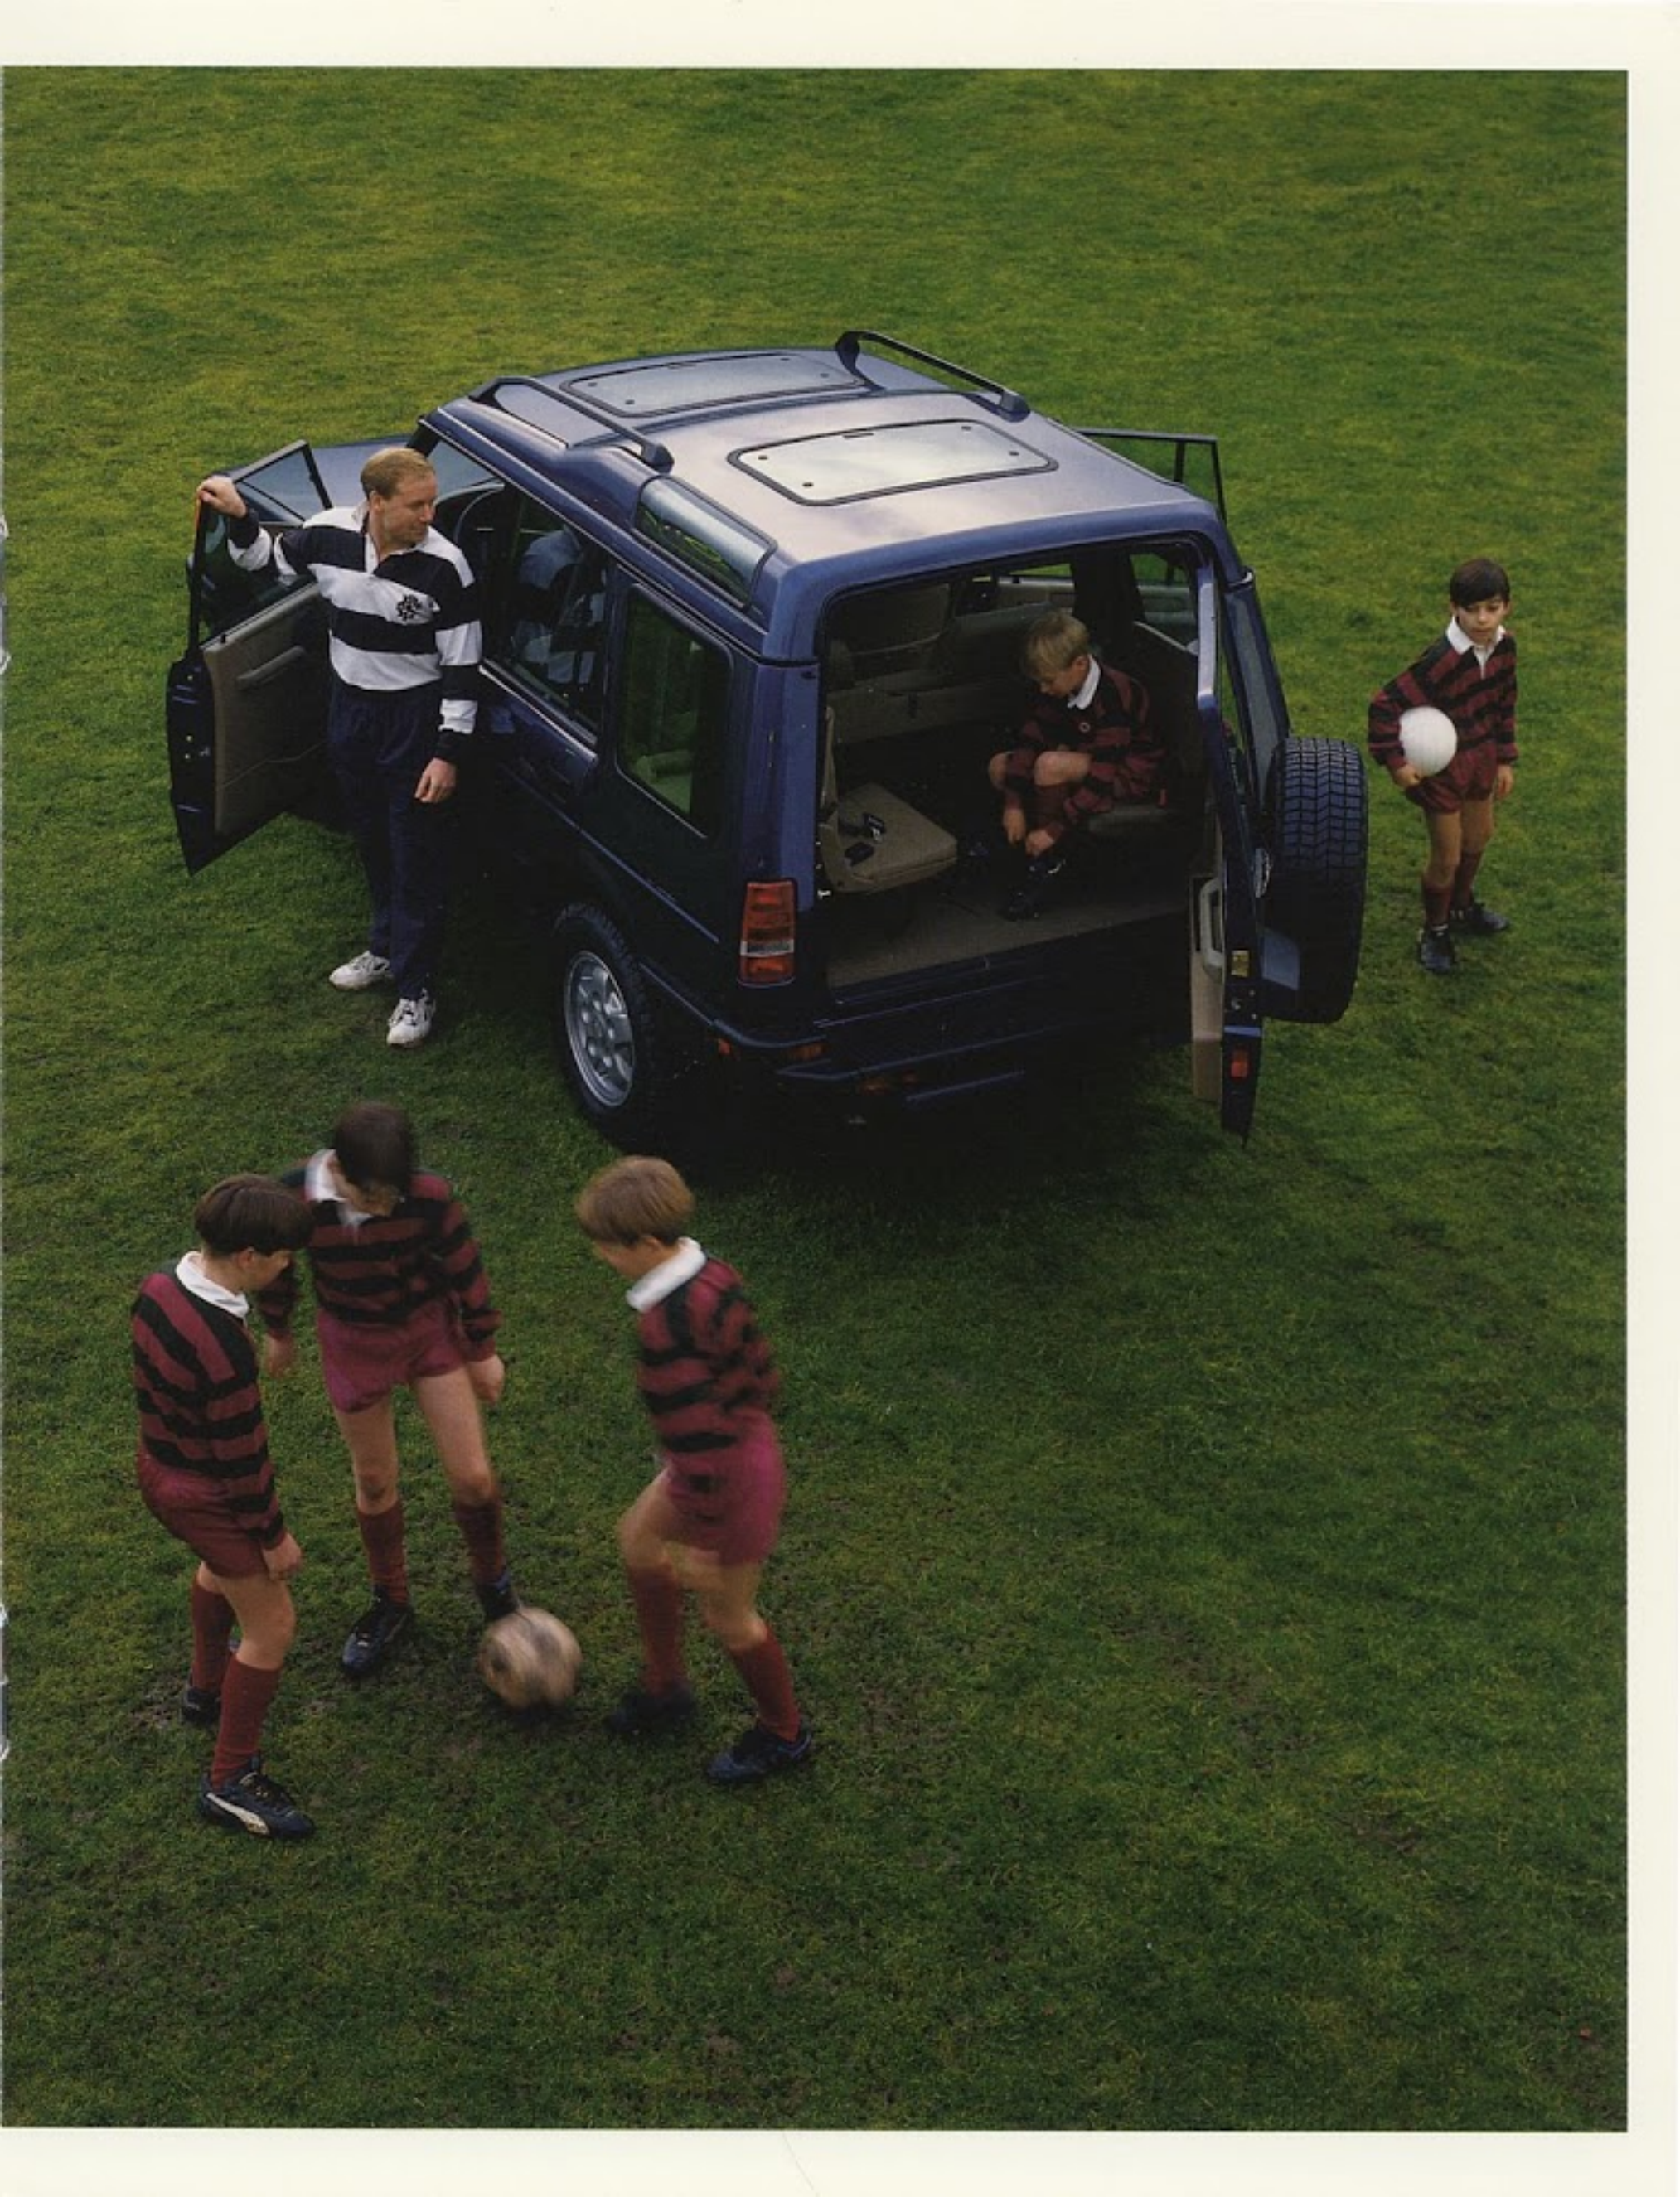

# DISCOVERY

New to the shores of North America, Discovery has proven itself to families, adventurers, emergency workers and explorers the world over. ● Bringing with it a proud inheritance of Land Rover four-wheel drive indomitability and quality of construction. ● Along with these credentials, Discovery also brings the first dual airbags of any vehicle in its class. Available seven-passenger capacity. Unprecedented airiness and visibility. And standard features like cruise control, all-terrain anti-lock brakes and a fuel-injected 3.9 liter aluminum V-8 engine. ● Discovery is, without a doubt, the definitive family sport utility vehicle.

# DEFENDER 90

The unmatched four-wheel drive heritage of Land Rover. Distilled to its purest form. The Defender 90. ● The result is off-road capability that leaves absolutely nothing to

be desired. The Defender 90's long-travel coil springs and center differential lock combine to keep all four wheels on the ground and working hard on terrain that renders other vehicles helpless. Its

steel chassis and aluminum body provide durability with a low center of gravity, while its 3.9 liter V-8 engine claws its way up mountain surfaces just

this side of vertical. ● On the road or off the pavement, Defender 90 is a no-nonsense vehicle for those who demand the best.

## SPECIFICATIONS
