ABOVE & BEYOND

Ever since the first Land Rover vehicle was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomize our brand. Vehicles with exemplary design credentials and engineering capabilities. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

THE RANGE ROVER SPORT

[BUILD YOUR OWN](#)

The Range Rover Sport is undoubtedly our most dynamic SUV ever. Performance and capability are exceptional, and a range of advanced technologies are designed to deliver an improved driving experience. With sportier design cues and a powerful, muscular stance, this is a vehicle designed to create an impression.

HSE SILVER

Featuring a host of stylish design touches, the HSE Silver delivers a truly distinctive interpretation of the Range Rover Sport. One that will never fail to delight.

Vehicle shown: Range Rover Sport HSE Silver in Lantau Bronze with optional features fitted.

Vehicles shown are from the Land Rover global range. Specifications, options and availability will vary between markets and should be verified with your nearest Land Rover Retailer.

EXTERIOR

Muscular and perfectly proportioned, the Range Rover Sport is designed to command attention wherever you take it. Every aspect of the vehicle has been designed with precision for immediate impact - its lower, sportier stance is enhanced by the revised front and rear bumpers with integrated exhaust finishers*. A dramatic, modern feel is completed by the wraparound LED headlights. This powerful, athletic vehicle is now more compelling than ever.

*Engine dependent.

INTERIOR

Luxurious, supremely comfortable and exceptionally functional, the Range Rover Sport is a driver's vehicle through and through. The signature cockpit has been extensively reimaged; every element meticulously designed and beautifully executed. Intuitive controls include the SportShift® Selector gearshift, providing the option of manual gear shifting, and flush touch-sensitive steering wheel switches.

The sense of luxury and innovation is reinforced by the revolutionary Touch Pro Duo technology, which incorporates two 10" Touchscreens* as standard. The finest materials combine seamlessly with dynamic sports detailing, such as the optional Extended Carbon Fiber veneer¹. The centerpiece is the bold intersection between the sportier horizontal elements of the instrument panel and the vertical lines of the center console. The overall clean design is complemented by the enhanced Configurable Ambient Interior Lighting² with a striking graphic light running the length of the console, and the uncluttered feel is maintained by flexible storage solutions such as the additional upper glovebox.

The distinctive Sports Command Driving Position elevates the driver to provide a heightened sense of confidence and control, giving sweeping views over the road ahead. The seats can be specified in the finest Semi-Aniline leather¹ with a Cut Diamond pattern in contemporary color combinations - including Ebony Vintage Tan and Ebony Eclipse - to ensure this vehicle looks and feels as good as it drives.

¹Optional feature. Model dependent. ²Optional feature. Model dependent. May require fitment of additional features.

*Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so.

ENGINES AND TRANSMISSION

From power and sheer driving pleasure to refinement, there is a range of engines available, and each has been optimized for specific attributes to cater for all needs. All engines are equipped with Stop/Start technology and smart regenerative charging (except P400e); this feature prioritizes the charging of the battery when the vehicle is decelerating, to capture wasted kinetic energy and helps to reduce fuel consumption.

Ingenium technology underpins the 4 and 6-cylinder engines in the Range Rover Sport range. These low-friction, all-aluminum engines have stiff cylinder blocks and twin balancer shafts to ensure inherently low levels of vibration, for smooth day-to-day performance.

8-SPEED AUTOMATIC TRANSMISSION

All engines in the Range Rover Sport are coupled with an 8-speed Automatic Transmission. With eight closely spaced ratios, the transmission ensures that you are always in the optimum gear, helping to optimize acceleration. Gear changes are almost imperceptible and shift schedules intelligently adapt to your driving style.

Vehicle shown: Range Rover Sport HST in Hakuba Silver with optional features fitted.

PLUG-IN HYBRID ELECTRIC VEHICLE

P400e uses the combination of an advanced 2.0 liter 296HP Si4 Ingenium Gas engine supported by a high-capacity 105kW electric motor, to deliver a combined output of 398HP. The electric motor can either supply its power in parallel with the engine, or drive the vehicle in the manually selectable Electric Vehicle (EV) Mode. The large 13kWh capacity battery gives the vehicle an all-electric range from a full charge, capable of managing most city commutes* with zero tailpipe emissions. Capability, performance and cutting-edge technologies are at the heart of every Land Rover vehicle. Taking our vehicles into the future, electric power now propels us into an exciting new era.

Our first ever Plug-in Hybrid Electric Vehicle (PHEV), is driven by our most innovative powertrain yet; an advanced Ingenium gas engine and electric motor combine to give a dynamic and stylish ride with full Range Rover Sport capability*. With a full electric charge, PHEV is capable of managing most city commutes. Drivers can select from two driving modes to best suit their needs.

*Please refer to the accompanying Technical Specification for full details on driveline, engine performance and fuel economy.
Vehicle shown: Range Rover Sport Autobiography Dynamic with Bright Pack in Fuji White with optional features fitted.

Parallel Hybrid Mode (Default driving mode) - Combines gas and electric drive. When in Parallel Hybrid Mode, the driver can optimize battery charge or fuel economy by utilizing two alternative charge management functions:

SAVE Function - Helps prevent the battery charge dropping below the level which has been selected.

Predictive Energy Optimization (PEO) Function - By entering a destination in the navigation system* the driver enables the feature, which utilizes altitude data for the route selected to intelligently switch between the electric motor and gas engine to optimize fuel economy.

EV (Electric Vehicle) Mode - Full electric drive*.

In addition to the benefits described, an increasing number of major cities are introducing vehicle restrictions and charges from which drivers of PHEV vehicles could be exempt.

*Parallel Hybrid Mode will be automatically re-engaged should the driver require more power and torque than is available, or the battery charge drops to an insufficient level to maintain progress.

Seamless Design

Integrating the charging port into the front grille provides easy connection without compromising the vehicle's dynamic design.

EV Range

PHEV is fully capable of managing most commutes in full Electric Vehicle (EV) Mode¹.

Refined Drive

The Range Rover Sport PHEV ensures seamless transition between the gas engine and electric motor, delivering optimal refinement.

No Compromise On Capability and Performance

PHEV is precise and uncompromising. It is fully capable of handling off-road situations such as wading² and rock crawl. Its on-road performance is equally remarkable, delivering additional power* when you need it most through a combination of electric motor and gas engine.

Cabin Preconditioning³

You can pre-heat or, uniquely to PHEV, pre-cool the cabin before you get into the vehicle without starting the engine, making life that bit more comfortable.

¹Parallel Hybrid Mode will be automatically re-engaged should the driver require more power and torque than is available, or the battery charge drops to an insufficient level to maintain progress. ²Optional feature. Wading is only available when engine is engaged. ³Optional feature.

*Always follow local speed limits.

VERSATILITY

PERSONALIZATION

Easy Overnight Charging

PHEV can fully charge from a domestic electricity supply in approximately 14 hours¹, so it's ideally suited to charging at home overnight.

Charging Solutions

A full charge can be achieved in as little as 2.75 hours¹ at home using a dedicated wall box. In addition, a range of charging points can be used at offices, stores, parking lots and other designated public charging places.

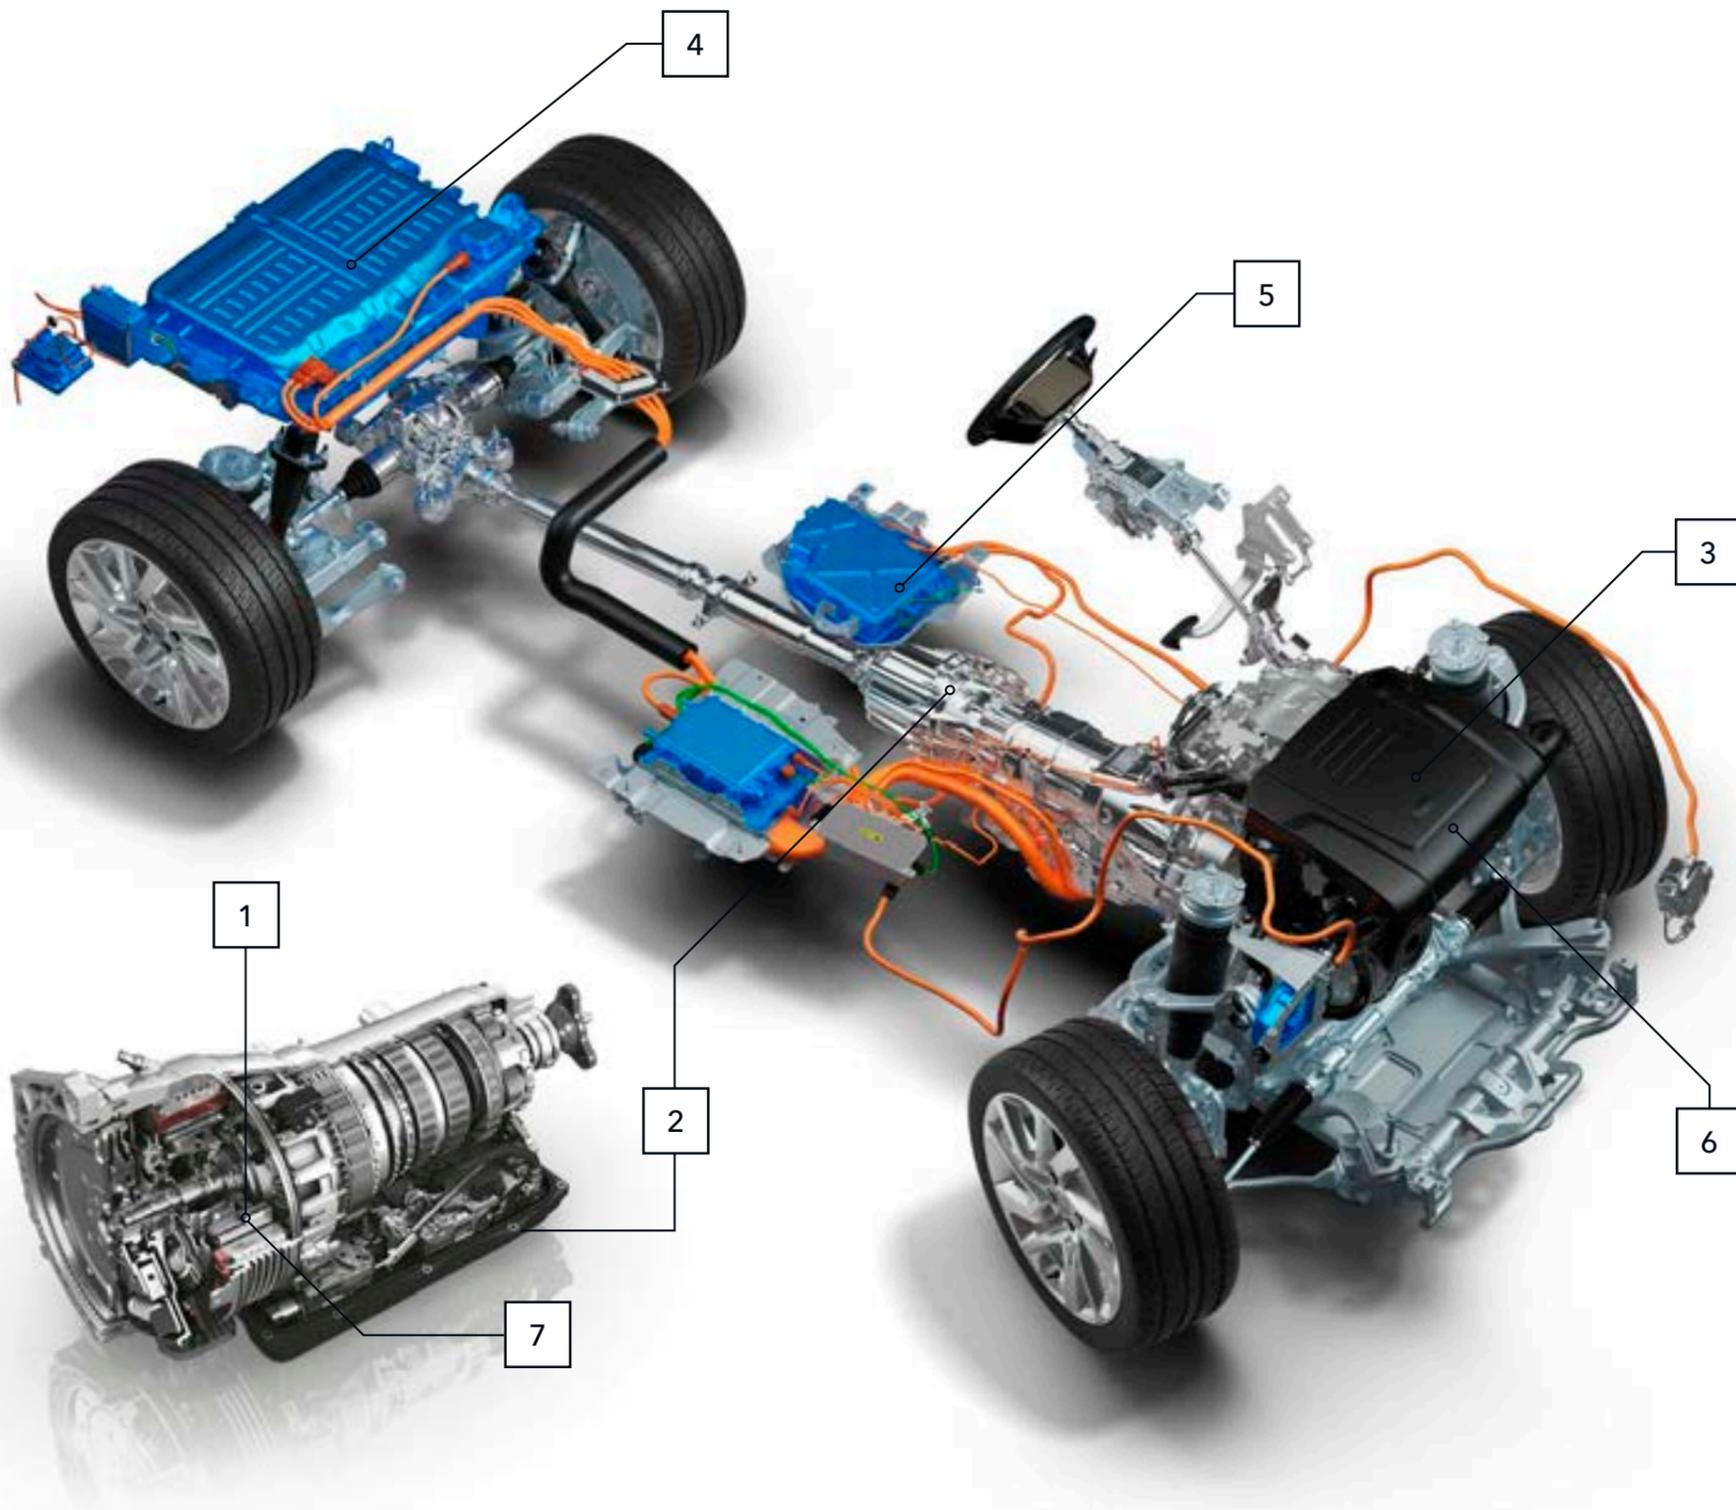

InControl Connectivity

With the Protect and Remote Premium² features, a variety of functions are available through your smartphone device, from enabling the driver to view charge status as well as controlling the charging time.

¹Charging times will vary by market, power supply and charging solution. Please refer to landroverusa.com for further information.

²Land Rover Remote contains subscription services that can be extended after the initial term advised by your Land Rover Retailer. The Land Rover Remote App will need to be downloaded from the Apple App Store/Google Play Store.

- 1 105KW ELECTRIC MOTOR**
 PHEV features a high-power 105kW permanent magnet synchronous electric motor to deliver power effortlessly.
- 2 INTEGRATED HYBRID AUTOMATIC TRANSMISSION**
 A seamless transition from EV to the Internal Combustion Engine (ICE) is delivered via the hybrid integrated transmission.
- 3 2.0 LITER INGENIUM ENGINE**
 The aluminum 2.0 liter 296HP Si4 Ingenium Gas engine is lighter and more efficient than predecessors.
- 4 13KWH HIGH-VOLTAGE BATTERY**
 The large capacity battery gives the vehicle an all-electric range, capable of managing most commutes¹ from a full charge.
- 5 7kW ONBOARD CHARGER**
 The powerful 7kW onboard charger can deliver a full battery charge in as little as 2.75 hours² dependent on charging station capability.
- 6 INTEGRATED STARTER GENERATOR**
 The Integrated Starter Generator (ISG) delivers an exceptionally refined starting of the gas engine when required.
- 7 REGENERATIVE BRAKING**
 Regenerative braking uses the electric motor to harvest kinetic energy while braking, converting it to electrical energy that is used to recharge the high-voltage battery.

¹Please refer to the accompanying Technical Specification for full details on driveline, engine performance and fuel economy.
²Charging times will vary by market, power supply and charging solution. Please refer to landroverusa.com for further information.

MILD HYBRID ELECTRIC VEHICLE

Land Rover is at the forefront of sustainable innovation. Taking our vehicles into a smarter and more exciting future, Mild Hybrid Electric Vehicle (MHEV) technology is a system that uses a belt-driven starter generator and state-of-the-art 48V battery. These harvest energy that would normally be lost during deceleration, which is then intelligently redeployed.

The stored electricity can be used by the starter generator to provide torque assistance to the engine directly, or to power the electric Supercharger to boost performance before the conventional Turbocharger reaches its maximum output, giving seamless throttle response.

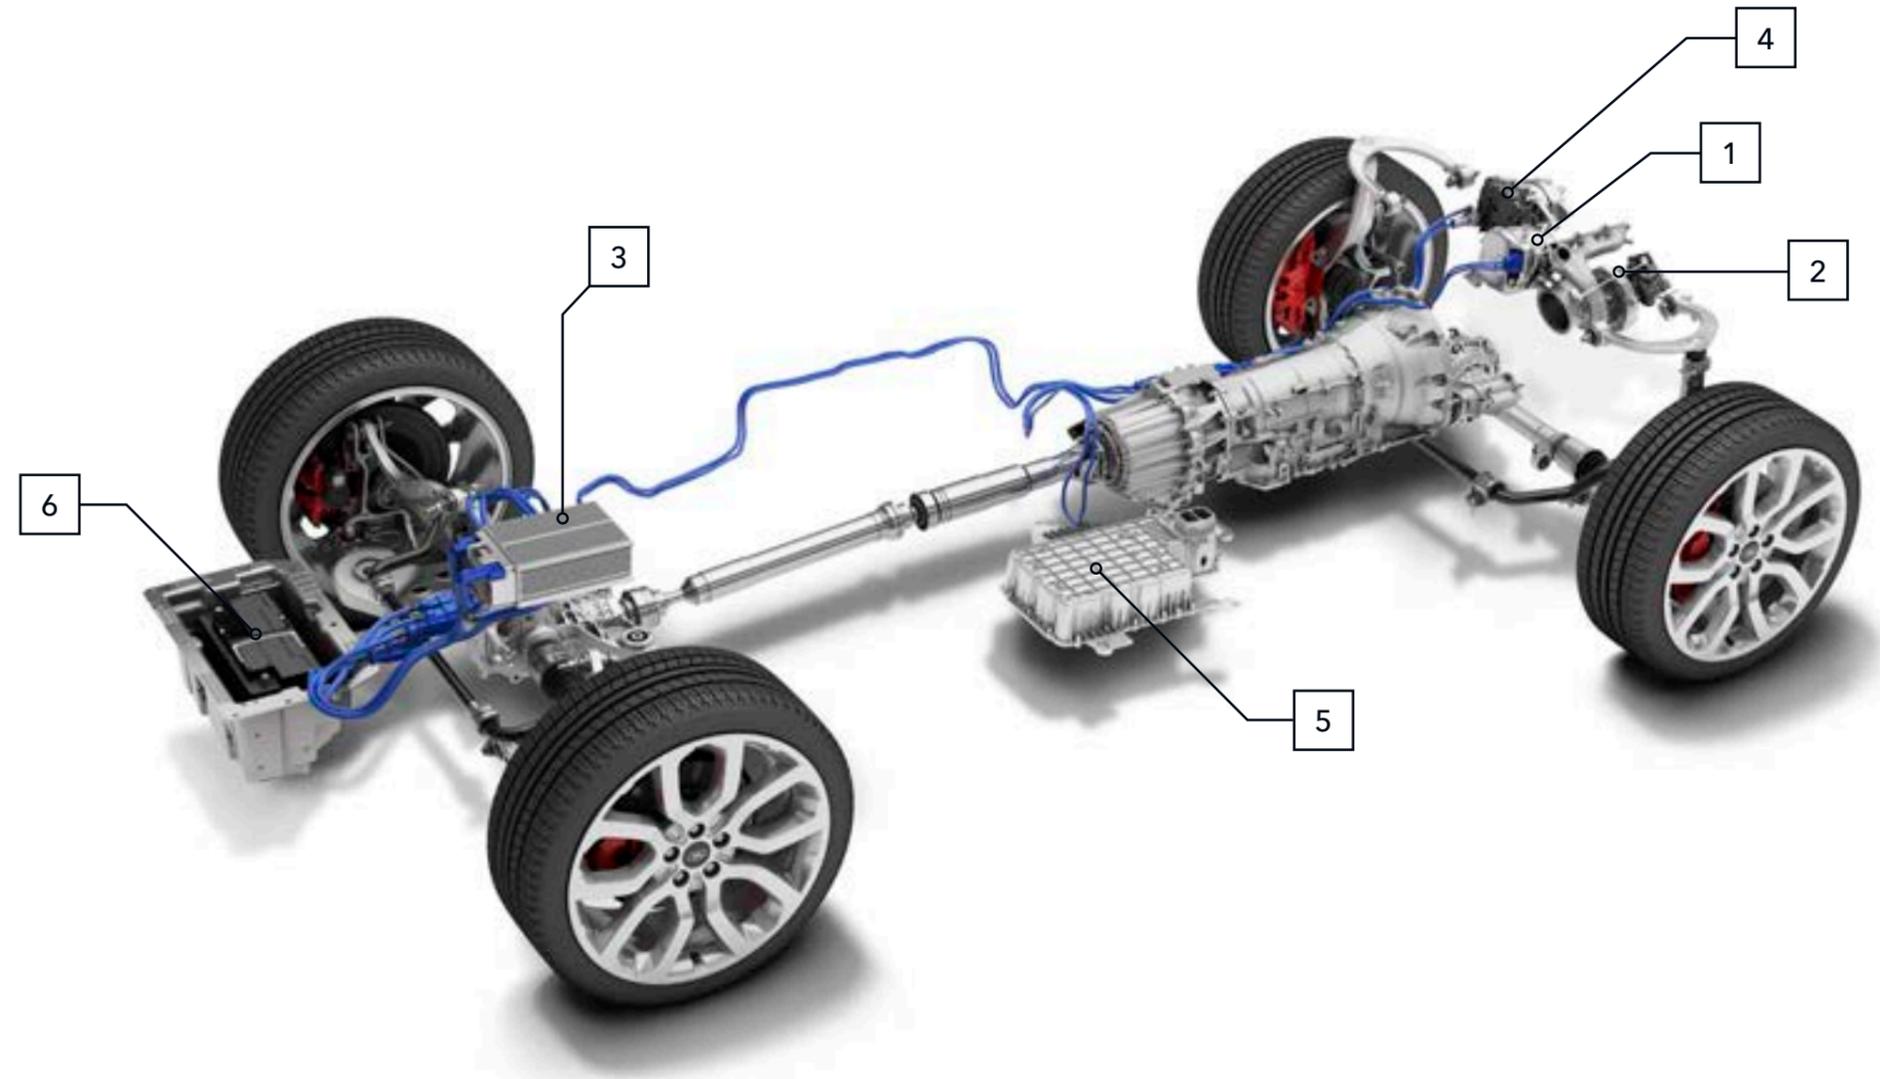

This system helps improve fuel economy and boosts the vehicle's performance. The combination of MHEV technology, together with other detailed efficiency improvements, lower the CO₂ emissions of the Ingenium inline 6-cylinder engines substantially, when compared to the outgoing engine.

The MHEV technology is standard with both P360 and P400 engines. Vehicles with the P400 engine also feature Terrain Response® with Dynamic Program and Configurable Dynamics*, as standard. These features allow personalization of the vehicle's dynamic settings, complementing the performance characteristics of the engine.

- 1 48V ELECTRIC SUPERCHARGER¹
- 2 TWIN-SCROLL TURBOCHARGER
- 3 48V LITHIUM-ION BATTERY
- 4 BELT-DRIVEN INTEGRATED STARTER GENERATOR
- 5 48V/12V DC-DC CONVERTER
- 6 12V BATTERY

PERSONALIZATION

ELECTRONIC AIR SUSPENSION

A sure-footed, composed drive is completed by the latest Electronic Air Suspension, provided as standard, which provides exceptional wheel articulation and poise. It changes the vehicle's height quickly, allowing cross-linking of the diagonal wheels to help keep all four wheels on the ground on very uneven surfaces. Added to which, it makes loading heavy objects into the cargo area easier, as you can lower the vehicle's rear suspension height by +/- 2 inches to suit your needs. This function can be operated via the 10" Touchscreen*, a button in the cargo space area or remotely using the key fob.

The Speed Lowering system uses the Electronic Air Suspension to reduce aerodynamic drag and fuel consumption at cruising speeds, by lowering the vehicle by over half an inch from normal ride height when the vehicle speed reaches 65 mph**.

TWIN-SPEED TRANSFER BOX WITH ELECTRONIC CENTER DIFFERENTIAL

An additional set of lower gears can prove invaluable in challenging conditions such as steep inclines or declines, off-road driving or when towing. The twin-speed transfer box system¹ gives you precise speed and control in such instances. The heart of the twin-speed system is the electronic center differential that offers a 50:50 torque split between front and rear axles with the ability to pre-emptively lock the axles before slip commences.

¹Optional feature. Requires fitment of additional features. ²Optional feature. May require fitment of additional features. Engine dependent.

*Driving while distracted can result in loss of vehicle control. Do not operate, adjust or view the navigation or multimedia systems under conditions that will affect your safety or the safety of others. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. **Always follow local speed limits. [†]These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

TERRAIN RESPONSE^{®†}

When you manually select Land Rover's unique standard Terrain Response system, it sets the vehicle up optimally to match the demands of the terrain, by adapting the responses of the vehicle's engine, gearbox, differentials and chassis systems. There are five manual Terrain Response settings: Comfort, Grass/Gravel/Snow, Mud and Ruts, Sand, and Eco Mode.

TERRAIN RESPONSE 2^{®†}

Terrain Response 2¹ is an option that takes the capabilities of the award-winning system to a new level. This features an automatic setting which monitors the current driving conditions and systematically selects the most suitable terrain setting. It also includes additional Rock Crawl Mode. An additional setting is available when Terrain Response 2 with Dynamic Program is specified. Dynamic Program² tunes the suspension to deliver even tighter body control with flatter handling and sharper responses. You can manually override the system should you wish.

ADAPTIVE DYNAMICS

Adaptive Dynamics¹ makes the miles go by virtually unnoticed. The system monitors vehicle movements up to 500 times a second, reacting to driver or road inputs almost instantaneously to give greater control and minimize body movement, ensuring a composed, flat ride. The system even senses off-road conditions, and enhances damping accordingly so driver and passengers arrive at their destination refreshed and relaxed*.

CONFIGURABLE DYNAMICS

To enhance either refinement and comfort or the vehicle's performance, the Configurable Dynamics² function allows you to configure the Range Rover Sport throttle mapping, gearbox shift points, steering settings and suspension to suit your particular driving needs*.

¹Optional feature. May require fitment of additional features. ²Engine dependent.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. ALL TERRAIN PROGRESS CONTROL

All Terrain Progress Control (ATPC)¹ is a system that helps you to set and maintain a steady speed in challenging conditions such as slippery surfaces, including mud, wet grass, snow and dirt roads. Operating like a cruise control system, it functions at low speed between 1 mph and 18 mph, enabling you to maintain full concentration on steering and finding a path through obstacles*.

LOW TRACTION LAUNCH

Providing you with optimum torque control when you move off from a standstill, Low Traction Launch can be activated from the Touchscreen and enhances capability in slippery conditions like wet grass and snow*.

HILL DESCENT CONTROL

The Land Rover patented Hill Descent Control (HDC®) is a standard feature. It assists the driver with controlled descents of difficult slopes. It does so by maintaining a constant speed and applying braking separately to each wheel*.

WADE SENSING² **

Unique to Land Rover, this optional system uses ultrasonic sensors in the wing mirrors to visually and audibly alert the driver if the water approaches the vehicle's class-leading wading³ depth of up to 33.4 inches. It does so by providing real-time pictorial information via the Touchscreen about its depth in relation to the vehicle and its maximum wading capability.

¹Optional feature. Engine dependent. May require fitment of additional features. ²Optional feature. May require fitment of additional features. ³Wading is only available when engine is engaged.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Driving in floodwaters or moving water should be avoided. Driving through water can be extremely dangerous. The Wade Sensing feature only detects depth of water the vehicle is in at the present time and not of water ahead or around the vehicle. Therefore, Wade Sensing cannot predict whether it is safe to proceed and cannot detect steep drops in grade around the vehicle. The driver is responsible for determining the conditions of the route being driven.

*Do not use Land Rover InControl® features under conditions that will affect your safety or the safety of others. Driving while distracted can result in loss of vehicle control.

InControl features, options, third party services and their availability remain market dependent - check with your Land Rover Retailer for local market availability and full terms. Mobile network connectivity cannot be guaranteed in all locations. Information and images displayed in relation to the InControl technology, including screens or sequences, are subject to software updates, version control and other system/visual changes depending on options selected. The Remote App will need to be downloaded from the Apple App Store/ Google Play Store.

STANDARD FEATURES

PROTECT

Land Rover Optimized Assistance - If you break down, you can make a direct call to the Land Rover Assistance team by pressing the button on the overhead console, or from the Assistance screen within the Remote smartphone app.

SOS Emergency Call - In cases where the airbags* deploy, SOS Emergency Call will automatically connect you to the emergency response team who will notify the emergency services to your location. For peace of mind, this service is provided for the first 10 years from date of purchase.

Journey Tracking - This opt-in feature can automatically record your trip history, including your route and mileage statistics. This information can be exported by email to use for expense reporting and can be imported to a spreadsheet.

Vehicle Status Check - Use your smartphone to remotely check current fuel level range, and status of door and window position and locks. See the last parked location of the vehicle and find your way back to it with on-foot directions.

VOICE RECOGNITION SYSTEM

So you can complete tasks without taking your eyes off the road, the Range Rover Sport offers intelligent voice recognition.

NAVIGATION PRO

Navigation Pro** allows you to save your favorite places, use swipe and pinch-to-zoom gestures for simple map exploration and can display a choice of either 2D or 3D crystal-clear map graphics. Navigation Pro functionality is further enhanced by Connect Pro.

*Please remember that the safety belts in a vehicle constitute the primary protection system for driver and passengers in collisions. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat. **Do not use Land Rover InControl® features under conditions that will affect your safety or the safety of others. Driving while distracted can result in loss of vehicle control.

HOW DOES MUSIC MAKE YOU FEEL?

Music has the power to change your mood, evoke memories and affect your wellbeing. It can give you tingles or make you cry. It's why music and cars go so well together. Sitting behind the wheel, listening to your favorite artist, band or composer. It's your space. Your world.

But what if you could do more than simply listen to the music? What if you could feel it, experience it, immerse yourself in it? What if you could make more of a connection with the music and enjoy a greater sense of acoustic involvement in your Range Rover Sport?

British-based Meridian™ Audio are all about the musical experience - the very sense of being there. Their award-winning, precision-engineered audio systems are built on a lifetime of research into psychoacoustics (the science of how the human brain perceives sound) to deliver a performance that is so true to life, you feel every beat, every breath.

Meridian is a registered trademark of Meridian Audio Ltd. Trifield and the three fields device is a trademark of Trifield Productions Ltd. Features and their availability may differ by vehicle specification and market.

FEEL THE MUSIC WITH MERIDIAN™

Meridian's approach to in-car audio is all about managing the sound stage; intensifying the levels of depth, clarity and realism of the music, by using a combination of advanced acoustic technology and strategically positioned speakers.

Wherever you sit in the vehicle, you'll get the same concert quality sound. Each strike of the piano, every guitar pick, horn blast, chorus and melody reveals itself with precision and texture, just as the artist intended. It's intimate, dramatic and very atmospheric - whether you're off road or stuck in rush-hour traffic.

MAKING DRIVING EASIER

From negotiating city traffic or the highway, to providing additional assistance for you and your passengers, there's a wealth of innovative technologies available; either as standard, optional or as part of an optional pack. Whichever you choose, you'll find every single feature has been designed and engineered to heighten your enjoyment of the vehicle.

STANDARD DRIVE FEATURES

Cruise Control and Speed Limiter allow the driver to maintain the current speed of the vehicle without the need for continued use of the accelerator pedal, making driving easier and more enjoyable. The Speed Limiter will also allow the driver to preset a maximum specified speed which the vehicle will not exceed. Both functions can be easily turned on or off by the driver as desired*.

Emergency Braking** can detect an imminent forward collision with other vehicles or pedestrians and can assist to mitigate the potential for a collision. If a potential frontal collision is detected, a warning is displayed to alert you to take action. A camera at the front of the vehicle monitors at speeds from 3 mph to 50 mph for frontal collisions, and 3 mph to 37 mph† for pedestrians. If a collision is still anticipated and you have taken no action, this system will apply the brakes to help reduce the severity of the possible impact*.

Lane Keep Assist is designed to detect when your vehicle is unintentionally drifting out of your lane, and to gently apply a corrective torque to the steering wheel, encouraging you to guide your vehicle back*.

¹Optional feature. Requires fitment of additional features.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Please note that if any action is taken, even minimal steering, the Emergency Braking system will assume the driver resumed control of the vehicle and the system will automatically disengage.

†Always follow local speed limits. ††Please note that if any action is taken, even minimal steering, the High Speed Emergency Braking system will assume the driver resumed control of the vehicle and the system will automatically disengage.

OPTIONAL DRIVE FEATURES

Adaptive Cruise Control¹ will keep your vehicle a reasonable distance from the one in front, should it slow or stop when you're cruising on the highway or traveling in slow-moving traffic. Should the vehicle in front stop completely, your vehicle is designed to come to a smooth stop*. In stop-start traffic, Adaptive Cruise Control will automatically resume following the car in front. The system can be activated from 12 mph up to highway speeds**.

High-speed Emergency Braking^{1††} is designed to detect when a potential frontal collision with another vehicle may occur, and displays a forward alert to warn the driver to brake. If the driver doesn't react, the vehicle will deploy the brakes in order to reduce the severity of the possible impact*. High-speed Emergency Braking is ready and active from 6 mph to 99 mph†.

Lane Departure Warning

Adaptive Cruise Control

OPTIONAL DRIVE PACK

The optional Drive Pack offers a range of features that help keep you informed. The Drive Pack includes:

Driver Condition Monitor is designed to detect if you're starting to feel drowsy, and gives you an early warning when you need to take a break*.

Blind Spot Monitor is designed to alert you to vehicles in or quickly approaching your blind spot. When a vehicle is detected, a small warning light will illuminate in the corresponding side mirror. If you apply the turn signal in the direction of the obstacle, the warning light will flash to highlight potential danger*.

Traffic Sign Recognition keeps you informed and aware on the road, by displaying speed limits and 'no passing' signs in the instrument cluster, where they can easily be seen. When activated, Adaptive Speed Limiter uses Traffic Sign Recognition information to adjust your vehicle's speed accordingly*.

Adaptive Speed Limiter uses data from the Traffic Sign Recognition system to automatically select speed limit. If the system detects the vehicle is above the speed limit, such as when entering a lower limit, the accelerator will be disabled allowing the vehicle to coast down to the limit. The driver can also apply the brakes to achieve this more quickly*.

OPTIONAL DRIVE PRO PACK

For an even more relaxed drive, the optional Drive Pro Pack contains a wide range of driver assistance features including the Driver Condition Monitor and Traffic Sign Recognition in the Drive Pack, plus:

Blind Spot Assist is designed to help mitigate the potential for a collision. If your vehicle detects another vehicle in your blind spot when you begin to change lanes, a small warning light illuminates in the corresponding side mirror and a steering torque encourages you to guide your vehicle away from the approaching vehicle*.

Adaptive Cruise Control - See previous page for description.

High-speed Emergency Braking** - See previous page for description.

Traffic Sign Recognition with Adaptive Speed Limiter

Blind Spot Assist

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **Please note that if any action is taken, even minimal steering, the High Speed Emergency Braking system will assume the driver resumed control of the vehicle and the system will automatically disengage.

PARK FEATURES

ENJOY STRESS-FREE PARKING

The Range Rover Sport offers the most advanced technologies to deliver intuitive and easy parking solutions. Whether reversing, parallel parking or getting into or out of tight spaces, these features make life easier. Available as standard, optional or as part of an optional pack.

STANDARD PARK FEATURES

Front and Rear Parking Aid helps make maneuvering even easier. When you select Reverse, or choose to activate them manually, sensors located in the front and rear bumpers are triggered. As you park, the Touchscreen display and audio feedback indicates how close you are to obstacles*.

Rear Camera provides improved visibility when reversing. Static lines representing the vehicle's outer perimeter and predicted path are superimposed on the rearward image, to make parking in tight spots as easy as possible*. This valuable parking aid also helps when hitching a trailer.

OPTIONAL PARK FEATURES

360° Surround Camera¹ uses four digital cameras discreetly placed around the vehicle, providing a 360° overhead view on the Touchscreen. With the capacity to display several different views at the same time, this helps with various maneuvers from parking by a curb, to getting in and out of tight spaces and intersections*.

Front and Rear Parking Aid

360° Surround Camera

¹Optional feature. May require fitment of additional features.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

PARK PACKS

OPTIONAL PARK PACK

The optional Park Pack assists you with maneuvering in tight spaces and in city environments, it features:

360° Parking Aid gives you assistance when maneuvering in tight spaces. Sensors located around the vehicle are automatically triggered when Reverse is selected, or can be manually activated, with a graphic appearing on the Touchscreen showing an overhead view of the vehicle. As you park, the Touchscreen display and audio feedback indicates how close you are to obstacles*.

Rear Traffic Monitor helps to warn you of vehicles, pedestrians or other hazards approaching from either side. Particularly useful when reversing out of a parking bay*.

Clear Exit Monitor helps passengers as they exit the vehicle by providing an illuminated warning in the door if an approaching hazard is detected, such as passing vehicles and cyclists*.

OPTIONAL PARK PRO PACK

The optional Park Pro Pack enables you to park and maneuver more easily in and out of tight spaces, and into traffic that is obscured by buildings or other vehicles. It includes:

Park Assist makes parking easier than ever before by helping to detect available parking spaces and assists you in parking the vehicle. At your command, your vehicle will complete the full parking maneuver automatically while you simply sit back and keep an eye on the surroundings*.

360° Parking Aid

Park Assist

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. SUSTAINABLE BY DESIGN

Land Rover is committed to producing vehicles that use more sustainable materials, produce less waste and use fewer natural resources as part of our approach to sustainable business. The development process of the Range Rover Sport has included a full life-cycle assessment and has been designed to be 85 percent recyclable/reusable and 95 percent recoverable at the end of the vehicle's life.

Our innovative design enables the use of a unique alloy in the vehicle body, made from up to 50 percent recycled aluminum derived from our closed-loop manufacturing process, retaining quality and performance but delivering lower life-cycle CO₂ emissions. Closed-loop manufacturing means taking the scrap from the body pressings process, segregating it and re-melting it back into quality sheet aluminum at our supplier, to be used again to press out body panels thereby reducing the need to use primary aluminum.

DESIGN

PERFORMANCE

CAPABILITY

TECHNOLOGY

DRIVER ASSISTANCE

VERSATILITY

PERSONALIZATION

ECO MODE

Eco Mode ensures the vehicle runs more efficiently and economically by using software to implement a range of actions, from softening the pedal on throttle and gear changes to retuning the heating, ventilation and air conditioning when in Auto Mode and switching off heated door mirrors.

LOW CO₂ TECHNOLOGIES

Range Rover Sport powertrains incorporate a variety of low CO₂ technologies such as our intelligent Stop/Start system. Mild Hybrid Electric Vehicle (MHEV) - considered the next generation of Stop/Start technology - takes this even further, as well as our latest Plug-in Hybrid Electric Vehicle (PHEV) ensuring both optimum performance and efficiency.

ENGINE MANUFACTURING CENTER

Jaguar Land Rover's Engine Manufacturing Center, where our Ingenium engines are assembled, has been built to the highest environmental standard (BREEAM Excellent) and features one of the largest rooftop solar panel installations in the UK. Comprising of no fewer than 22,600 individual panels which are capable of providing up to 6.2MW generating capacity, the panels have the capability to provide up to 30 percent of the site's energy needs.

DRIVER ASSISTANCE

With its strong, powerful stature, the Range Rover Sport provides a strong all-aluminum monocoque body, while the elevated Sports Command Driving Position provides enhanced visibility. You can see more of the road and be easily seen by other road users, providing an enhanced feeling of confidence.

It has also been engineered to include a wealth of standard features not only to protect you and your passengers, but to assist in helping to prevent accidents occurring:

Dynamic Stability Control (DSC) monitors the dynamic behavior of the Range Rover Sport, intervening to enhance vehicle stability. DSC reduces engine torque and applies braking to the appropriate wheels, to correct the vehicle's direction of travel by counteracting understeer or oversteer*.

Anti-lock Braking System (ABS) allows the vehicle to maintain traction with the road surface while braking and prevents wheels from locking - thereby retaining the vehicle's ability to steer. The system helps to shorten the braking distance*.

Electronic Brake-force Distribution (EBD) automatically varies the braking force to each axle in order to help reduce stopping distance, while still maintaining stability and the vehicle's ability to steer*.

Electronic Traction Control (ETC) enhances traction and stability by controlling wheel spin. The ETC system reduces torque to the spinning wheel, then applies braking to the wheel, if required*.

Cornering Brake Control (CBC) automatically varies the braking force to each wheel when the vehicle's brakes are applied around a corner and the limit of grip is reached. The system is designed to prevent the vehicle's wheels from locking up and skidding in this event through varying the braking force applied to each wheel*.

Roll Stability Control (RSC) is integrated with DSC and is designed to help reduce the possibility of rollover, while providing agility and ability to steer around obstacles. It monitors the vehicle motion and cornering forces to detect any potential risk of rollover. When risk is detected, braking is applied to the outside front wheel to reduce forces that contribute to rollover*.

Emergency Brake Assist (EBA) understands when you apply the brakes quickly but without the necessary force to maximize stopping performance. It boosts the brake pressure through the ABS pump to help reduce the stopping distance*.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

DESIGN

PERFORMANCE

CAPABILITY

TECHNOLOGY

DRIVER ASSISTANCE

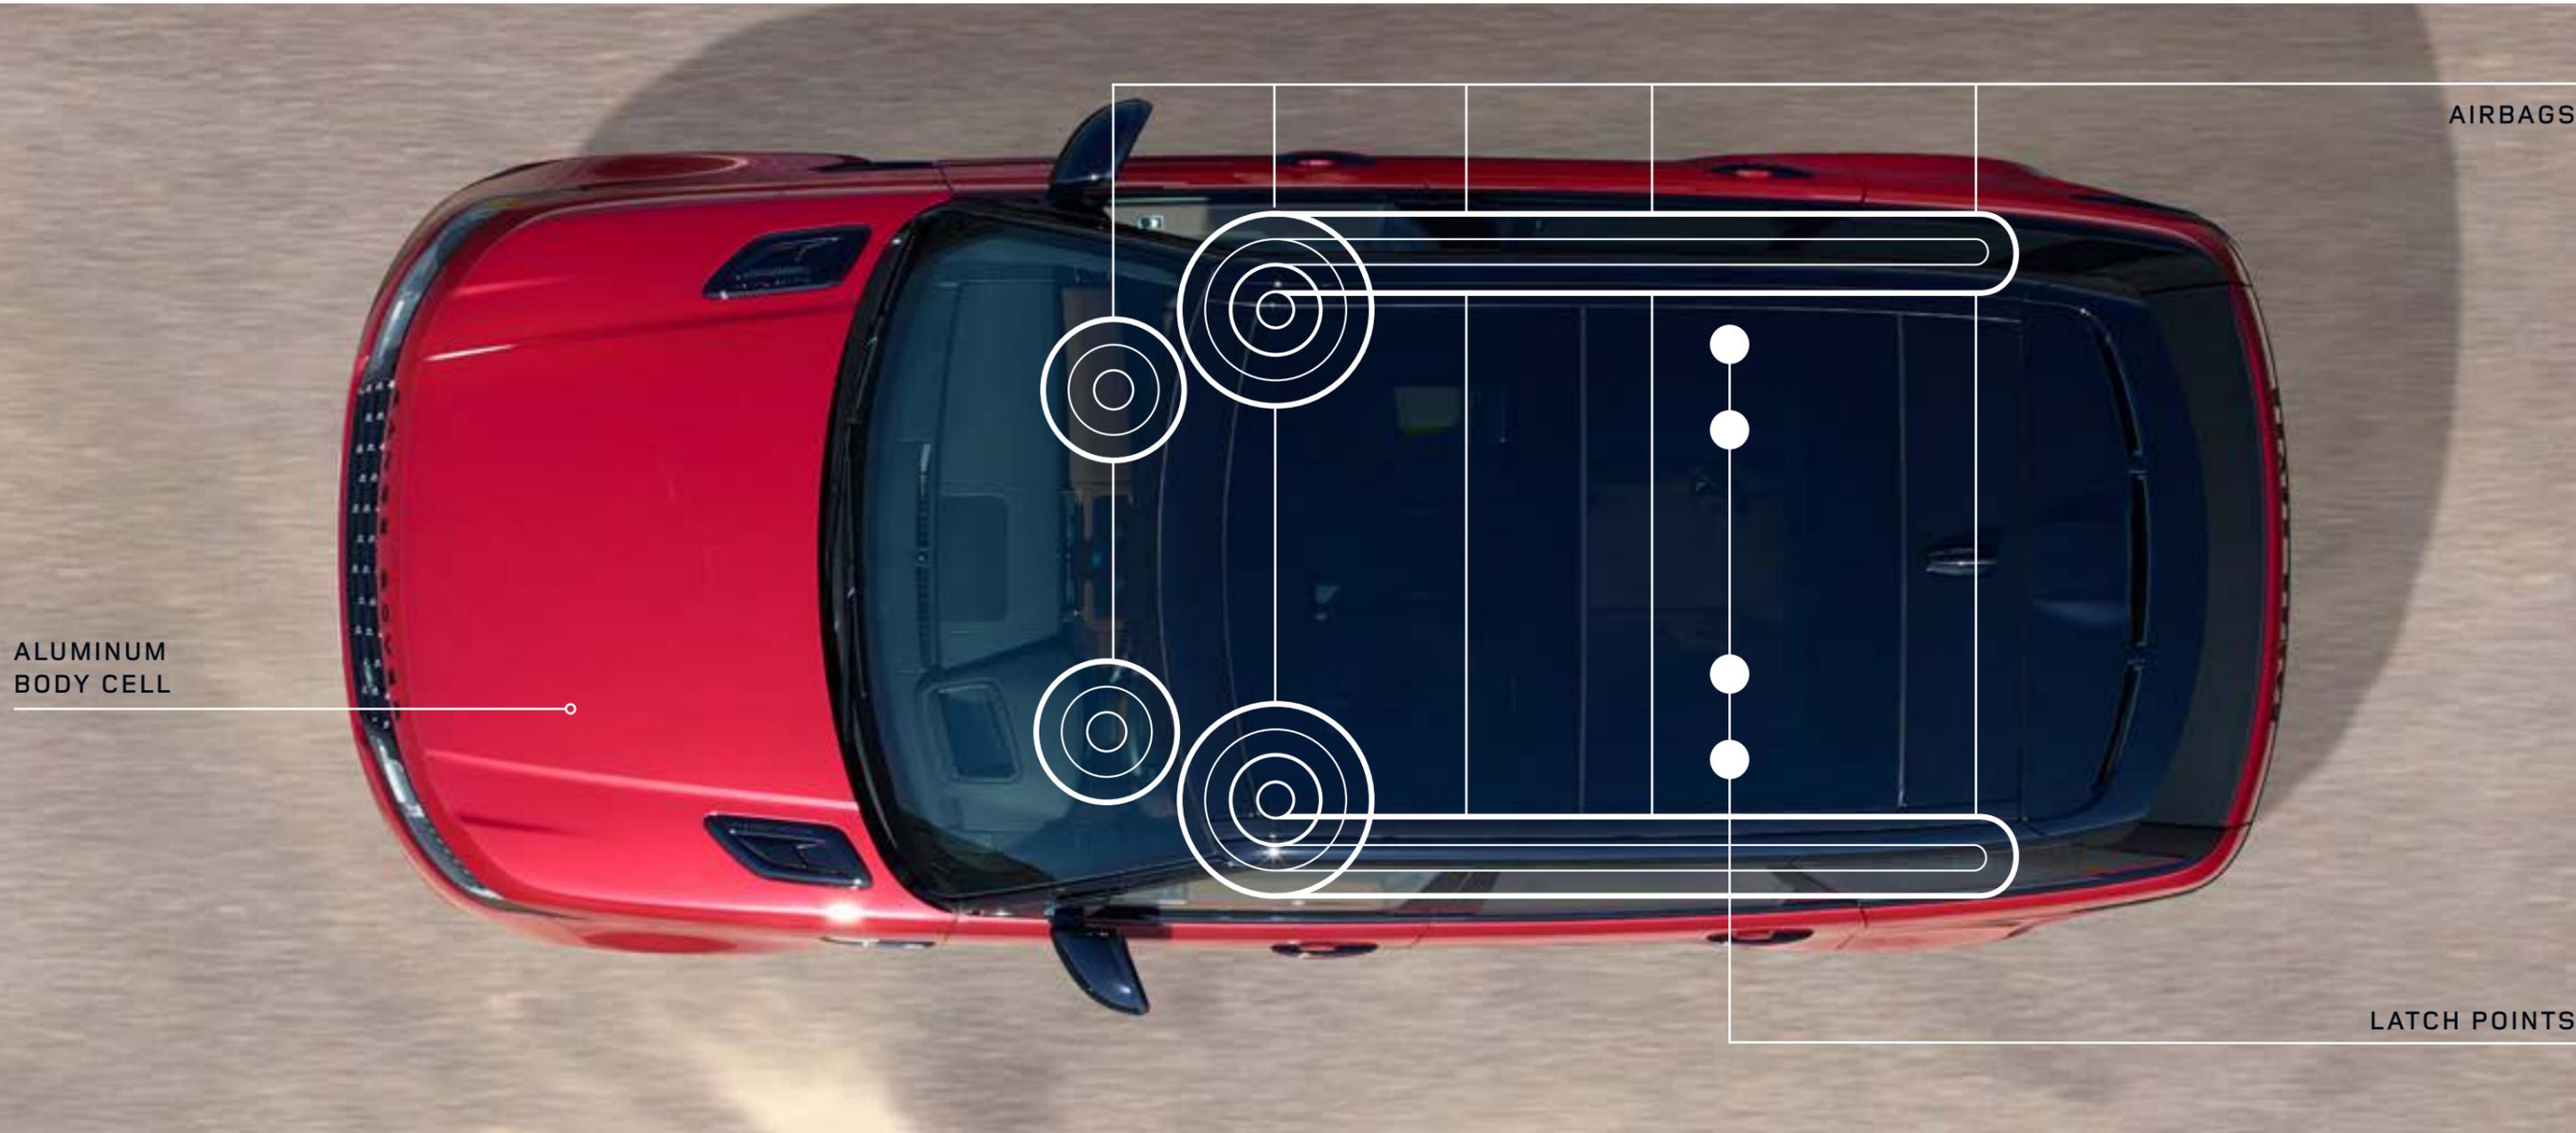

VERSATILITY

PERSONALIZATION

For easier installation, LATCH points for baby/child seat restraints on the rear seats are easy to access and additional protection is offered by seat belt pretensioners, which activate in conjunction with the Supplementary Restraint System (SRS) to provide extra protection in the event of a severe frontal impact.

They automatically reduce any slack in a seat belt to reduce forward movement. To further protect you, there is a comprehensive system of airbags including driver and passenger airbags, side curtain and thorax.

*Please remember that the safety belts in a vehicle constitute the primary protection system for driver and passengers in collisions. Airbags are not designed to deploy in all collisions. The airbag Supplemental Restraint System (SRS) is a supplement to the safety belts and is designed to work as a system with the safety belts. Although airbags provide additional protection, airbags without safety belts do not provide optimal protection in a crash. Always wear your safety belts. Children younger than 13 years old should always be properly restrained in a back seat, away from airbags. Never place an infant seat in the front seat.

LIGHTING TECHNOLOGY

The Range Rover Sport features all-round exterior LED lighting with standard features, including signature Daytime Running Lights, automatic headlights and power wash. LED lights are designed to last. Also, the quality of light produced is closer to daylight conditions, so driving at night becomes less tiring.

The Premium LED headlights can be enhanced by the optional Auto High Beam Assist¹, which turns on the main beam and lowers it when other road users are detected. This feature provides maximum light while minimizing the impact on other road users.

¹Optional feature. May require fitment of additional features.

AUTOMATIC ACCESS HEIGHT

The Range Rover Sport has the versatility to meet all your needs, while the exemplary levels of comfort are complemented by a range of innovative features which add to the convenience, luxury and ease of every journey.

Automatic Access Height, as part of the Electronic Air Suspension, allows you to get in and out of the vehicle with greater ease and elegance, as when activated, this feature lowers the vehicle by as much as two inches when the vehicle comes to a halt and the door is opened. The optional Clear Exit Monitor* provides an alert to rear seat passengers prior to them leaving the vehicle, to help prevent the door opening into approaching obstacles. The vehicle is also available with optional Soft Door Close to provide power latching on the front and rear doors.

*Optional feature. May require fitment of additional features.

INTERIOR CLIMATE

To prevent the cabin from overheating in the sun and minimize demands on the air conditioning, the auto sunblind¹ closes automatically when passengers have disembarked and the doors locked. When the vehicle is re-opened, the sunblind returns to the position prior to it auto-closing.

Optional Four-zone Climate Control helps make life more comfortable for everyone, **utilizing** a fully independent rear heating and air conditioning unit to ensure all occupants enjoy optimum comfort.

CABIN AIR PURIFICATION SYSTEM WITH PM2.5 FILTER¹

By activating the PURIFY button in your vehicle, our specially designed filter will attract and capture particulate matter (PM2.5) is an air pollutant that is a concern for people's health when levels in air are high. PM2.5 are tiny particles in the air that reduce visibility and cause the air to appear hazy when levels are elevated. The system cleanses the air in the cabin environment, reducing the vehicle occupants' exposure to the pollutants.

The nanoe™ ionisation technology enhances the wellbeing of both driver and passengers alike. It does so by ionising particles in the air, making them attract to and neutralise the air contaminants.

¹Optional feature.

BUSINESS - POWER AND STORAGE

With a flexible and contemporary interior, the Range Rover Sport is designed to enhance your business activities. With one optional 110V power outlet and five USB ports located throughout the cabin, multiple electronic devices can be charged on the go. And to ensure your cabin is clutter-free, there is increased storage space, from a recess specifically for smartphones to the upper glovebox and deep storage compartments.

The optional front center console refrigerator compartment provides the luxury of cooling drinks on demand. It can accommodate up to four 16 oz. bottles and maintain them at a temperature of 41°F, with the ability to achieve 23°F degrees for short periods to deliver rapid cooling. A border light indicates when the cooler has been switched on.

DESIGN

PERFORMANCE

CAPABILITY

TECHNOLOGY

LEISURE - ACTIVITY KEY

With the optional Activity Key you can enjoy your favorite activities, and keep your key securely in the vehicle. For extra convenience, you can strap the Activity Key to your wrist. The wristband is robust and fully waterproof, allowing you to take part in a range of activities from cycling to swimming. Simply touch your Activity Key on the tailgate (behind the letter R in the Range Rover script) to lock or unlock the vehicle and deactivate or reactivate the conventional key fob.

TAILGATE

Access to the considerable rear space is now more convenient than ever. Rear Height Adjust lowers the rear suspension by up to 2 inches when the tailgate is opened. This creates a more natural ramp angle, with the lowered rear improving both cargo space accessibility and ease of loading. The optional powered gesture tailgate allows you to open and close the tailgate from the curb without needing to touch either the vehicle or the key fob. And as the system is compatible with optional towing solutions, you can still tackle demanding situations with the least amount of fuss.

TOWING*

With a towing capacity of up to 7,716 lbs¹ and by incorporating tailored technologies, Range Rover Sport can handle some of the most demanding tasks.

TOW HITCH ASSIST

Tow Hitch Assist makes coupling a trailer to the vehicle much easier by helping you visualize the hitching process; it displays the predicted path of the vehicle tow ball towards the trailer tow bar on the Touchscreen**.

REAR HEIGHT ADJUST

Rear Height Adjust allows the use of switches in the cargo space or on the key fob to lower the rear suspension height by up to 2 inches - useful when loading or unloading cumbersome items, or when hitching, unhitching or loading a trailer.

¹Engine dependent.

*Never tow beyond a vehicle's permissible towing capacity. Please consult the owner's manual or your local authorized Land Rover Retailer for more details. **These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

TRAILER STABILITY ASSIST

Trailer Stability Assist (TSA) gives you greater stability when towing. Should TSA detect a dangerous trailer sway situation is developing, it can help you regain control by gradually reducing the speed through lowering engine power and applying the brakes individually on each side of the vehicle to help control the sway*.

TOW ASSIST

On the road, the Tow Assist feature helps with reversing by predicting the trailer's direction. You can even choose your trailer's width for precise guidelines displayed on the Touchscreen. Standard with 360° Surround Camera*.

ADVANCED TOW ASSIST

Advanced Tow Assist¹ allows you to control the direction of your trailer when reversing by using the rotary Terrain Response[®] 2 controller. The optional system will control the vehicle's steering to achieve the desired trailer trajectory*.

¹Optional feature. Requires fitment of additional features.

*These systems are not a substitute for driving safely with due care and attention and will not function under all circumstances, speeds, weather and road conditions etc. Driver should not assume that these features will correct errors of judgment in driving. Please consult the owner's manual or your local authorized Land Rover Retailer for more details.

LAND ROVER ACCESSORIES

 BUILD YOUR OWN

Land Rover Accessories can be purchased through your Land Rover Retailer and added at any stage of the vehicle's life - not just when it's new. Land Rover accessories are designed, tested and manufactured to the same exacting standards as the original equipment fitted to your vehicle. For more information and to see the full list of accessories please visit accessories.landrover.com/us/en/ You can also include accessories when you configure your Range Rover Sport at landroverusa.com

EXTERIOR STYLING

Deployable Side Steps¹ - These smart, practical steps make it easier to get in and out of the vehicle. Neatly stored under the sills, the side steps automatically deploy as soon as the door is opened, or when activated by the key fob. The side steps are sensitive to obstructions. Featuring a stainless steel finish with laser-etched Range Rover branding.

Fixed Side Steps¹ - Complete with a rubber tread mat and Brushed Stainless Steel trim, the Fixed Side Steps provide easy access/exit to the vehicle's cabin and aid access to the roof. With embossed Range Rover branding, exterior Bright work and Bright Anodized Aluminum edge trim finish.

Front/Rear Undershield¹ - The off-road inspired undershield, manufactured from stainless steel, features a premium Bright Polished finish for the front or rear of the vehicle.

INTERIOR STYLING

Sport Pedal Covers - Alternative pedal covers for an interior styling enhancement featuring a Bright finish. Manufactured from polished and etched stainless steel and features hidden fixings for a clean finish.

Illuminated Treadplates - Illuminated Treadplates with Range Rover lettering and halo surround. Rear treadplates feature illuminated halo only.

Personalized Illuminated Treadplates - Personalized Illuminated Treadplates allow you to choose a personalized message using an approved set of fonts/typefaces which will be highlighted in white illumination when the front doors are open.

Gearshift Paddles³ - Complete the look and feel of your steering wheel with premium aluminum paddles. Gearshift Paddles are machine polished, anodized and hand brushed to provide exceptional wear resistance with a premium finish.

¹Fitting of side steps may affect the off-road capability of the vehicle. ²Rear Undershield not applicable for vehicles equipped for towing. Not available on SVR. ³Requires Gearshift Paddles in base vehicle.

CARRYING

Sports Roof Box¹ - The sleek, aerodynamically designed Sports Roof Box with a Gloss Black finish, can be mounted on either side of the vehicle for curb side opening and is lockable for security.

Roof Mounted Bike Carrier^{1 2} - Roof mounted, lockable bike carrier designed for holding a single bike, up to 44 lbs.

Aqua Sports Carrier¹ - Carries a sailboard, canoe or kayak. Includes lockable multi-purpose holder to carry oars or paddles. Tilts to facilitate easy loading/unloading. Features lockable straps and rubber supports to maintain optimum weight distribution while protecting the kayak and vehicle from scratches/scuffs. Maximum load capacity 99 lbs.

Ski/Snowboard Carrier¹ - Carries four pairs of skis or two snowboards, incorporates slider rails for easy loading and is lockable for security. Maximum payload 79 lbs.

¹Roof rails and cross bars are required for all Land Rover roof-mounted accessories.

²Roof rails and cross bars will accommodate two bike carriers.

FUNCTION AND TECHNOLOGY

Tailgate Event Seating in Ebony leather¹ - The Tailgate Event Seating is handcrafted from beautiful Ebony, Windsor leather with a highly durable aluminum frame. Stored in the cargo space, these seats can be quickly and easily fitted to provide comfortable seating for two adults on the lower tailgate, when the vehicle is stationary.

Center Armrest Cooler/Warmer Box - Food and drinks cooler and warmer that acts as a rear center armrest. With a leather-covered top, it is held in place by the center seat belt and powered from the rear auxiliary socket. Ideal for long journeys with the family.

Click and Go System² - The Click and Go Range is a multi-purpose seat-back system for second row passengers. The versatile Click and Go Base fixes between the headrest mountings and further attachments can be added to hold tablets, bags and shirts or jackets. Each attachment is sold separately. The base can be easily removed when not in use.

Wireless Phone Charging Cup Holder - The Wireless Phone Charging Cup Holder has been designed to charge utilizing the cup holder space in the center console. The holder will accommodate varying phone sizes securely in place. The charger displays an LED light to indicate when charging, and turns off when complete. Fits phones up to 2.8 inches wide.

¹Not available with P400e. ²Not available on SVR. Not compatible with vehicles equipped with Rear Seat Entertainment.

PET PRODUCTS

Pet Transportation Pack - Convenient option to provide a comfortable environment for transporting pets, which can be fitted or removed quickly as and when required. Combines the Foldable Pet Carrier, Spill Resistant Pet Bowl and Cargo Space Rubber Mat.

Pet Care and Access Pack - Taking the effort out of transporting pets, this option ensures everything required is to hand to transport pets in comfort. Combines the Full Height Luggage Partition, Quilted Cargo Space Liner², Pet Access Ramp and Portable Rinse System.

Pet Cargo Space Protection Pack - Designed to provide protection and easy cleaning of the cargo space from wet and muddy paws. Combines the Quilted Cargo Space Liner², Full Height Luggage Partition and Spill Resistant Pet Bowl.

Quilted Cargo Space Liner* - This tailored liner covers and protects the cargo space floor, second row seat backs and cargo space side walls up to window height. Manufactured from a soft quilted fabric, with an integral rubber mat and detachable bumper protector, it is ideal for owners who regularly carry pets in the cargo space area of their vehicle.

INTERIOR PROTECTION

Rubber Mats - Rubber footwell mats for front and second row occupants helps provide protection from general dirt. Featuring Bright accent Range Rover ingot and durable metal corner pieces.

Cargo Space Rubber Mat - Range Rover branded waterproof rubber mat with retaining lip, helps protect the rear cargo space carpet from general dirt.

Full Height Luggage Partition - Designed to protect vehicle occupants against the displacement of luggage. Following initial retailer installation, the luggage partition can be removed with appropriate fitting tool.

*Not available with P400e.

	DIESEL
POWERTRAIN	TDV6
Transmission	Automatic
Driveline	All Wheel Drive (AWD)
Maximum power HP/rpm	254/3,750
Maximum torque (lb ft/rpm)	443/1,750 - 2,250
Capacity (cc)	2,993
No, of cylinders/Valves per cylinder	6/4
Cylinder layout	Longitudinal V6
Bore/stroke (in)	3.3/3.5
Compression ratio (:1)	16.1
FUEL ECONOMY	
Fuel tank capacity - US gallons	22.7
PERFORMANCE*	
Acceleration (secs) 0-60mph	7.2
Maximum speed mph	130

*Always follow local speed limits.

TECHNICAL SPECIFICATION

BRAKES

Front type	Ventilated disc
Front diameter (mm)	363
Rear type	Ventilated disc
Rear diameter (mm)	350
Park Brake	Integrated into brake caliper

WEIGHTS (lbs)

Curb weight	4,755
Gross Vehicle Weight 5 seat/5 + 2 seating (GVW)	6,724/6,945

TOWING (lbs)*

Unbraked trailer	1,653
Maximum towing	7,716
Maximum coupling point (nose weight)	330
Maximum vehicle and trailer combination (5 seat/5 + 2 Seating)	14,440/14,660

ROOF CARRYING (lbs)

Maximum roof load (including cross bars)	220
--	-----

*Never tow beyond a vehicle's permissible towing capacity. Before towing, please consult the owner's manual or your local authorized Land Rover Retailer for more detail.

DIMENSIONS AND CAPABILITIES

STANDARD RIDE HEIGHT

With roof rails 70 inches
 With roof antenna 70.9 inches
 With panoramic roof open 71.5 inches
 Access height air suspension setting will reduce each of the above by 1.9 inches

HEADROOM

Maximum front headroom with panoramic roof 38.7 inches
 Rear headroom 39 inches

LEGROOM

Maximum front legroom 39.5 inches
 Maximum rear legroom 37 inches

CARGO SPACE HEIGHT

Cargo space height (floor to ground) 33 inches
 Cargo space height (floor to roof) 31.1 inches

CARGO SPACE CAPACITY*

Height 33 inches, Width 50.6 inches
 Cargo space width between arches 43.9 inches
 Maximum cargo space volume behind first row 63.7 cu.ft
 Maximum cargo space volume behind second row 31.7 cu.ft

OBSTACLE CLEARANCE

Off-road height 10.9 inches
 Standard ride height 8.3 inches

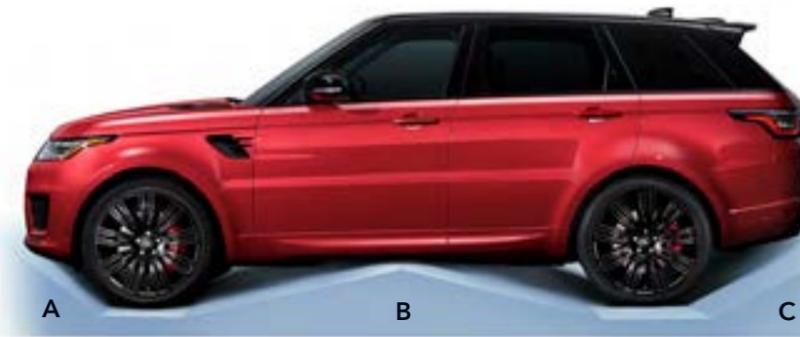

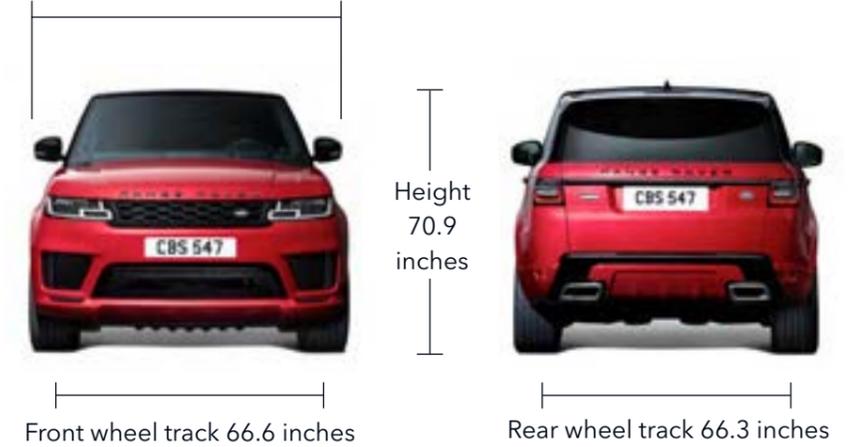

TURNING CIRCLE

Curb-to-curb 40.6ft.
 Wall-to-wall 41ft.
 Turns lock-to-lock 2.7

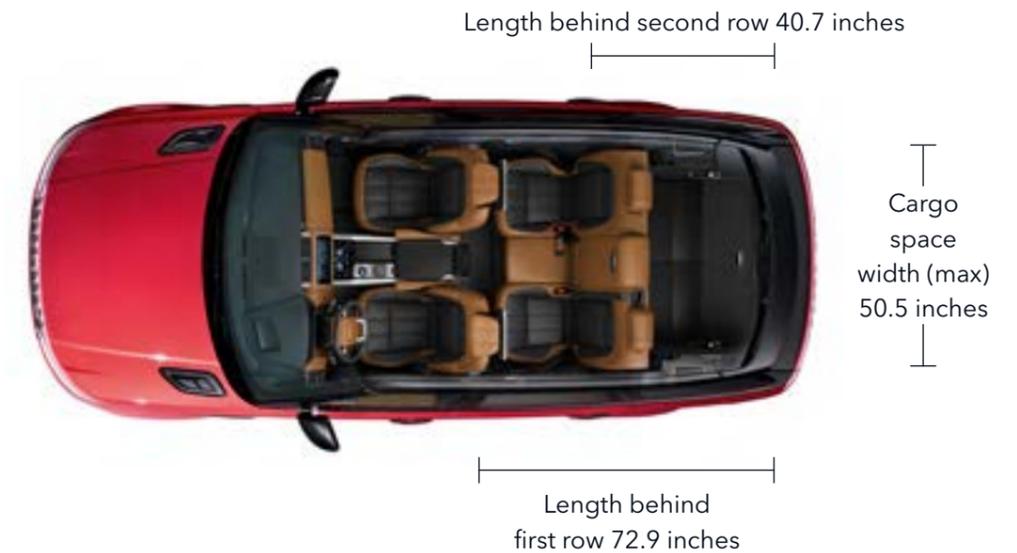

WADING DEPTH**

Maximum wading depth 33.4 inches

Width 81.6 inches mirrors folded
 Width 87.4 inches mirrors out

	A	B	C
Ride Height			
Approach Angle	33.0° (29.2°)	25.7° (26.9°)	30.0° (28.0°)
Ramp Angle		21.2° (21.0°)	26.2° (23.9°)
Departure Angle			
Off-road [†] (SVR)			
Standard (SVR)			

*Rear cargo space capacity is reduced on P400e models.
 **Driving in floodwaters or moving water should be avoided. Driving through water can be extremely dangerous. The Wade Sensing feature only detects depth of water the vehicle is in at the present time and not of water ahead or around the vehicle. Therefore, Wade Sensing cannot predict whether it is safe to proceed and cannot detect steep drops in grade around the vehicle. The driver is responsible for determining the conditions of the route being driven.
[†]With tow eye cover removed.

Please note: Figures may vary for SVR model and PHEV.
