Powerful capability.
Exceptional craftsmanship.
A refusal to sacrifice either.

Because having it all means nothing if it doesn’t lead to the experience of something greater.

The 2018 Lexus GX.

Experience Amazing
The GX balances a 4.6-liter V8 engine, an intelligent six-speed automatic transmission, full-time four-wheel drive and powerful off-roading technology with angular LED illumination, handcrafted details and an elegantly versatile cabin.

GX 460

The GX luxury shown in Nebula Gray Pearl // Options shown
GX Luxury shown with Sepia leather and Mahogany wood interior trim // Options shown
The available Sport Design Package offers a commanding front fascia treatment, darker rear taillamp housings, 18-inch Gunmetal Metallic alloy wheels² and more.
GX Premium shown in Black Onyx // Options shown
The luxury SUV that pioneered rally-proven, off-road performance and mastered responsive, on-road handling is back to do it once again. With an intelligent V8 engine, a robust towing capacity, and full-time four-wheel drive, the 2018 GX offers high strength in high style.

Engineered for extreme conditions and designed to exacting standards.
V8 VERSATILITY

4.6-LITER V8

A naturally aspirated 4.6-liter V8 engine delivers an impressive 301 horsepower and pairs with a six-speed sequential-shift automatic Electronically Controlled Transmission with intelligence for smooth handling, effortless acceleration and quick shifting.

DUAL VVT-i

Harness engine power in the right way at the right time. Dual VVT-i helps to improve low-speed torque and high-speed horsepower, anticipating the power you need and delivering it instantaneously.

FULL-TIME 4WD

Dominate on-road and off-road conditions with standard full-time four-wheel drive. Full-time 4WD directs power to all four wheels all of the time to help provide enhanced traction in a wide variety of driving situations. The transfer case can run in locked or unlocked mode, in high or low range.
Engineered to accommodate almost any excursion, the GX is capable of towing up to 6,500 pounds thanks to a solid body-on-frame construction and 329 lb-ft of torque at low engine speed. Taking a smart approach to strength, Trailer Sway Control helps detect and prevent excessive trailer movement. To help reduce sway, braking is applied independently to each wheel, and the throttle is moderated to help reduce vehicle speed. For added peace of mind, a flashing indicator alerts the driver when the system is taking corrective measures.
**ALL CONDITIONS. ALL POWERFUL.**

A rally-proven suspension system meets exceptional off-road capability.

**KINETIC DYNAMIC SUSPENSION SYSTEM**
Utilizing technology proven in World Rally Championship competition, the Kinetic Dynamic Suspension System automatically acts on the front and rear stabilizer bars to vary the degree of roll stiffness depending upon road conditions. This system not only improves on-road handling and ride comfort, it allows for greater suspension travel and articulation off-road so that the vehicle remains remarkably level.

**ADAPTIVE VARIABLE SUSPENSION**
Let the suspension vary with your mood. With the flip of a switch, available AVS monitors and adjusts the electronically controlled shock absorber settings of each wheel, depending on road surface, vehicle speed and driving style.

**DOWNHILL ASSIST CONTROL**
At the touch of a button, Downhill Assist Control works with the Anti-lock Braking System and Active Traction Control to help keep the vehicle at a slow, constant descent speed and prevent the wheels from locking up. Virtually all the driver needs to do is watch the road and steer.

**KINETIC DYNAMIC SUSPENSION SYSTEM**
Utilizing technology proven in World Rally Championship competition, the Kinetic Dynamic Suspension System automatically acts on the front and rear stabilizer bars to vary the degree of roll stiffness depending upon road conditions. This system not only improves on-road handling and ride comfort, it allows for greater suspension travel and articulation off-road so that the vehicle remains remarkably level.

**CRAWL CONTROL**
Challenging conditions are no match for our most advanced off-road technology. Activated with the press of a button, available Crawl Control is designed to automatically maintain an optimal slow and steady pace over demanding landscapes.

**FOUR-WHEEL ACTIVE TRACTION CONTROL**
Four-wheel Active Traction Control helps keep you securely on the road by using sensors on all four wheels to detect the onset of slippage and automatically apply the brake to the slipping wheel. In addition, power is automatically shifted to the wheels with the most traction.

**TORSEN® TORQUE-SENSING LIMITED-SLIP CENTER DIFFERENTIAL**
The TORSEN® torque-sensing limited-slip center differential with electronic differential lock efficiently distributes engine power between the front and rear axles, optimizing traction in all conditions.

**HILL-START ASSIST CONTROL**
Hill-start Assist Control (HAC) helps to increase driver confidence when ascending hills. While stopped on an incline, conventional vehicles may roll back once you step off the brake. HAC helps maintain the vehicle’s position by applying the brakes to all four wheels until the vehicle begins moving forward.

GX Premium shown in Black Onyx // Options shown
Experience unparalleled craftsmanship, bold details and a striking balance of comfort and capability. From an imposing stance to the pronounced front fascia to the available 18-inch Gunmetal Metallic alloy wheels, the GX puts the open road at your command.

COMMAND

Aggressive design to dominate terrain and demand attention.
Every GX comes from the hands of masters. That’s why less than 5% of the available leather in the world is considered worthy of the Lexus badge. The available semi-aniline leather is dyed all the way through, unlike leathers with conventional surface dyes. A higher grade of leather must also be used since imperfections cannot be hidden. The Linear Espresso wood trim is another feat of craftsmanship. Its intricate grain pattern is meticulously developed by hand and requires multiple processes, over many days, to achieve. The available Mahogany wood trim is also hand-selected to ensure a consistent, seamless interior. Such attention to detail comes together in available features like the wood- and leather-trimmed heated steering wheel and wood- and leather-trimmed shift knob, both crafted exclusively with hand-selected genuine materials.

Available second-row captain’s chairs enhance passenger accommodations and provide each second-row passenger with individual, contoured seats.
Versatility is only the beginning. The GX offers an expansive cabin space with exceptional comfort. In addition to the 40/20/40-split second-row seats, the driver and front passenger enjoy 10-way power-adjustable seats with lumbar adjustability. The third-row seats prove generous and convenient, as the seating folds flat into the cargo-area floor manually or, when equipped, with the press of a button. And a tilt-and-slide seat feature simplifies passenger-side access to the third row. Available heated and ventilated front seats, heated outboard second-row seats and three-zone climate control offer additional indulgence.
CONTROL

Master your surroundings in the most advanced GX ever built.

Control is closer than ever with comprehensive safety features, driver-centric innovations and available Lexus Enform11, our premium suite of connected technology. With available entertainment features such as a dual-screen Rear-Seat Entertainment System12 and Mark Levinson® Premium Surround Sound Audio System,13 the GX offers control that caters to the entire family.
ADVANCED CLIMATE CONTROLS
The dual-zone climate control with smog sensor features individual settings to allow the driver and front passenger to adjust their preferred temperatures. Highly intelligent, the system even automatically switches into recirculation mode if it senses high levels of pollutants outside. The available three-zone automatic climate control with interior air filter, smog sensor and automatic recirculation mode helps to enhance peak comfort in any type of weather.

VOICE COMMAND
Available advanced voice command enables you to place compatible Bluetooth®-enabled phone calls and operate climate, audio and navigation functions using normal, everyday speech. If you say, “It’s too hot in here,” for example, the climate control will automatically lower the temperature by four degrees.

NAVIGATION SYSTEM
Use the high-resolution multimedia display or your voice to access the available Navigation System. This system can map millions of points of interest across the country, offers up-to-date traffic and weather information, 3D city views, and simulated views of approaching highway junctions; displays the current speed limit and can automatically display nearby gas stations if you begin to run low on fuel.

MARK LEVINSON AUDIO
While most audio systems are adapted to and installed in a vehicle after it’s produced, Mark Levinson technicians work alongside Lexus engineers from the onset of the development process. That’s why the GX features a dynamic sound stage uniquely fitted to the cabin. Sound this rich even allows listeners to experience the arrangement of individual instruments and performers, which more accurately expresses the artist’s original intent. The available Mark Levinson Premium Surround Sound Audio System features 7.1-channel architecture, 17 speakers and 330 watts of maximum power. The resulting audio experience immerses the cabin in multidimensional sound that was once reserved for six-figure home audio systems.

LEXUS ENFORM
Available Lexus Enform elevates connected technology and offers concierge-level convenience. From emergency assistance and live response center agents to the ability to start your engine remotely and access smartphone apps with ease, our premium suite of connected technology offers peace of mind with every drive.

DELIVERY AND TECHNOLOGY SPECIALISTS
To help you get the most out of these and other Lexus features, a Vehicle Delivery Specialist will walk you through nearly every setting and function you desire. And to answer questions that arise after delivery, a Vehicle Technology Specialist can offer expert guidance in person or without you ever leaving the driveway via camera-enabled apps like FaceTime®. Learn more about these complimentary services at lexus.com/specialists.
WIDE-VIEW FRONT AND SIDE MONITOR SYSTEM

This available system features a wide-angle, front-mounted camera to help you see around blind corners, such as when exiting a parking garage. A second camera located underneath the passenger-side mirror is particularly useful when parallel parking, navigating narrow passageways and in tight parking spaces.

INTELLIGENT HIGH-BEAM HEADLAMPS

To help provide greater visibility for you as well as other drivers, available intelligent high-beam headlamps offer added illumination to help keep you focused on the road. When the road ahead is clear, the system defaults to high-beam mode, then temporarily switches to low beams when it senses the headlamps or taillamps of vehicles ahead.

PRE-COLLISION SYSTEM WITH DRIVER ATTENTION MONITOR

To help prepare for and avoid potential front collisions, the available Pre-Collision System includes a Driver Attention Monitor that is designed to warn you if you’re facing away from the road when an obstacle is detected ahead. Should it determine a frontal collision is likely, it’s designed to automatically prepare Brake Assist for increased braking response and can even automatically begin braking under certain conditions.

BLIND SPOT MONITOR WITH REAR CROSS-TRAFFIC ALERT

For added peace of mind, the available Blind Spot Monitor is designed to detect and warn you of vehicles approaching or positioned in the adjacent lanes. Additionally, Rear Cross-Traffic Alert can help you when backing out of a parking space by notifying you of vehicles approaching from either side, under certain conditions.

LANE DEPARTURE ALERT

This available system utilizes a high-resolution camera to monitor visible lane markings and determine the vehicle’s position within a lane. If an inadvertent lane departure, or potential departure due to swaying, is detected at speeds above 32 mph, the system attempts to alert the driver with audible and visual warnings and steering-wheel vibrations.

HIGH-SPEED DYNAMIC RADAR CRUISE CONTROL

This available system uses radar and camera technology to help you maintain a preset speed and following distance from the vehicle ahead. If you get closer than the preset distance, the throttle is automatically reduced and the brakes may be applied. As soon as the road ahead clears, your Lexus returns to its preset speed.

INTUITIVE PARKING ASSIST

Available Intuitive Parking Assist utilizes inconspicuous sensors integrated into the front and rear bumpers that are designed to detect surrounding objects. Using audible tones and an indicator on the multimedia display, the system can notify you of a detected object’s location and proximity, helping with routine tasks like parallel parking.

WARRANTY

Four-year/50,000-mile Lexus Limited Warranty. Six-year/70,000-mile Powertrain Warranty. Six-year/unlimited-mileage Corrosion Perforation Warranty. All warranties with zero deductible. See the GX Warranty and Services Guide at your Lexus dealer for details.

DISCLAIMERS

1. The GX 460 is designed to meet most off-road driving requirements. Abusive use may result in bodily harm or damage. Lexus encourages responsible driving to help protect you, your vehicle and the environment. See your local dealer for advice on the ideal use of your vehicle in off-road conditions. Tow hitch receivers/ball mount kits are not intended to provide crash protection. See page 2-18 for performance tires expected to experience greater tire wear than conventional tires. Tire life may be substantially less than 15,000 miles, depending upon driving conditions. 3. Please consult your Lexus dealer or Owner’s Manual for towing and load specifications. Before towing, confirm your vehicle has the necessary additional equipment. If gross trailer weight is above 5,000 lbs (2,268 kg), it is necessary to use a weight-distributing hitch with sufficient capacity. Do not exceed any Weight Ratings and follow all instructions from your trailer-hitch manufacturer and vehicle Owner’s Manual. The maximum amount you can tow depends upon your vehicle’s total weight, load weight of any cargo, occupants and available equipment. 5. Ratings shown are based on gasoline with an octane rating of 91 or higher. If premium fuel is not used, performance will decrease. 6. Trailer Sway Control (TSC) is an electronic system designed to help the driver maintain vehicle control under adverse conditions. It is not a substitute for safe driving practices. Factors including speed, road conditions, weather and driver steering input can all affect whether TSC will be effective in preventing a loss of control. See Owner’s Manual for additional limitations and details. 7. Crawl Control is designed for driving on difficult terrain at low speeds. It assists the driver by controlling acceleration and braking, allowing the driver to focus on steering. The GX 460 is designed to meet off-road driving requirements, but off-road is inherently dangerous anyway. Always wear seatbelts. See Owner’s Manual for additional limitations and details. 8. Torsen® is a registered trademark of Zexel, Inc. 9. Downhill Assist Control is designed to help the driver maintain vehicle control and speed on steep downhill descents. Hill-start Assist Control is designed to help minimize backward rolling on steep ascents. Neither system is a substitute for safe driving and judgment and practices. Factors including speed, grade, surface conditions and driver input can all affect whether DTC and HAC will be effective in preventing a loss of control. See Owner’s Manual for additional limitations and details. 10. Available second-row captain’s chairs reduce vehicle seating capacity to a maximum of six passengers. 11. Be sure to observe traffic regulations and maintain awareness of road and traffic conditions at all times. Apps/ services vary by vehicle carrier; functionality depends on many factors. Select apps use large amounts of data; you are responsible for applicable fees. Apps & services subject to change. See lexus.com/Owner for details. 12. A single-disc DVD player is included. A separate DVD player or game system utilizing the center console’s video/audio inputs is required in order to use the split-screen function of the dual-screen system. 13. Mark Levinson® is a registered trademark of Harman International Industries, Inc. 14. Concentrating on the road should always be your primary focus while driving. Do not use the hands-free phone system if it will distract you. The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Lexus is under license. A compatible Bluetooth-enabled phone must first be paired. Phone performance depends on software, coverage & carrier. 15. Be sure to obey traffic regulations and maintain awareness of road and traffic conditions at all times. Availability & accuracy of the information provided by the Navigation System is dependent upon many factors. Use common sense when relying on information provided. Services & programming subject to change. Services not available in every city or roadway. Update required; varies by model year. See dealer for details. 16. Extra features may be required for additional areas. Bluetooth® technology manufactured under license from iBiquity Digital Corporation U.S. and Foreign Patents. HD Radio® and the HD Radio, HD Radio, and ‘Arc’ logos are proprietary trademarks of iBiquity Digital Corp. 17. FaceTime® is a registered trademark of Apple Inc. All rights reserved. 18. The Wide-view Front and Side Monitor system does not prevent the owner or occupants from looking at the front side areas of the vehicle. You should look around and confirm clearance. Environmental factors may limit effectiveness and view may be obstructed. See Owner’s Manual for additional limitations and details. 19. The Pre-Collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. It is not a collision-avoidance system and is not a substitute for safe driving and judgment and practices. System effectiveness is dependent on roadway, weather, traffic conditions and other factors. 20. The Driver Attention Monitor is designed to alert the driver if a potential hazard is detected ahead and the driver’s face appears to be turned away. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input, light conditions, etc. Consult your Owner’s Manual for details. 21. Brake Assist is designed to help the driver maintain control of the ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper vehicle maintenance, tire and road conditions. See Owner’s Manual for additional limitations and details. 22. Intelligent high beams operate at speeds above 25 mph. Factors such as day/night, weather, lighting and terrain limit effectiveness, requiring the driver to manually operate the high beam. See Owner’s Manual for details. 23. Blind Spot Monitor. Always look over your shoulder and use your turn signal. There are limitations to the function, detection and range of the monitor. See Owner’s Manual for additional limitations and details. 24. Do not rely exclusively on the Rear Cross-Traffic Alert system. Always look over your shoulder and use your mirrors to confirm rear clearance. There are limitations to the function, detection and range of the system. See Owner’s Manual for additional limitations and details. 25. Dynamic Radar Cruise Control is designed to assist the driver and is not a substitute for safe and attentive driving practices. System effectiveness is dependent on many factors, such as speed, driver input, light conditions, etc. Consult your Owner’s Manual for additional limitations and details. 27. Intuitive Park Assist (IPA) is designed to assist drivers in avoiding potential collisions at speeds of 9 mph or less. Certain vehicle and environmental factors, including an object’s shape and composition, may affect the ability of the IPA to detect it. Always look around outside the vehicle and use mirrors to confirm clearance. See Owner’s Manual for additional limitations and details. 28. Preliminary mileage estimates determined by Lexus. EPA mileage estimates not available at time of publishing. Actual mileage will vary. 29. The Smart Access System may interfere with some medical devices. Please talk to your doctor to see if you should deactivate this system. 30. The engine immobilizer is a state-of-the-art anti-theft device. When you insert the key in the ignition switch or bring a SmartAccess™ key into the vehicle, the key transmits an electronic code to the vehicle. The engine will only start if the code in the transponder chip inside the key replaces the code in the vehicle’s immobilizer. Because the transponder chip is embedded in the key, it can be costly to replace. If you lose a key or fob, your Lexus dealer can help. Alternatively, you can find a qualified independent locksmith to perform high-security reprogramming. See your Owner’s Manual for details. 31. Please refer to the local Yellow Pages for using or contacting a professional. 32. Always drive safely, obey traffic laws & focus on the road while driving. SiriusXM® is available on select Phone/iPad models & requires Internet access. SiriusXM® is not available in all languages or all areas & features vary by area. Some SiriusXM® functionality & commands are not accessible in the vehicle. Data changes, modifications, and cancellations are subject to change without notice. Always listen to the vehicle’s command until you are familiar with the system. 33. Please consult your Lexus dealer or Owner’s Manual for additional limitations and details. 34. All the airbags are designed and intended for inflating airbags are designed and intended for inflating airbags to help reduce the risk of injury from an inflating airbag, always wear seatbelts and sit upright in the middle of the seat as far back as possible. Do not put objects in front of an airbag or around the seatback. Do not use a rear-facing child seat in any front passenger seat. See Owner’s Manual for additional limitations and details. 35. Contact your Lexus dealer for details. 36. The vehicle immobilizer is a state-of-the-art anti-theft system. When you insert the key in the ignition switch or bring a SmartAccess™ key into the vehicle it transmits an electronic code to the vehicle. The engine will only start if the code in the transponder chip inside the key replaces the code in the vehicle’s immobilizer. Because the transponder chip is embedded in the key it can be costly to replace. If you lose a key or fob your Lexus dealer can help. Alternatively, you can find a qualified independent locksmith to perform high security reprogramming. See your Owner’s Manual for details. 37. Use only if aware of circumstances surrounding vehicle and it is safe to do so. Do not rely on this or any other systems, and always be alert to the road. 38. Lexus received the highest numerical score among 12 luxury brands in the J.D. Power 2017 U.S. Customer Service Index (CSI) Study, based on 7,042 total responses, measuring customer satisfaction with dealer and non-dealer service during the last 12 months of ownership, surveyed October-December 2016. Your experiences may vary. Visit JDPower.com. 39. F SPORT Accessories are warranted for 12 months from the date of installation or for the balance of the new-car or Certified Pre-Owned (CPO) warranty in force at the date of installation, whichever is greater, when installed by an authorized Lexus dealer. F SPORT Accessories installed by anyone other than an authorized Lexus dealer are warranted for 12 months from the date of purchase only, and the warranty coverage is limited to the replacement value of the F SPORT Accessories. These warranties do not cover maintenance services such as replacement of brake pads/linings and clutch linings or noise, vibration, cosmetic conditions and other deterioration caused by normal wear and tear. Failures caused by improper installation or the failure to follow the F SPORT Accessories warranty terms are not covered. F SPORT is a trademark of Toyota Motor Corporation. Products available through participating Lexus dealers. 40. Genuine Lexus Paint Protection Film by 3M® is designed for specific sections of the hood and front fenders. Depending on the model, it may also be applied to portions of the front bumper for an additional charge. Lexus genuine front bumper paint protection installation is performed by a trained Lexus approved installer. See dealer for details. 41. Carpet and all weather floor liners/mats are model-specific with model name. Floor liners/mats are designed for use in a specific model and model/year vehicle and SHOULD NOT be used in any other vehicle. To avoid potential interference with pedal operation, each liner must be secured with its fasteners. Do not install on the back seat. Lexus strives to build vehicles to match customer interest, and thus they typically are built with popular options and option packages. Not all options/packages are available separately, and some may not be available in all regions of the country. See lexus.com for information about options/packages commonly available in your area. If you require a vehicle without any or with different options, contact your Lexus dealer or your local Lexus representative. Specifications, features, equipment, technical data, performance figures, options, and color and trim are based upon information available at time of printing, are subject to change without notice, and are for mainland U.S. vehicles only. Some vehicles shown with available equipment. See your Lexus dealer for details. Lexus reminds you to drive safely and drive responsibly. Secure children in appropriate safety seats, obey all traffic laws and use REUS (872-3598) or visit lexus.com. To learn more about your financing options, contact your Lexus dealer or call Lexus Financial Services at 800-874-7050.
