LEXUS 2019
Unparalleled craftsmanship.
Unrestrained capability.
A refusal to sacrifice either.

Because having it all means nothing if it doesn’t lead to the experience of something greater.

The 2019 Lexus GX.

Experience Amazing
The GX balances a 4.6-liter V8 engine, an intelligent six-speed automatic transmission, full-time four-wheel drive and powerful off-road technology with angular LED illumination, handcrafted details and an elegantly versatile cabin.

The luxury SUV that pioneered rally-proven off-road performance and mastered responsive on-road handling boldly returns to do it once again. With an intelligent V8 engine, a robust towing capacity\(^1\) and full-time four-wheel drive, the 2019 GX offers high strength in high style.

Meticulously engineered to create an amazing driving experience wherever you go.

Options shown
ALL-ROAD VERSATILITY

A suspension system so advanced, it can automatically adapt to the terrain.

KINETIC DYNAMIC SUSPENSION SYSTEM

Utilizing technology proven in World Rally Championship competition, the Kinetic Dynamic Suspension System automatically acts on the front and rear stabilizer bars to vary the degree of roll stiffness depending upon road conditions. This system not only improves on-road handling and ride comfort, it allows for greater suspension travel and articulation off-road so that the vehicle remains remarkably level.
**6,500-LB TOWING CAPABILITY**

Engineered to accommodate almost any excursion, the GX is capable of towing up to 6,500 pounds thanks to a solid body-on-frame construction and a 4.6-liter V8 with 329 lb-ft of torque at low engine speed. Taking a smart approach to strength, Trailer Sway Control helps detect and prevent excessive trailer movement. To help reduce sway, braking is applied independently to each wheel, and the throttle is moderated to help reduce vehicle speed. For added peace of mind, a flashing indicator alerts the driver when the system is taking corrective measures.

**329 lb-ft of torque**

GX shown in Silver Lining Metallic // Options shown
ALL CONDITIONS. ALL POWERFUL.

Advanced technology meets exceptional off-road capability.

**FULL-TIME 4WD**

Dominate on-road and off-road conditions with standard full-time four-wheel drive. Full-time 4WD directs power to all four wheels all of the time to help provide enhanced traction in a wide variety of driving situations. The transfer case can run in locked or unlocked mode, in high or low range.

**ADAPTIVE VARIABLE SUSPENSION**

Let the suspension vary with your mood. With the flip of a switch, available AVS monitors and adjusts the electronically controlled shock absorber settings of each wheel, depending on road surface, vehicle speed and driving style.

**DOWNHILL ASSIST CONTROL**

At the touch of a button, Downhill Assist Control works with the Anti-lock Braking System and Active Traction Control to help keep the vehicle at a slow, constant descent speed and prevent the wheels from locking up. Virtually all the driver needs to do is watch the road and steer.

**CRAWL CONTROL**

Challenging conditions are no match for our most advanced off-road technology. Activated with the press of a button, available Crawl Control is designed to automatically maintain an optimal slow and steady pace over demanding landscapes.

**FOUR-WHEEL ACTIVE TRACTION CONTROL**

Four-wheel Active Traction Control helps keep you securely on the road by using sensors on all four wheels to detect the onset of slippage and automatically apply the brake to the slipping wheel. In addition, power is automatically shifted to the wheels with the most traction.

**HILL-START ASSIST CONTROL**

Hill-start Assist Control (HAC) helps to increase driver confidence when ascending hills. While stopped on an incline, conventional vehicles may roll back once you step off the brake. HAC helps maintain the vehicle’s position by applying the brakes to all four wheels until the vehicle begins moving forward.

**TORSEN® TORQUE-SENSING LIMITED-SLIP CENTER DIFFERENTIAL**

The TORSEN® torque-sensing limited-slip center differential with electronic differential lock efficiently distributes engine power between the front and rear axles, optimizing traction in all conditions.

**FULL-TIME 4WD**

Dominate on-road and off-road conditions with standard full-time four-wheel drive. Full-time 4WD directs power to all four wheels all of the time to help provide enhanced traction in a wide variety of driving situations. The transfer case can run in locked or unlocked mode, in high or low range.

**ADAPTIVE VARIABLE SUSPENSION**

Let the suspension vary with your mood. With the flip of a switch, available AVS monitors and adjusts the electronically controlled shock absorber settings of each wheel, depending on road surface, vehicle speed and driving style.

**DOWNHILL ASSIST CONTROL**

Experience unparalleled craftsmanship, bold details and a striking balance of comfort and capability. From an imposing stance to the pronounced front fascia to the available 18-inch Gunmetal Metallic alloy wheels, the GX puts the open road at your command.

CRAFTSMANSHIP

Designed to the highest and most exact standards. Ours.

GX shown in Silver Lining Metallic // Options shown
Every GX comes from the hands of masters. The leather for the interior is carefully selected from around the world and only a fraction of that is considered worthy of the Lexus badge. The available semi-aniline leather is dyed all the way through, unlike leathers with conventional surface dyes. A higher grade of leather must also be used since imperfections cannot be hidden. The Linear Espresso wood trim is another feat of craftsmanship. Its intricate grain pattern is meticulously developed by hand and requires multiple processes, over many days, to achieve. The available Mahogany wood trim is also hand-selected to ensure a consistent, seamless interior. Such attention to detail comes together in available features like the wood- and leather-trimmed heated steering wheel and wood- and leather-trimmed shift knob, both crafted exclusively with genuine hand-selected materials.

Available second-row captain’s chairs\textsuperscript{27} enhance passenger accommodations and provide each second-row passenger with an individual, contoured seat.

INTERIOR DESIGN

Handcrafted details and hand-selected materials accentuate our most refined GX yet.
Versatility is only the beginning. The GX offers an expansive cabin with exceptional comfort. In addition to the 40/20/40-split second-row seats, the driver and front passenger enjoy 10-way power-adjustable seats with lumbar adjustability. The third-row seats prove generous and convenient, as the seating folds flat into the cargo area floor manually or, when equipped, with the press of a button. And a tilt-and-slide seat feature simplifies passenger-side access to the third row. Available heated and ventilated front seats, heated outboard second-row seats and three-zone climate control offer additional indulgence.
Control is closer than ever with comprehensive safety features, driver-centric innovations and more advanced Lexus Enform, our available premium suite of connected technology. With available entertainment features such as a dual-screen Rear-Seat Entertainment System and Mark Levinson® Premium Surround Sound Audio System, the GX offers control that caters to the entire family.

CONTROL
Master your surroundings in the most advanced GX ever built.
WIDE-VIEW FRONT AND SIDE MONITOR SYSTEM

This available system features a wide-angle, front-mounted camera to help you see around blind corners, such as when exiting a parking garage. A second camera located underneath the passenger-side mirror is particularly useful when parallel parking, navigating narrow passageways and in tight parking spaces.

INTELLIGENT HIGH BEAMS

To help provide greater visibility for you as well as other drivers, available Intelligent High Beams offer added illumination to help keep you focused on the road. When the road ahead is clear, the system defaults to high-beam mode, then temporarily switches to low beams when it detects the headlamps or taillamps of vehicles ahead.

PRE-COLLISION SYSTEM WITH DRIVER ATTENTION MONITOR

To help prepare for and avoid potential front collisions, the available Pre-Collision System includes a Driver Attention Monitor that is designed to warn you if you’re facing away from the road when an obstacle is detected ahead. Should it determine a frontal collision is likely, it’s designed to automatically prepare Brake Assist for increased braking response and can even automatically begin braking under certain conditions.

LANE DEPARTURE ALERT

This available system utilizes a high-resolution camera to monitor visible lane markings and determine the vehicle’s position within a lane. If an inadvertent lane departure, or potential departure due to swaying, is detected at speeds above 32 mph, the system attempts to alert the driver with audible and visual warnings and steering-wheel vibrations.

BLIND SPOT MONITOR WITH REAR CROSS-TRAFFIC ALERT

For added peace of mind, the available Blind Spot Monitor is designed to detect and warn you of vehicles approaching or positioned in the adjacent lanes. Additionally, Rear Cross-Traffic Alert can help you when backing out of a parking space by notifying you of vehicles approaching from either side, under certain conditions.

HIGH-SPEED DYNAMIC RADAR CRUISE CONTROL

This available system uses radar and camera technology to help you maintain a preset speed and following distance from the vehicle ahead. If you get closer than the preset distance, the throttle is automatically reduced and the brakes may be applied. As soon as the road ahead clears, your Lexus returns to its preset speed.

LEXUS ADVANCED SAFETY

BLIND SPOT MONITOR WITH REAR CROSS-TRAFFIC ALERT

For added peace of mind, the available Blind Spot Monitor is designed to detect and warn you of vehicles approaching or positioned in the adjacent lanes. Additionally, Rear Cross-Traffic Alert can help you when backing out of a parking space by notifying you of vehicles approaching from either side, under certain conditions.

HIGH-SPEED DYNAMIC RADAR CRUISE CONTROL

This available system uses radar and camera technology to help you maintain a preset speed and following distance from the vehicle ahead. If you get closer than the preset distance, the throttle is automatically reduced and the brakes may be applied. As soon as the road ahead clears, your Lexus returns to its preset speed.

INTUITIVE PARKING ASSIST

Available Intuitive Parking Assist utilizes inconspicuous sensors integrated into the front and rear bumpers that are designed to detect surrounding objects. Using audible tones and an indicator on the multimedia display, the system can notify you of a detected object’s location and proximity, helping with routine tasks like parallel parking.

GX shown in Silver Lining Metallic with Sport Design Package (left) // Options shown
LEXUS ENFORM

Lexus Enform® elevates connected technology and provides concierge-level convenience. From emergency assistance and a live response center agent, to the ability to start your engine remotely15 through your smartphone, smartwatch or using the Lexus skill on Amazon Alexa®-enabled devices, our premium suite of connected technology offers peace of mind with every drive.

ADVANCED CLIMATE CONTROLS

The dual-zone climate control with smog sensor features individual settings to allow the driver and front passenger to adjust their preferred temperatures. Highly intelligent, the system even automatically switches into recirculation mode if it senses high levels of pollutants outside. The available three-zone automatic climate control with interior air filter, smog sensor and automatic recirculation mode helps to enhance peak comfort in any type of weather.

VOICE COMMAND

Voice Command enables you to place compatible Bluetooth®-enabled phone calls and operate audio functions using normal, everyday speech. When equipped with available Navigation28, the system also allows you to control climate and navigation functions.

NAVIGATION SYSTEM

Use the high-resolution multimedia display or your voice to access the available Navigation System28. This system can map millions of points of interest across the country; offers up-to-date traffic and weather information, 3D city views, and simulated views of approaching highway junctures; displays the current speed limit and can automatically display nearby gas stations if you begin to run low on fuel.

MARK LEVINSON® AUDIO

While most audio systems are adapted to and installed in a vehicle after it’s produced, Mark Levinson® technicians work alongside Lexus engineers from the onset of the development process. That’s why the GX features a dynamic sound stage uniquely fitted to the cabin. Sound this rich even allows listeners to experience the arrangement of individual instruments and performers, which more accurately expresses the artist’s original intent. The available Mark Levinson® Premium Surround Sound Audio System14 features 7.1-channel architecture, 17 speakers and 330 watts of maximum power. The resulting audio experience immerses the cabin in multidimensional sound that was once reserved for six-figure home audio systems.

DISCLAIMER 5. The GX 460 is designed to meet most off-road driving requirements. Off-road driving is inherently dangerous and may result in bodily harm or vehicle damage. Lexus cannot ensure that you will protect you, your vehicle and the environment under all circumstances. Other factors outside of Lexus’ control, which can limit the ability to reach the response center or receive emergency support or otherwise limit the functionality of the system.

2. Termination of Stolen Vehicle Locator service and report required to use Stolen Vehicle Locator. The Safety Connect trial period is at no extra cost and begins on the original date of purchase or lease of a new vehicle. After the respective trial period expires, enrollment in paid subscription is required to access the service.
