

2011 LEXUS

THE 2011
IS LINE

WHICHEVER path you choose, the innovation and driving-inspired performance of an IS guarantees one thrilling ride. But each IS model also stands alone—projecting a singular personality and unique appeal. The IS F is the fastest, most dominant performance sedan we've created to date. The IS sedan's design was inspired by the exclusive world of competitive racing. And the IS C features a precision-engineered retractable hardtop that transforms your coupe into a convertible in 20 seconds flat. Despite their differences, each is crafted purely for driving pleasure.

YOUR NIGHT?
WIDE OPEN.

Liberate your wild side in the IS Convertible. Stellar performance and dynamic handling keep your adrenaline pumping while state-of-the-art innovations like an available advanced Hard Disk Drive (HDD) Navigation System⁴ help you navigate the evening.

Available heated and ventilated front seats are designed specifically for the cabin whether the hardtop is retracted or not. And available one-touch fold-and-return front seats provide easy access for cargo and friends. With a push of a button, 13 motors and 33 sensors act in seamless unison to turn your coupe into a fun-loving convertible. And they do it in just 20 seconds flat—fastest in its class.⁷ Only its 0 to 60 time is more impressive.

YOUR NEW COMFORT ZONE

For a car that was inspired by competitive racing, the last thing you'd expect would be an indulgent, comfortable cabin. But the IS is full of surprises. Dual-zone climate control is designed to automatically react to changes due to air temperature or sunlight in any of the models—or when the IS C's top is lowered or raised. The climate-control system also uses a humidity sensor and a microdust and pollen filter. In the IS F and IS 350 sedan and convertible, a smog sensor is designed to detect and help block hydrocarbons from entering the cabin.

The seats and steering wheel are carefully thought-out as well and beg for long drives on winding roads. The steering wheel is smaller in diameter like a race car's and is bound in leather trim for a firm grip. The seats are bolstered to help hold drivers in place around curves and are also wrapped in leather hand-chosen from premium full-grain stocks. One last detail you'll definitely want to put your hands on: a leather-and-chrome-trimmed shift knob. Putting the IS in gear is now more tempting than ever.

To create some of the finest sound possible outside of a recording studio, each IS offers an available Mark Levinson® Premium Surround Sound Audio System.³ For optimum audio quality, the IS has been designed with multiple sound-absorbing materials to help quiet the cabin from unwanted noise. It then delivers rich, clear sound through the carefully arranged speakers. The vehicles are also outfitted to play music from your iPod®⁸ or MP3 player, and every IS offers a standard USB port that allows you to charge and control your iPod® from the vehicle's audio controls or available Navigation System.⁴ There's also a convenient Bluetooth® audio⁹ wireless connection that's available for compatible devices.

TWENTY FEET AWAY
AND YOU'RE STILL THE
CENTER OF ATTENTION.

As you approach your IS, the vehicle is already preparing for your arrival. From up to 20 feet away, SmartAccess^{10,11} automatically transmits a secure signal directly from your key fob to the IS. As you approach, SmartAccess^{10,11} activates the vehicle's lighting sequence and illuminates points of entry—the first being the exterior

puddle lights. When your hand touches the door handle, the door instantly unlocks for quick entry. Once inside, just press the brake pedal with your foot and the IS's ignition button glows green—meaning the engine is primed and ready to growl. No key is needed. With a simple push of the button, you're off.

THE 2011 IS F

BRING ON-RAMPS TO THEIR KNEES.

With the IS F, we engineered a totally different, asphalt-punishing kind of Lexus. It began with a team of Lexus engineers who put performance and power high on the list. They collaborated with Yamaha,[®] Brembo[®] and BBS[®] to help ensure maximum performance, and the results are definitive. A 5.0-liter V8 generates massive 416 horsepower,¹ and an eight-speed Sport Direct-Shift transmission

boasts shift timing that is among the fastest in the world. It employs both conventional port- and direct-fuel injection and delivers 0 to 60 mph in a searing 4.6 seconds.^{1,2} It even sounds different. Above 3,600 rpm, the engine hungrily sucks in air through a large secondary intake. This unleashes a rush of even more horsepower and creates a deep, attention-grabbing roar from the quad tailpipes.

Available racing-inspired paddle shifters are conveniently located on the steering wheel, allowing you to quickly upshift or downshift with just a flick of the finger.

Optional equipment shown.

THE WORLD
OF RACING – RIGHT AT YOUR
FINGERTIPS.

The IS design was inspired by the world of competitive racing and proof is just an arm's length away. It comes available with a six-speed paddle-shift-sequential automatic transmission that benefits from steering-wheel-mounted paddle shifters. Shifting gears right at your fingertips allows drivers to quickly upshift or downshift without taking their hands off the wheel—a feature professional race car drivers appreciate. The rear-wheel drive (RWD) IS 250 features a standard six-speed manual transmission. Its close gear ratios and short throws help the driver get the most dynamic performance out of its responsive V6.

GET TO KNOW THE ROAD. INTIMATELY.

In the battle against the elements, the IS comes armed with several traction-boosting features. The IS 250 and 350 sedans are available with all-wheel drive. When faced with slick road surfaces, AWD varies engine power to both the front and rear axles based on many factors such as steering, throttle position, and wheel and vehicle speed. This can help provide significantly enhanced traction and control. Across the IS Line, all models include Vehicle Dynamics Integrated Management (VDIM).¹⁹ VDIM uses a sophisticated network of sensors to anticipate a skid even before it occurs. When VDIM detects a potential loss of traction, it seamlessly coordinates steering, braking, Vehicle Stability Control (VSC)¹⁹ and Traction Control (TRAC) to help the driver maintain command of the vehicle.

ITS 0-TO-60 GETS YOUR
ATTENTION. BUT ITS 60-TO-0
IS WHAT REALLY
STOPS YOU.

Brembo® produced a special braking system²⁰ for the IS F that features massive six-piston aluminum calipers that clamp 14.2-inch cross-drilled rotors in front and two-piston calipers with 13.6-inch cross-drilled rotors in the rear. The result: brakes as powerful as the IS engine. The IS 350 and IS 350 C employ opposed four-piston front calipers on large rotors to better handle the power of its engine. And on the IS 250 (front), IS 350 and IS C, ventilated disc brakes help dissipate heat and help provide outstanding braking.

PERFORMANCE SEDAN
OR IDEA LAB?

THE 2011
IS LINE

IT'S easy to be innovative for innovation's sake. The hard part is making sure drivers directly benefit. Take, for example, our airbag system.²¹ It utilizes dual-stage front airbags²¹ designed to inflate at different speeds depending on the severity of impact and the driver's seat-track position. Each IS also comes equipped with a twin-chamber front-passenger airbag.²¹ Unlike a single-chamber airbag,²¹ it deploys with a slight depression in its center to help disperse the forces applied to the passenger. Just another example of how the IS is engineered to focus on you and your passengers.

LEXUS ENFORM®

DESIGNED TO HELP SIMPLIFY YOUR LIFE.

With the available Lexus Enform^{5,6} system, you can speak to a live service agent, 24 hours a day, seven days a week. You don't have to memorize any numbers, navigate through seemingly endless screens—or even have your cell phone with you. Need an address? Simply select Destination Assist on the available navigation screen for live assistance. Once you've decided on a location, your agent can send the turn-by-turn directions straight to your vehicle's Navigation System.⁴ Planning a trip? You also have the option of pre-selecting up to 200 destinations yourself online and having them all sent to your vehicle.

SAFETY CONNECT™

DESIGNED TO HELP SAFEGUARD YOUR LIFE.

With Safety Connect^{5,23} you can receive emergency help at a moment's notice, whether that means assisting the police with locating your stolen vehicle or requesting Enhanced Roadside Assistance²⁴ for a flat tire. The Safety Connect^{5,23} service also features Automatic Collision Notification, which instantly sends a call for help the moment the system senses the vehicle has been in a severe rear-end collision or the airbags²¹ have been deployed.

The IS's available voice-activated Hard Disk Drive (HDD) Navigation System⁴ is our most advanced to date. It features available XM Sports and Stocks^{4,25} for scores and market updates, as well as available XM NavTraffic^{®4,25} that provides real-time traffic reports on specific roads and can reroute you around congestion. It also features available XM NavWeather^{™4,25} that can give you real-time weather reports and automatically alert you when you are within 64 miles—and then again within 15.5 miles—of severe weather. Meaning you can spend more quality time in your IS with less threat from congested roads and stormy conditions.*

WARRANTY

Four-year/50,000-mile Lexus Limited Warranty. Six-year/70,000-mile Powertrain Warranty. Six-year/unlimited-mileage Corrosion Perforation Warranty. All warranties with zero deductible. See the IS, IS C or IS F *Warranty and Services Guides* at your Lexus dealer for details.

1. Ratings achieved using the required premium unleaded gasoline with an octane rating of 91 or higher. If premium fuel is not used, performance will decrease. **2.** Performance figures are for comparison only and were obtained with prototype vehicles by professional drivers using special safety equipment and procedures. Do not attempt. **3.** Mark Levinson® is a registered trademark of Harman International Industries, Inc. **4.** Availability and accuracy of the information provided by the Navigation System or any XM services mentioned (if installed) are dependent upon many factors. Use common sense when relying on information provided. Services not available in every city or roadway. Periodic Navigation updates available at additional cost. Please see your *Navigation System Owner's Manual* or contact XM for details. **5.** Lexus Enform® and Safety Connect™ are available. Contact with the Lexus Enform and/or Safety Connect response center is dependent upon the telematics device being in operative condition, cellular connection availability, navigation map data and GPS satellite signal reception, which can limit the ability to reach the response center or receive emergency support. Enrollment and Telematics Subscription Service Agreement required. One-year trial subscription available only with new vehicle purchase of Lexus Enform- and Safety Connect-equipped vehicles. Additional subscription terms available; charges vary by subscription term selected. **6.** Lexus Enform premium services Destination Assist and eDestination will function in the contiguous United States and Washington, D.C. These services may also function in Hawaii and limited areas of Alaska for vehicles that contain map data for those states. They will not function in Canada or in other countries outside the United States. **7.** Class based on Luxury Coupe, Hardtop Convertible segmentation, retractable hardtop competitors. **8.** iPod® is a registered trademark of Apple Inc. All rights reserved. **9.** Bluetooth® audio device must be enabled with A2DP and AVRCP. **10.** The SmartAccess system may interfere with some pacemakers or cardiac defibrillators. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system. **11.** The engine immobilizer is a state-of-the-art anti-theft system. When you insert your key into the ignition switch or bring a SmartAccess job into the vehicle, the key transmits an electronic code to the vehicle. The engine will only start if the code in the transponder chip inside the key or SmartAccess fob matches the code in the vehicle's immobilizer. Because the transponder chip is embedded in the key or SmartAccess fob, it can be costly to replace. If you lose a key or SmartAccess fob, your Lexus dealer can help. Alternatively, you can find a qualified independent locksmith to perform high-security key services by consulting your local *Yellow Pages* or by contacting www.aloa.org. **12.** F Sport™ Performance Equipment are aftermarket parts and are not Genuine Lexus Parts and, therefore, may not be used in any application that requires the use of Genuine Lexus Parts. F Sport Equipment is warranted for 12 months from the date of installation or for the balance of the new-car or Certified Pre-Owned (CPO) warranty in force at the date of installation, whichever is greater, when installed by an authorized Lexus dealer. This warranty does not cover maintenance services such as replacement of brake pads/linings and clutch linings. This warranty does not cover noise, vibration, cosmetic conditions and other deterioration caused by normal wear and tear. F Sport Equipment installed by anyone other than an authorized Lexus dealer is warranted for 12 months from the date of purchase only, and the warranty coverage is limited to the replacement value of the F Sport Equipment. This warranty does not cover maintenance services such as replacement of brake pads/linings and clutch linings. This warranty does not cover noise, vibration, cosmetic conditions and other deterioration caused by normal wear and tear. Part failure caused by improper installation by anyone other than an authorized Lexus dealer may void the F Sport Equipment warranty, the new-vehicle warranty or both. **13.** F Sport™ is a trademark of Toyota Motor Corporation. All information presented herein is based on data available at time of printing and is subject to change without notice. F Sport equipment is available exclusively through participating Lexus dealers. See dealers for more detailed information. **14.** 18-in performance tires are expected to experience greater tire wear than conventional tires. Tire life may substantially be less than 15,000 miles, depending upon driving conditions. **15.** To avoid interference with pedal operation, do not install a floor mat on top of an existing floor mat, and each mat must be secured with retention hooks (clips). This floor mat was designed specifically for use in this model and model year vehicle and SHOULD NOT be used in any other vehicle. **16.** With either the front- or rear-brake upgrade, the compact spare tire cannot be used. In the event of a flat, the tire must be repaired or replaced. Brake upgrades will fit 18-in factory option wheels, 18-in Genuine Lexus Accessory wheels or 18-in or 19-in F Sport™ wheels only. **17.** 19-in performance tires are expected to experience greater tire wear than conventional tires. Tire life may be substantially less than 15,000 miles, depending upon driving conditions. **18.** The air intake system has an aftermarket emission certificate only and cannot be sold or financed with a new vehicle. **19.** Vehicle Stability Control (VSC) and Vehicle Dynamics Integrated Management (VDIM) are electronic systems designed to help the driver maintain control under adverse conditions. They are not substitutes for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC and VDIM will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details. **20.** High-friction brakes require periodic inspection and measurement as outlined in the *Warranty and Services Guide*. The pads and rotors are expected to experience greater wear than conventional brakes. Pad life may be less than 20,000 miles, and brake rotor life may be less than 50,000 miles depending on driving conditions. **21.** All the airbag (AB) systems are Supplemental Restraint Systems. All ABs (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions: frontal and knee ABs typically inflate in frontal collisions; side and side curtain ABs in side collisions; Roll-Sensing Curtain ABs at a severe tilt degree, roll or lateral G-force. In all other accidents, the ABs will not inflate. To decrease the risk of injury from an inflating AB, always wear seatbelts, sit upright in the middle of the seat as far back as possible and do not lean against the door. Do not put objects in front of an AB or around the seatback. Do not use a rearward-facing child seat in any front passenger seat. The force of an inflating AB may cause serious injury or death. Please see your *Owner's Manual* for further information/warnings. **22.** The backup camera does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. Cold weather will limit effectiveness and view may become cloudy. **23.** Safety Connect services will function in the United States, including Hawaii and Alaska, and in Canada. The services will not function outside of the United States in countries other than Canada. **24.** Coverage only available in the continental U.S. and Canada. Please see your Lexus dealer for details. **25.** XM services require a subscription after trial period. Subscriptions governed by XM Customer Agreement available at xmradio.com. **If you decide to continue your XM service at the end of your complimentary trial, the plan you choose will automatically renew and bill at then-current rates unless you call 1-800-967-2346 to cancel.** Fees and programming subject to change. Available only to those at least 18 years of age in the 48 contiguous United States and D.C. **26.** HAC is designed to help minimize backward rolling on steep ascents. It is not a substitute for safe driving judgment and practices. Factors including grade, surface conditions and driver input can all affect whether HAC will be effective in preventing a loss of control. Please see your *Owner's Manual* for further details. **27.** Dynamic Radar Cruise Control is designed to assist the driver and is not a substitute for safe and attentive driving practices. Please see your *Owner's Manual* for important instructions and cautions. **28.** 17-in performance tires are expected to experience greater tire wear than conventional tires. Tire life may be substantially less than 20,000 miles, depending upon driving conditions. **29.** EPA-estimated ratings. Actual mileage will vary. **30.** Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. **31.** Bluetooth® technology phones listed on lexus.com have been tested for compatibility with Lexus vehicles. Performance will vary based on phone software version, coverage and your wireless carrier. Phones are warranted by their manufacturer, not Lexus. **32.** For vehicles without available Navigation System, the Lexus Personalized Settings (LPS) Program is a one-time, complimentary offer for new vehicles for the first 12 months from the date the vehicle is sold. Vehicles with Navigation System allow the driver to change settings. Please see your Lexus dealer for more information. **33.** The Tire Pressure Monitor System alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge; do not rely solely on the monitor system. Please see your *Owner's Manual* for details. **34.** Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes bring the vehicle to a stop. Factors including speed, road conditions and driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping. Please see your *Owner's Manual* for further details. **35.** Bluetooth® audio device must be enabled with A2DP and AVRCP. **36.** Currently only available pre-installed on select vehicles. Ask your Dealer Sales Consultant for vehicle application. **37.** Continuous average power, all channels driven, at less than 0.1% THD; 20-20,000 Hz. **38.** Run-flat tire technology is designed for limited emergency use only. If air pressure is lost, vehicle speed must remain below 55 mph; cornering, braking and accelerating must be done with extreme caution; and the tire should be replaced within 100 miles. Please see your Lexus dealer for details. **39.** The Pre-Collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input and road conditions. Please see your *Owner's Manual* for further information.

*Lexus strives to build vehicles to match customer interest, and thus they typically are built with popular options and option packages. Not all options/packages are available separately, and some may not be available in all regions of the country. See lexus.com for information about options/packages commonly available in your area. If you would prefer a vehicle without any or with different options, contact your dealer to check for current availability or the possibility of placing a special order. Specifications, features, equipment, technical data, performance figures, options, and color and trim are based upon information available at time of printing, are subject to change without notice, are for mainland U.S.A. vehicles only. Some vehicles shown with available equipment. See your Lexus dealer for details. Lexus reminds you to wear seatbelts, secure children in rear seat, obey all traffic laws and drive responsibly. **For more information, call 800-USA-LEXUS (872-5398) or visit lexus.com. To learn more about your financing options, contact your Lexus dealer or call Lexus Financial Services at 800-874-7050.** Dynamic Radar Cruise Control is designed to assist the driver and is not a substitute for safe and attentive driving practices. Please see your *Owner's Manual* for important instructions and cautions.
