Expressive design.
Driver-inspired technology.
A category-defying crossover.

Because shattering expectations means nothing if it doesn’t lead to the experience of something greater.

The 2018 Lexus RX.

Experience Amazing
The 2018 RX 350

The 2018 RX 350 features a 295-horsepower, 3.5-liter V6 engine with eight-speed automatic transmission and a suite of premium technology, including Lexus Safety System+, an available 12.3-inch multimedia display with full-screen map, and an available color Heads-Up Display. Front-wheel drive or available all-wheel drive.

RX F SPORT MODELS

Take the RX 350 and RX 450h to the next level with Adaptive Variable Suspension and bold interior and exterior styling, including sport seats with enhanced bolsters, a lower front spoiler and 20-inch alloy wheels with Dark Graphite finish.

RX 450h

The 2018 RX 450h boasts Lexus Hybrid Drive with an Atkinson-cycle V6 engine, 308 total system horsepower, 30-MPG combined estimate, Intelligent Shift Control and all-wheel drive.

RXh shown in Nightfall Mica (left), RX F SPORT shown in Ultra White (center), RXL shown in Silver Lining Metallic (right) // Options shown

RX 350L / RX 450hL

Now, enjoy the RX in a sleek and stylish three-row crossover. Both models offer ample cargo space and additional third-row comforts including power-folding seats and dedicated climate control. Seats six with available captain’s chairs or seven with second-row bench seating. Front-wheel drive (standard on RX 350L) or all-wheel drive (standard on RX 450hL, available on RX 350L).

RX F SPORT shown in Caviar
With a distinct floating roofline and expressive design, the RX makes a statement even before you arrive. Available Premium Triple-Beam LED headlamps feature a three-projector design with an eye-catching L shape. Plus, the first-ever three-row RX features uncompromised styling with added passenger capacity.

**DESIGN BEYOND LUXURY**

Razor-sharp character lines, unmistakable LED illumination and bold, unapologetic accents raise the bar on crossover style.
Same powerful stance. Same signature floating roofline. One noteworthy addition: a third row. From its bold grille to its wraparound LED taillamps, the RX has always challenged conventional design. The RX 350L and RX 450hL continue that same tradition while seamlessly incorporating more cargo space* and seating for up to seven.

PUSHING THE LIMITS OF SPACE AND STYLE

Discover refined styling, comfort and a newly appointed interior in the first-ever seven-passenger RX 350L.

* Cargo space with second row seats in place.
With room for up to seven passengers, you can take on all of life’s curves in the RX 350L and RX 450hL. Whether it’s taking a couple more kids to practice, driving your colleagues to lunch, or making room for your latest antiquing find, the three-row RX has you covered.

**POWER-FOLDING SEATS**

For easy access, simply lift and slide the second-row seat and step into the inviting third row. Plus, both the RX 350L and RX 450hL feature power-folding third-row seats with 50/50 split for added versatility.

**AMPLE CARGO SPACE**

Even with the third row up, the RX 350L and RX 450hL both have more cargo depth than a larger SUV. So, you’ll have plenty of room for the weekend’s purchases—and then some. For added convenience, a Touch-Free Power Rear Door™ is also offered. Simply hold your hand or elbow near the badge to open.

**THE FIRST-EVER RXL**

**THREE ROWS. ENDLESS ADVENTURES.**

Embrace the unexpected with ample cargo space and power-folding third-row seats.
Why take two cars when you can take one? The RX 350L and RX 450hL are designed to ensure everyone can come along for the ride. And with supple leather-trimmed seats, plenty of legroom and dedicated third-row climate control, the longer the road trip, the better.

SEVEN-PASSENGER SEATING

More seats. More possibilities. Open up your world with the first-ever three-row RX. With available six- or seven-passenger seating, it offers the ultimate luxury: flexibility.

Why take two cars when you can take one? The RX 350L and RX 450hL are designed to ensure everyone can come along for the ride. And with supple leather-trimmed seats, plenty of legroom and dedicated third-row climate control, the longer the road trip, the better.

CAPTAIN’S CHAIRS

Ready to take second-row comfort to first-class standards? Now you can with luxurious captain’s chairs, available in Spring 2018. This configuration seats six and creates an aisle that accentuates the inviting feel of the cabin. Meanwhile, a tilt-and-slide seat feature makes access to the third row even more convenient.
The cutting edge doesn’t have to sacrifice ease or comfort. Created with attention to even the smallest details, the RX is filled with an abundance of distinctive extras.

**INTERIOR DESIGN**

**AMBIENT LED ILLUMINATION**

Adding intrigue to the interior, available ambient lighting brightens and dims in a coordinated series to welcome the driver into the RX. Soft lighting also illuminates the area surrounding the vehicle the moment you approach, for added visibility and security.

**HEATED AND VENTILATED SEATING**

Taking luxury further, the available heated and ventilated front seats offer separate heaters and fans in the seat cushions to provide optimum comfort, regardless of the weather. Heated second-row outboard seats are also available in all RX models, including the first-ever three-row RX.

**MULTI-ZONE CLIMATE CONTROL**

Customize the climate around you. Individual settings allow the driver and front passenger to adjust their preferred temperatures. Plus, the RX 350L and RX 450hL feature dedicated climate control for passengers in the third row. To help ensure the cabin stays fresh, an available smog-sensing climate control system automatically switches into recirculation mode if it senses high levels of pollutants outside.
A renowned eye for detail, precision-crafted Yamaha® trim and hand-selected leather come together to create our most refined RX yet.

Art meets technology as handcrafted trim undergoes a meticulous process by expert takumi craftsmen. The available Yamaha Gray Sapele wood is created by the same artisans responsible for producing some of the world’s finest musical instruments. This artful trim marries the natural expression of fine wood with the clean sophistication of brushed aluminum as the opposing materials are layered upon each other. Laser technology then engraves the wood surface to reveal the metallic lines underneath. While an available semi-aniline perforated leather-trimmed interior elevates every drive, and convenient power-folding and -reclining second-row seats offer easy versatility in the RX 350 and RX 450h. In addition, power-folding seats are standard in the third row of the first-ever RX 350L and RX 450hL.
With an available large 12.3-inch high-resolution split-screen multimedia display and Lexus Enform Remote™ mobile app, you can easily see and do more. While an available Touch-Free Power Rear Door harnesses intuitive technology for the height of convenience—a hand or elbow placed near the sensor enables it to open.

**TECHNOLOGY BEYOND TODAY**

Designed around the driver and for the future, the RX offers advanced technology and cutting-edge safety equipment that push the entire industry forward.
PEACE OF MIND, STANDARD

Introducing Lexus Safety System+, an integrated suite of the most advanced active safety equipment ever offered on the RX:

PRE-COLLISION SYSTEM WITH PEDESTRIAN DETECTION

This system\(^2\) is engineered to detect a vehicle or a pedestrian\(^3\) in the path of your Lexus under certain conditions. Should it determine a frontal collision is imminent, it’s designed to automatically prepare Brake Assist\(^4\) for increased brake force and, in some cases, can even automatically brake the vehicle to a stop.

LANE DEPARTURE ALERT WITH LANE KEEP ASSIST

This system\(^1\) utilizes a camera to monitor visible lane markings. If an inadvertent or potential lane departure is detected, it’s designed to warn you and can take corrective measures. And, if Dynamic Radar Cruise Control\(^6\) is engaged, the system can even help you remain in the center of the visibly marked lane, helping to prevent drifting before it occurs.

ALL-SPEED DYNAMIC RADAR CRUISE CONTROL

This system\(^5\) uses radar and camera technology to help you maintain a preset speed and following distance from the vehicle ahead. Whether at highway speeds or in stop-and-go traffic, the system can detect if you get closer than the preset distance and automatically slow your vehicle—even to a complete stop. If driving at highway speeds and the road ahead clears, your Lexus returns to its preset speed.

INTELLIGENT HIGH-BEAM HEADLAMPS

To help provide greater visibility for you as well as other drivers, intelligent high-beam headlamps\(^7\) offer added illumination to help keep you focused on the road. When the road ahead is clear, the system defaults to high-beam mode, then temporarily switches to low beams when it senses the headlamps or taillamps of vehicles ahead.

\(^1\) See your Lexus Owner’s Manual for important limitations and disclaimers.
\(^2\) Pre-Collision System with Pedestrian Detection is a system designed to help reduce the impact speed of frontal collisions involving a vehicle or a pedestrian. It is not a collision avoidance system. Always be alert when operating a vehicle.

\(^3\) Pedestrian detection capability is limited under certain conditions, such as speed, lighting, or weather conditions.

\(^4\) Brake Assist reduces the amount of force necessary to apply the brakes to full brake power.

\(^5\) Available on certain models.

\(^6\) Dynamic Radar Cruise Control is an adaptive cruise control system that maintains a safe distance from the vehicle ahead.

\(^7\) Intelligent High-Beam Headlamps operate automatically and can be turned off when the fog lamp switch is activated.
NAVIGATION SYSTEM

Use the high-resolution multimedia display or your voice to access the available Navigation System. This system can map millions of points of interest across the country and display information in English, French or Spanish. And, in addition to offering up-to-date traffic and weather information, 3D city views, and simulated views of approaching highway junctions, it displays the current speed limit and can automatically display nearby gas stations if you begin to run low on fuel.

LEXUS ENFORM

Lexus Enform elevates connected technology and provides concierge-level convenience. From emergency assistance and a live response center agent to the ability to start your engine remotely and access smartphone apps with ease, our premium suite of connected technology offers peace of mind with every drive.

PANORAMIC VIEW MONITOR

The RX offers passionate design with peace of mind, as seen in the available Panoramic View Monitor. Four high-resolution cameras mounted on the front, sides and rear of the vehicle give drivers a bird’s-eye view of the near environment. Moving View and See-Through View options create a composite image of the vehicle’s surroundings as on-screen guides assist with parking and tight maneuvering.

REMOTE TOUCH

Available Remote Touch allows you to easily move through logical menus of the vehicle’s features. Located centrally for your comfort and convenience, buttons on either side are accessible to both the driver and front passenger.

VOICE COMMAND

Voice Command enables you to place compatible Bluetooth®-enabled phone calls and operate climate, audio and navigation functions using normal, everyday speech. If you say “It’s too hot in here,” for example, the climate control will automatically lower the temperature by four degrees.

DELIVERY AND TECHNOLOGY SPECIALISTS

To help you get the most out of these and other Lexus features, a Vehicle Delivery Specialist will walk you through nearly every setting and function you desire. And to answer questions that arise after delivery, a Vehicle Technology Specialist can offer expert guidance in person or without you ever leaving the driveway via camera-enabled apps like FaceTime. Learn more about these complimentary services at lexus.com/specialists.
MARK LEVINSON® PREMIUM SURROUND SOUND AUDIO SYSTEM

The available 15-speaker, 835-watt Mark Levinson Premium Surround Sound Audio System™ features patented, proprietary Clari-Fi™ technology that restores audio quality from compressed music, resulting in crisp, clear, dynamic sound from any source. This, combined with technology designed to create an expansive “sweet spot” of audio, envelops every passenger in three-dimensional sound that rivals the finest home audio systems.
Engineered to tap into the power of the robust chassis, the optimized suspension delivers precise handling with a strikingly smooth ride. When combined with an array of performance features including a transmission so intelligent it can increase torque at lower speeds for improved acceleration, and an available suspension that can monitor and adjust the shock absorber settings depending on conditions, the result is an SUV that does more than run the show. It stops it.

Experience exhilarating performance with an available F SPORT-tuned suspension, advanced AWD systems, a powerful V6 engine and more.

PERFORMANCE BEYOND EXPECTATIONS
CAPABILITY

POWER

ON DEMAND

RX 350 AND RX 350L

Experience luxury that roars. A 3.5-liter V6 engine with direct and port fuel injection pairs exhilarating power with efficient fuel economy. Combined with a quick-shifting eight-speed transmission, delivering 295 (RX 350) and 290 horsepower (RX 350L), both models offer dynamic performance at every curve.

For even greater control, an innovative dual Variable Valve Timing with intelligence (VVT-i) system offers precise engine performance as it reduces emissions and enhances fuel efficiency. VVT-i monitors the engine’s speed and load, increasing torque at lower speeds for improved acceleration, and boosts performance at higher speeds by adjusting intake and exhaust valve timing.

RX shown in Silver Lining Metallic // Options shown
Inventing the first luxury hybrid was only the first step to pushing the category further. The RX 450h and RX 450hL boast a potent 3.5-liter Atkinson-cycle V6 engine—paired with a powerful electric motor and an Electronically controlled Continuously Variable Transmission—for a combined 308 total system horsepower, instant torque delivery and AWD performance. All without requiring a charge. Both models also feature a Super Ultra-Low Emission Vehicle (SULEV) rating.

Craving efficiency with an edge? The RX 450h F SPORT delivers bold styling and impressive hybrid fuel economy, plus an Adaptive Variable Suspension that’s tuned for exceptional performance.
CAPABILITY

ALL-WHEEL DRIVE

Stay in control with available Active Torque Control all-wheel drive. This intelligent system monitors road conditions in real time, automatically shifting engine power between front and rear axles, while 100% of the power goes to the front wheels during normal driving conditions for improved efficiency. And standard on the RX 450h and RX 450hL, electronic all-wheel drive features a rear electric motor that delivers instantaneous torque to the rear wheels automatically when you need it, with no friction loss.
F SPORT PERFORMANCE

Specially tuned by the same team behind the iconic LFA supercar, the RX F SPORT is engineered to spark attention and adrenaline.

EXCLUSIVE PERFORMANCE DRIVE MODES

To help provide the highest level of responsiveness, the F SPORT comes equipped with exclusive drive modes. Sport S and S+ modes enhance steering and suspension, as well as switch the outer ring of the LFA-inspired tachometer to white. And Custom mode allows you to personalize everything from road feel to responsiveness.

In addition to more aggressive styling inside and out, the RX F SPORT’s exclusive features deliver even more control and exhilarating intensity. An Adaptive Variable Suspension lets you customize the shock absorber settings for improved ride comfort or reduced body lean as you enter and exit turns. The powerful V6 engine emits a throaty engine note when accelerating. And, putting thrilling performance right at your fingertips, paddle shifters offer lightning-quick upshifts and heart-racing split-second downshifts.

RX F SPORT shown in Ultra White // Options shown
**F SPORT STYLING**

The bold F SPORT perspective is obvious throughout the driver-centric interior. In addition to exclusive race-inspired instrumentation and bold aluminum accents, you’ll find performance upgrades, including bolstered sport seats, a perforated leather-trimmed sport steering wheel, aluminum pedals and more.

**F SPORT BOLSTERED SEATS**

Signature race-inspired F SPORT bolstered seats provide the ideal posture, control and visibility for enhanced driving performance. Featuring a unique foam-injected construction and designed to contour to the needs of the driver, their low position helps place the driver’s hip point as close as possible to the car’s center of gravity, for a more dynamic driving experience.

**20-INCH DARK GRAPHITE ALLOY WHEELS**

Punctuating the attitude of the aggressive exterior, exclusive F SPORT 20-inch Dark Graphite alloy wheels enhance the vehicle’s low, powerful stance.

STANDARD FEATURES ON EVERY RX

- Bi-LED headlamps, LED foglamps and daytime running lights
- Leather-trimmed steering wheel and shift knob
- Perforated NuLuxe interior trim (RX, RXh)
- Power-adjustable front seats
- 40/20/40-split folding, reclining second-row seats
- Dual-zone automatic climate control with interior air filter (RX, RXh)
- Power tilt-and-telescopic steering column
- Power rear door
- Lexus Safety System® (Pre-Collision System® with Pedestrian Detection); All-Speed Dynamic Radar Cruise Control®; intelligent high-beam headlamps; and Lane Departure Alert® with Lane Keep Assist.
- Lexus Enform Safety Connect® and Service Connect®
- Complimentary for the first 10 years of ownership.
- Electronic parking brake
- Auto-dimming inside mirror and power-adjustable, heated outside mirrors
- Rain-sensing windshield wipers
- Backup camera®
- 10 airbags®
- SmartAccess® with push-button Start/Stop
- Drive Mode Select
- Lexus Display® Audio with color multimedia display and Scout® GPS Link®® with SunStream™ complimentary through 2023.
- Subscription-free Traffic and Weather updates via HD Radio®
- Voice Command with Bluetooth® and USB smartphone connectivity
- Sirius® Eyes Free®
- Complimentary maintenance services (please refer to the Warranty and Services Guide for details)

ADDITIONAL STANDARD FEATURES (RXL)

- Power-folding and -reclining® 50/50-split third-row seats
- Second-row captain’s chairs® Available Spring 2018 (RXL).
- Power-folding, 60/40-split, heated second-row outboard seats with heated and ventilated front seats (RX, RXh)
- Power moonroof and aluminum roof rails®
- Panoramic glass roof and aluminum roof rails®
- Touch-Free Power Rear Door®
- Blind Spot Monitor® with Intuitive Parking Assist® and Rear Cross-Traffic Braking®, and power-folding outside mirrors
- Intuitive Parking Assist® with Auto Braking®
- Heads-Up Display

INDIVIDUAL OPTIONS

- Premium Triple-Beam LED headlamps with washers, dynamic auto-leveling, LED turn signals, cornering lamps and tail lamps
- Heated leather-trimmed steering wheel
- Heated wood- and leather-trimmed steering wheel
- Heated front seats (RX, RXh)
- Heated and ventilated front seats
- Heated and ventilated front and heated-second-row outboard seats (RXL, RXL Hybrid)
- Second-row captain’s chairs® Available Spring 2018 (RXL).
- Power-folding, 60/40-split, heated second-row outboard seats with heated and ventilated front seats (RX, RXh)

DISCLOSURES 1. Drivers are responsible for their own safe driving. Always pay attention to your surroundings and drive safely. System effectiveness is dependent on many factors including road, weather and vehicle conditions. See Owner’s Manual for additional limitations and details. 2. 18- or 20-inch performance tires are expected to experience greater wear and require more frequent tire rotation. Tires may wear unevenly due to road conditions or driving habits. See Owner’s Manual for additional limitations and details. 3. The tire inflation pressure is based upon the required premium unleaded gasoline with an octane rating of 91 or higher. If premium fuel is not used, performance will decrease. 4. Preliminary mileage estimates determined by Lexus. EPA mileage estimates are not available at time of publishing. Actual mileage will vary. 5. Cargo and load capacity limited by weight and distribution. 6. RX 350L only available on RX 350/RX 350L Seating for six. 7. 2018 RX vs. 2017 RX350/350L comparison. The touchless sensor can be affected by water, weather, dirt and other conditions. It may not operate properly, or may operate unintentionally, under certain conditions. See Owner’s Manual for details. 9. Do not allow passengers to sit in a seat that has been fully or severely reclined while driving. This feature is intended for use only when the vehicle is parked. While the vehicle is being driven, all vehicle occupants should have the seatback upright, sit well back in the seat and properly wear the seatbelts. In the event of a collision, the more the seat is reclined, the greater the risk of death or personal injury. See Owner’s Manual for details. 10. Use only if aware of circumstances surrounding vehicle and it is safe to do so (e.g., do not remotely start engine if vehicle is in an enclosed space). Functionality depends on many factors, such as vehicle and smartphone connectivity. Registration and app download are required. Subscription purchase required after trial. See usage precautions and service limitations in Owner’s Manual. 11. The Lexus Safety System+ Pre-Collision System is designed to help avoid or reduce the crash speed and damage in certain frontal collisions only. It is not a substitute for safe and attentive driving. System effectiveness is dependent on many factors including road, weather and vehicle conditions. See Owner’s Manual for additional limitations and details. 12. The Pedestrian Detection System is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact severity. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians and weather, light and road conditions. See Owner’s Manual for additional limitations and details. 13. Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Factors including speed, road conditions, weather and driver steering input can all affect whether VDIM will be effective in preventing a loss of control. See Owner’s Manual for additional limitations and details. 14. Lane Departure Alert with Lane Keep Assist is designed to read visible lane markers under certain conditions and provide visual and audible alerts when lane departure is detected. It is not a collision-avoidance system or substitute for safe and attentive driving. System effectiveness is dependent on many factors including road, weather and vehicle conditions. See Owner’s Manual for additional limitations and details. 15. Dynamic Radar Cruise Control is designed to assist the driver and is not a substitute for safe and attentive driving practices. System effectiveness is dependent on road, weather and traffic conditions. See Owner’s Manual for additional limitations and details. 16. Intelligent high beam operates at speeds above 25 mph. Factors such as a dirty windshield, weather, lighting and terrain limit effectiveness, requiring driver to manually operate the high beams. See Owner’s Manual for additional limitations and details. 17. Be sure to obey traffic regulations and maintain awareness of road and traffic conditions at all times. Availability & accuracy of the information provided by the Navigation System is dependent upon many factors. Use common sense when relying on information provided. Services & programming subject to change. Services not available in every city or roadway. Updates may be available from your dealer at an additional cost. See Owner’s Manual for details. 18. Be sure to obey traffic regulations and maintain awareness of road and traffic conditions at all times. Apps/services vary by phone/vehicle; functionality depends on many factors. Select apps use large amounts of data; you are responsible for all such data charges. Ask your service provider about data charges. 19. A navigation system should not be relied upon as the only means of route planning. The navigation system does not provide a comprehensive view of the area surrounding the vehicle. You should also look around outside your vehicle and use your mirrors to confirm surrounding clearance. Environmental conditions may limit effectiveness and view may become obscured. See Owner’s Manual for details. 20. Be sure to obey traffic regulations and maintain awareness of road and traffic conditions at all times. Audio/visual system malfunction or failure should at all times. 21. Conventional driving does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. Environmental conditions may limit effectiveness and view may become obscured. See Owner’s Manual for additional limitations and details. 22. All the airbag systems are Supplemental Restraint Systems. All airbags (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions. To decrease the risk of injury from an inflating airbag, always wear seatbelts and sit up right in the middle of the seat as far back as possible. Do not put objects in front of an airbag or around the seatback. Do not use a rear-facing child seat in any front passenger seat. See Owner’s Manual for further information & warnings. 23. The SmartAccess system may interfere with some pagers or cellular/2-way radios. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system. The engine immobilizer is a state-of-the-art anti-theft system. When you insert your key into the ignition switch or bring a SmartAccess fab into the vehicle, the key transmits an electronic code to the engine. The engine will only start if the code in the transponder chip inside the key/fob matches the code in the vehicle’s immobilizer. Because the transponder chip is embedded in the key/fob, it can be costly to replace. If you lose a key or fob, your Lexus dealer can help. Alternatively, you can find a qualified independent locksmith to perform high-security key services by consulting your local Yellow Pages or by contacting www.key.com. 24. Availability & accuracy of the information provided by Scout® GPS Link is dependent upon many factors. Use common sense when relying on information provided. Services & programming subject to change. Services not available in every city or roadway. See lexus.com for details. 25. Scout® is a registered trademark of TeleNav, Inc. 26. All times are driver’s responsibility to take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Factors including speed, road conditions, weather and driver steering input can all affect whether VDIM will be effective in preventing a loss of control. See Owner’s Manual for additional limitations and details. 27. The Lexus Backup Camera does not provide a comprehensive view of the area surrounding the vehicle. It may not be able to detect all objects or may not detect objects at certain distances. See Owner’s Manual for additional limitations and details. 28. The backup camera does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. Environmental conditions may limit effectiveness and view may become obscured. See Owner’s Manual for additional limitations and details. 29. The airbag systems are Supplemental Restraint Systems. All airbags (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions. To decrease the risk of injury from an inflating airbag, always wear seatbelts and sit up right in the middle of the seat as far back as possible. Do not put objects in front of an airbag or around the seatback. Do not use a rear-facing child seat in any front passenger seat. See Owner’s Manual for further information & warnings. 30. The SmartAccess system may interfere with some pagers or cellular/2-way radios. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system. The engine immobilizer is a state-of-the-art anti-theft system. When you insert your key into the ignition switch or bring a SmartAccess fab into the vehicle, the key transmits an electronic code to the engine. The engine will only start if the code in the transponder chip inside the key/fob matches the code in the vehicle’s immobilizer. Because the transponder chip is embedded in the key/fob, it can be costly to replace. If you lose a key or fob, your Lexus dealer can help. Alternatively, you can find a qualified independent locksmith to perform high-security key services by consulting your local Yellow Pages or by contacting www.key.com. 31. The availability & accuracy of the information provided by Scout® GPS Link is dependent upon many factors. Use common sense when relying on information provided. Services & programming subject to change. Services not available in every city or roadway. See lexus.com for details. 32. The registered trademark of TeleNav, Inc. 33. All times are driver’s responsibility to take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Factors including speed, road conditions, weather and driver steering input can all affect whether VDIM will be effective in preventing a loss of control. See Owner’s Manual for additional limitations and details. 34. A navigation system should not be relied upon as the only means of route planning. The navigation system does not provide a comprehensive view of the area surrounding the vehicle. It may not be able to detect all objects or may not detect objects at certain distances. See Owner’s Manual for additional limitations and details. 35. Intuitive Parking Assist is designed to assist drivers in avoiding potential collisions at speeds of 9 mph or less. Certain vehicle and environmental factors, including an object’s shape and composition, may affect the ability of the IPA to detect it. Always look around outside the vehicle and use mirrors to confirm clearance. See Owner’s Manual for additional limitations and details. 36. The backup camera does not provide a comprehensive view of the area surrounding the vehicle. It may not be able to detect all objects or may not detect objects at certain distances. See Owner’s Manual for additional limitations and details. 37. Intuitive Parking Assist (IPA) is designed to assist drivers in avoiding potential collisions at speeds of 9 mph or less. Certain vehicle and environmental factors, including an object’s shape and composition, may affect the ability of the IPA to detect it. Always look around outside the vehicle and use mirrors to confirm clearance. See Owner’s Manual for additional limitations and details. 38. The backup camera does not provide a comprehensive view of the area surrounding the vehicle. It may not be able to detect all objects or may not detect objects at certain distances. See Owner’s Manual for additional limitations and details. 39. Braking performance is dependent on road, weather and vehicle conditions. See Owner’s Manual for additional limitations and details. 40. All times are driver’s responsibility to take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Factors including speed, road conditions, weather and driver steering input can all affect whether VDIM will be effective in preventing a loss of control. See Owner’s Manual for additional limitations and details. 41. All times are driver’s responsibility to take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Factors including speed, road conditions, weather and driver steering input can all affect whether VDIM will be effective in preventing a loss of control. See Owner’s Manual for additional limitations and details. 42. All weather floor liners/mats are model-specific with model names. Floor liners/mats are designed for use in a specific model and model year vehicle and SHOULD NOT be used in any other vehicle. To avoid potential interference with pedal operation, each liner/mat must be secured with its fasteners. Do not install a floor liner/mat on top of an existing floor liner/mat. 43. Accessory roof rail cross bars not recommended for luggage. 44. Please consult your Lexus dealer or Owner’s Manual for towing and load specifications. 45. Before towing, confirm your vehicle and trailer are compatible, hooked up and loaded properly and that all necessary additional equipment is installed. 46. Equipment not included. 47. Maximum towing capacity depends on the total weight of any cargo, occupants and available equipment. 48. Lexus Universal Tablet Holder is intended for passengers only. Drivers should always be sure to obey traffic regulations and maintain awareness of the road and traffic conditions at all times. Use of aftermarket accessories may pose an increased risk of injury to occupants in the vehicle in the event of an accident. Tablet, phone, music and video player sold separately.
