

MAYBACH

MAYBACH 57 S EQUIPMENT & PRICES

Valid from July 2, 2007

## DYNAMISM REDEFINED.

Taut lines and smooth curves. Exquisite interplay between light and shadow. One look is all it takes to discern that the Maybach 57 S is the epitome of dynamic elegance. Featuring an inimitable blend of impressive performance, the ultimate in comfort and exclusivity of the very highest calibre, it is one of the world's few truly awe-inspiring cars. Created for individualists with a penchant for employing slightly more unconventional means to express their

notion of contemporary luxury. For those with a desire to enjoy to the full the values which the Maybach brand represents: stylish comfort, sublime beauty, technical brilliance and supreme craftsmanship. The Maybach 57 S skilfully fuses these characteristic traits with an exceptional, athletic vibrancy which is clearly apparent in its dynamic, harmonious aspect and stems from a succession of exceptional design features. A distinctive radiator grille with double

louvres crowned by the classic double-M. Main headlamps majestically finished in the vehicle colour. Fog lamps with elegant chrome surrounds. And a custom-designed exhaust system with two visible tailpipes. These and many other technical and aesthetic details lend an impression of thrust to this high-end luxury automobile, whose crowning glory is a powerplant without equal: the most powerful engine ever seen in a Maybach.

## MAYBACH 57 S

A displacement of 6.0 litres. Twin turbochargers. An output of 450 kW/612 hp and a peak torque of 1000 Nm. Having undergone a painstaking programme of refinement at the Mercedes-AMG engine manufacturing facility, the Maybach V12 powerplant drives the Maybach 57 S to deliver exceptional performance and permits a fleet-footedness that belies the vehicle's impressive proportions. Thanks to the meticulous attention to detail shown

by the Maybach engineers, the Maybach 57 S leaves absolutely nothing to be desired in terms of the brand's hallmark luxurious comfort, even at high speeds. Visible examples of this perfectionism include the exclusive 11-spoke 8.5 J x 20-inch wheels with sports tyres, which provide exceptional grip as well as precise, direct steering feel. This wheel/tyre combination also contributes to the high degree of directional stability when accelerating and the

good handling when taking tight bends at speed. A discreet yet effective feature is that the chassis has been lowered by 15 mm, not only enhancing the car's dynamic appeal but also, in conjunction with the responsive AIRMATIC Dual Control air suspension, further improving handling dynamics and directional stability. So look forward to an experience in which each yard covered and each bend taken is a moment of the purest enjoyment.

The vehicle referred to in the price list returns fuel consumption figures (urban, extra-urban and combined) of 24.6/11.8/16.4 l/100 km and CO<sub>2</sub> emissions (combined) of 405 g/km. The figures shown were obtained in accordance with the prescribed measuring process (Directive 80/1268/EEC in the currently applicable version). The figures are not based on an individual vehicle and do not constitute part of the product offer; they are provided solely for purposes of comparison between different vehicle models.

All purchase prices refer to the standard specification, ex manufacturing plant. Deliveries from other locations will incur additional delivery charges. Purchase prices for optional extras only apply if these items are installed at the manufacturing plant. Correct at the time of going to press, errors and omissions excepted, although changes may have been made to the design and specification in the meantime.
