PLUS 4
SUPER SPORTS
...IS BACK
At the 1950 Earl’s Court Motor Show Morgan introduced the 2088cc Plus 4 car to the world. This highly capable machine became the platform for annual innovative performance upgrades within the company. The perfect balance between engine size and weight was the catalyst for the birth of the Plus 4 Super Sports race-ready car. This car introduced the famous low-line aluminium body and a highly tuned mechanical specification taking Morgan to victory in their class at the 1962 Le Mans 24 hour race. This groundbreaking success encouraged Peter Morgan to introduce many permanent additions to the Plus 4 which has continued to evolve to this day.

To celebrate this during the sixth decade of the Plus 4, Morgan Motor Company in collaboration with Aero Racing Ltd. is proudly reintroducing the limited edition Plus 4 Super Sports.

Like its sixty year old predecessor, the 2011 Plus 4 Super Sports features a carefully considered specification including an array of performance upgrades, track inspired accessories and fashionable sixties themed aesthetics. This truly versatile car contains all the reliability of the modern Morgan but with a large injection of legendary sixties racing spirit.

### Interior Specification
