

CHRYSLER

## 2007 TOWN & COUNTRY

### Five-Star Front & Side Impact Crash test Rating\*

Chrysler Town & Country received a five star rating—the highest government front and side crash test rating\* for LX, TOURING, and LIMITED. Town & Country brings together spaciousness, style, and safety so you and your passengers or cargo can look great on the road, and feel safe while you're there.

\* Side-impact rating on long-wheelbase models only.

*Properly secure all cargo.*

### STOW 'N GO SEATING®

Everyone knows that Town & Country has plenty of passenger space...but what about cargo room? With the unique Stow 'n Go® feature available exclusively on long wheelbase models, a pair of storage bins provide an additional 12 cubic feet of storage space in the second row, allowing you to bring a variety of items along for the ride, too.

### EASY OUT ROLLER SEATS®

Easy Out Roller Seats®, available exclusively on short wheelbase Town & Country models, slide effortlessly out of the vehicle on aircraft-style wheels, allowing you to create an array of cargo-carrying layouts quickly and easily.

*Properly secure all cargo.*

### SEATING FEATURES

7 seats to 2 in about 30 seconds is as easy as 1,2,3. Chrysler's minivan-first two-row Stow 'n Go® seating and storage system provides unmatched convenience, versatility, and storage. The second- and 60/40 split third-row seats fold into the floor quickly and easily, so you can go from seven seats for hauling the whole family to two for hauling everything else in about 30 seconds. Stow 'n Go® seating is standard on LX, Touring, and Limited.

Your third-row seats also flip back to provide tailgate seating. Put it together, and you'll have all the seating flexibility you and your family will need—just the kind of innovation you expect from over twenty years of minivan leadership.

For more information, please visit [www.chrysler.com/town\\_country](http://www.chrysler.com/town_country)

### Three-Zone Temperature Control

#### Three-Zone Temperature Control

Thanks to the three-zone temperature control feature, the driver, front passenger and rear occupants can all choose the climate control settings they're most comfortable with, independently of everyone else in the vehicle. An automatic version of the system is standard on Town & Country Limited and is available on Touring, which comes standard with a manual version that is also available on LX models. A dual temperature control system is standard on short wheelbase models.

#### Quiet

Town & Country provides a quiet, comfortable ride. Its rigid body structure not only contributes to solid ride and handling characteristics, but also minimizes the transmission of road noise, vibration, and harshness (NVH). Engine mounts, suspension bushings, and the entire underbody structure have been designed to diminish NVH. All this quiet lets drivers enjoy the road, while passengers enjoy Town & Country's available entertainment systems.

#### Power Moonroof

The power of luxury goes right to the top of Town & Country with an available power moonroof\*. With the touch of a button you can use the vent or open it all the way to let in the moon and stars.

*\* The moonroof is not available with side-curtain airbags or overhead rail system.*

*The moonroof replaces the standard items of side-curtain air bags and overhead rail system.*

### ENGINEERED SAFETY AND SECURITY

Town & Country was designed and engineered with your family in mind to help make every trip as secure as possible. Standard on Short and Long wheel based models are Advanced Multistage driver and front passenger air bags\* with an Occupant Classification System\* (OCS). The Occupant Classification System\* (OCS) adjusts the deployment force of the passenger side front airbag based on passenger weight. A standard driver's inflatable knee blocker† adds additional protection in the event of a collision.

Supplemental side-curtain air bags† for all three rows offer additional protection to outboard occupants. They are standard on Limited and available on all Town & Country models.

*\* Always use seat belts. Remember, a back seat is the safest place for children 12 and under.*

*† Always sit properly with the seatbelt fastened.*

S = Standard, P = Included in package noted in parentheses, 0 = Optional.

<sup>(1)</sup> Detects most obstacles. As with all electronically controlled systems care is advised. <sup>(2)</sup> Always sit properly in the seat with the seat belt fastened. Always observe the passenger air bag indicator lamp to determine if the OCS classification is appropriate. Children 12 and under should always be in a backseat correctly using an infant or child restraint system or the seat belt positioned correctly for the child's age and weight. <sup>(3)</sup> The moonroof is not available with side-curtain air bags or overhead rail system. The moonroof replaces the standard trim of side-curtain air bags and overhead rail system. <sup>(4)</sup> For children at least one year old, weighing between 22 and 50 pounds and no more than 47 inches tall. <sup>(5)</sup> Always check entire surroundings before backing up. <sup>(6)</sup> Must use Bluetooth® compatible phone. Replaces the lower instrument panel bin storage with a faceplate trim cover.
