Choose your Elantra: Bold, bolder or boldest.

For decades, drivers looking for a sedan that is exceptionally satisfying to own have chosen Hyundai Elantra. In fact, Elantra’s loyal appeal has been a key reason why more people who buy a midsize buy another — more than any other car in its class. That’s according to an annual survey by Brand Keys, which ranks Hyundai’s customer loyalty for the past 15 years in a row.

With all it has going for it, the question isn’t “Why Elantra?” The question is “Which Elantra?” You can choose your Elantra based on three types of power: For starters, there’s Elantra SE, SEL and Limited with a traditional 2.0L gasoline engine that strikes the right balance between stirring performance and fuel-sipping efficiency. With Elantra N Line, a 1.6L Turbo engine complements its sporty looks, offering you the feels of a tuned-up performance. Elantra N — our ultimate performer — is powered by a 2.0L turbocharged engine. For a different kind of performance, there’s the Elantra Hybrid. Hyundai 2022 Elantra Hybrid and Electric Car for the Money by U.S. News & World Report. It delivers a recharging time of 0.67 kilowatt-hours with 120 kWh battery.

No matter which one you choose, your Elantra will draw attention on looks alone thanks to its slim-sleeked shape, while ravishing grille, stylish lighting and squared coupe-like profile. Inside, Elantra’s modern interior is centered around an available 10.25” touchscreen — the largest in its class. It’s big on space, too, with class-leading rear-seat legroom and a total interior volume that’s surprisingly large for a compact car.
With Elantra, power comes naturally.

Elantra's power trio starts even before you step into your car. Hyundai's available UVO Key can unlock the front doors using your compatible smartphone. Placing your phone on Elantra's available wireless charging pad then enables the car's push button engine start.

But the real power flows from a 2.0-liter, 147-hp Digital Cycle engine paired with a 6-speed automatic transmission. On the highway, Elantra's Digital Cycle was quiet and smooth, but the EPA-estimated 24/42/33 mpg does give you the power to make fewer refueling pit stops.

Turn the steering wheel at touch the brakes, and it's butterfly obvious that Elantra can handle itself in a curve, holding a firm bond between you and the road. With Drive Mode Select, Elantra even lets you choose a driving dynamic to match your mood. So you want to maximize Elantra's fuel economy? In that case, you'd select Eco mode. Want the response of your car's engine and transmission to give you more of a performance feel? Select Sport mode. Other modes include Snow and Normal.

Speaking of modes, Elantra moves with quiet confidence. Hyundai engineers devoted extra effort on the details that reduce NVH—body engineering, short-hood bonnet, vibration and harshness. The seal of each door's glass was made tighter and more precise to help keep high-frequency noise from intruding on the peace of the passenger cabin. After all, you deal with enough noise in the real world, don't you? Let Elantra be your sanctuary.
N Line or Hybrid:
Performance is a matter of perspective.

Performance can mean different things to different drivers. To some, it means more power. To others, performance is defined by efficiency. Either way, the Elantra model range delivers on your desires.

For drivers seeking more power, the Elantra N Line offers a turbocharged 201-hp punch. Controlling all of that power is a 7-speed Dual Clutch Transmission with paddle shifters and a sport-tuned suspension. With each gear shift, you’ll feel the engine’s crisp notes carrying from chrome-tipped dual exhaust outlets. With each turn of the wheel, you’ll feel the firm grip of performance tires on 18-inch wheels.

Want to optimize your fuel economy and reduce your carbon footprint? The Elantra Hybrid offers an advanced hybrid powerhouse with engine-stop/diesel fuel economy. Elantra Hybrid Blue features an ECO-optimized 6-speed automatic transmission that’s more efficient than Toyota Corolla Hybrid. All from a 1.6L, 139-hp engine and 52 kWh electric motor that combines for 138 horsepower and 195 lb-ft of torque.

Both Elantra N Line and Elantra Hybrid feature a multi-link rear suspension for confident steering. And both come equipped with unique braking systems that offer enhanced performance compared to standard Elantra models.

So whether you press the pedal on the right, or the pedal on the left, the power is unforgettable. No matter how you choose to define it.
Take driving to the Nth degree. With Elantra N.

Part of our inspiration for the N designation is a high-performance N model in the legendary Nürburgring race track in Germany. To fulfill this ultimate test for a performance car—a single lap of this historic, turning road circuit is nearly 13 miles long with 174 curves. So everything about Elantra N is engineered to embrace the demands that the Ning makes on a performance car’s steering, braking and handling dynamics.

Its “Flat Power” 2.0L turbocharged engine delivers 275 horsepower and 269 lb-ft of torque. The suspension is stiff. The steering ratio is quicker. The brakes are better. There’s even a variety of drive modes, including a Full-Ni performance setting and two custom modes accessed by blue steering wheel buttons. Press the red buttons on the steering wheel, and you’ll trigger an N Drive SW app that adds 10 horsepower for 10 seconds.

Elantra N loves launching down straightaways. Thanks to Standard Launch Control. Armed with the available 8-speed Dual Clutch Transmission and N Power Shift (which optimizes torque reduction during wide-open throttle upshifts), you’ll sprint from 0-60 mph in about 5 seconds on the test track.

With its multi-link rear suspension enhanced by a host of high-performance additions, Elantra N also loves corners. It’s a sporty handling app for Corner-Centric Differential Reinforcement lower control arms, which move fronts and four-link suspension lower control arms respectively. The rear lower control arm also moves to accommodate the rear hub. The combination optimizes suspension performance.

Illuminates a strong side-cut light of 150W output, plus LED lights. These headlights with LED lights shine farther, brighter, and more efficiently than conventional halogen or LED headlights. The LED lights shine farther, brighter, and more efficiently than conventional halogen or LED headlights. The new headlight technologies illuminate the road ahead with increased visibility, reducing the risk of accidents.

With 19”-inch wheels, an aggressive profile, LED headlights, and large, dual exhaust tips in motion, Elantra N is ready to take on the track, the road, or your daily commute. Whether you’re ready for a new adventure or just want to make a statement, Elantra N has everything you need to take your driving to the Nth degree.
Our high standards of safety come standard.

Since 2023 Elantra comes standard with an array of Hyundai SmartSense technologies designed to help protect you where you need it. Even after you’ve left your seat, features like Rear Cross Traffic Alert help ensure your family’s safety. Beneath its curves, Elantra’s body construction is a solid foundation for advanced high-strength steel and bonded by aircraft-quality adhesives. It’s a rigid frame engineered to help optimize Elantra’s handling response and help protect the passenger cavity. In the event of a collision, Hyundai’s front-end Elantra models equipped with Forward Collision-Avoidance Assist and LED headlights have earned an IIHS TOP SAFETY PICK rating for the last 7 consecutive years as of 2023.
Here, comfort and convenience are key.

It starts with the availableHyundai Digital Key, which lets you unlock your Elantra’s front doors and start the engine using your compatible smartphone. Multiple drivers can be assigned a digital key that instantly relieves personalized audio system preferences, driver seat/steering wheel positions, and more.

Once inside, you’ll enjoy Elantra’s spacious cabin and seat-in-class rear seat legroom. Available features like 60/40 split-folding rear seats and a hands-free smart trunk release create easy loading, cargo room that makes Elantra a practical option. An available power sunroof adds to the separateness. And Elantra’s available ambient lighting lets you set the mood to any of 14 colors.

Dynamic Voice Recognition is also available for a fundamental breakthrough in convenience. Your conversational voice adjusts climate controls, selects BlueLink® channels and more. Stayin’ in-the-know is as easy as asking your Elantra “How’s the stock market today?” at “What did the playoff game start?”

Seated in an Elantra Limited or Limited XL, ventilated front seats cool you, and a 10.25” digital instrument display and 10.25” high-resolution navigation system are integrated into a single cover of glass. Salsa into Elantra N or Elantra N Line, and a sport steering wheel and bolstered sport seats fully intensify you in the performance of your car.
Remote control for your Hyundai. And your day.

Elianta might be the ultimate way to upgrade your mobile device. Thanks to BlueLink® Elianta is available with a comprehensive suite of safety, convenience and luxury features that let you interact with your car—and the rest of your digital life—in powerful, practical ways.

If you’re like most drivers these days, the BlueLink features will soon outgrow the car’s capabilities. With the MyHyundai app, you can use BlueLink to start your car’s engine, adjust the climate control—even stream the available heated seat feels—from the comfort of your office or classroom using your smartphone or smartwatch,* or your Amazon Echo®, Google Home Mini™ or virtual assistant.*

Starting your Elianta remotely, or with the available Hyundai Digital Key, turns your car’s passive and active key fob functions into the MyHyundai app, making using your BlueLink personal profile and available integrated Memory System steps before you step behind the wheel. Want to remotely check to see if you’ve left your keys unlocked or the lights on? Open your MyHyundai app for the answer.*

(Elianta’s standard Apple CarPlay® and Android Auto™ are available with the segment’s first wireless smartphone connection.) Want to stream your music? Elianta’s BlueLink app can connect two phones to the audio system simultaneously. And to keep everyone powered up, Elianta offers dual USB charge ports and is available with wireless device charging.*

Automatic Emergency Assistance
BlueLink Connected Care offers 2017-2021 Emergency Assistance as well as Streamed Video. When you’re in a serious accident your vehicle automatically alerts emergency services or附近 Vehicle Health Reports.*

On-Demand Diagnostics
Real-time diagnostics from your MyHyundai mobile app report issues of a problem, the cost to repair, the location of a nearby Hyundai dealer, and show how to rectify repairs. Or directly send a service report to your nearest Hyundai dealer.*

Destination Send to Car
Use your smartphone to find a destination or route of interest, then send the destination to your vehicle using your MyHyundai app. BlueLink can tell your car where to go.*

Remote Vehicle Controls
Use your smartphone to remotely turn on your vehicle or unlock your car door from anywhere. Or set your car’s climate, navigation, and more.*

Hyundai Care Finder
Find your Hyundai dealer, Systems diagnosis, or even vehicle maintenance through the MyHyundai app.*

Remote Vehicle Status
Monitor how much fuel is in your tank, your vehicle’s health, and more. Your vehicle status and data is live and available to answer your questions 24/7.*
