IONIQ 5
IONIQ 5:
The first of its kind.

If you’ve been waiting for an electric vehicle to take a huge step forward, the wait is over: introducing the all-new, ultra-fast charging next-gen electric SUV. And the first electric vehicle engineered to be exclusively all-electric.

IONIQ 5 combines what no electric vehicle has before: ultra-modern design, ultra-fast charging, innovative cabin space. Exceptional performance. And a cruising range of over 300 miles on a full charge.

With its Pixel-inspired light clusters, channel hood and automatically retracting side mirrors, one look lets you know IONIQ 5 is exceptional. Sustainability matters. Its design signals a new era is on the horizon — and with it, an entirely new series of all-electric vehicles from Hyundai.

Flex from the simplest components of most vehicles. (IONIQ 5) optimizes the potential of its powertrain with dynamic design. This having a plug-in powertrain means IONIQ 5 rides on a longer wheelbase and features a longer front, opening up the interior for more space.

Stop inside, and you’ll see how the futuristic dashboard and center stack — along with an available sliding center console and wireless charging pad — give you more freedom.

The new IONIQ 5 also uses technology in ways that give you more time. And more choices. Best-in-class after-facelift charging: from 10 to 80 percent takes just 19 minutes. Not only does it charge faster, but it’s a vehicle on Low CO2; two-way vehicle-to-load capability acts as a power source for bigger electronics like your laptop, e-bike and TV.
Power at the speed of life.

IONIQ 5 outs the charge in minutes with a 220-vp Rear-Wheel-Drive powertrain and up to a combined 444 hp and 605 lb-ft of torque, making it one of the most powerful electric vehicles. When you add the rear-wheel drive, it’s capable of 0-60 mph in just 5.2 seconds. The speed of IONIQ 5 charging is even more impressive. Plug into an ultra-fast NCPA charger for 5 minutes, and you’ll add up to 68 miles to your driving range.

IONIQ 5 offers four driving modes (Eco, Sport, Sport+ or Normal) to suit your preferences or road conditions. An available "Rechargeability Display with Augmented Reality" lets you view your driving status and navigation at glance. Time to power up? It’s as quick as - IONIQ 5 owners get two years of unlimited 48-minute charging sessions using Electrify America’s national network of DC Fast-Charging stations. And here’s something else to help you go the distance: The ionIQ 5's battery pack is guaranteed for 10 years or 125,000 miles.

IONIQ 5 is flush with technology that keep drivers safer and less stressed. One example: Forward Collision-Avoidance Assist. A fusion of radar and camera sensors monitors for pedestrians, cyclists and vehicles that are moving or stopped in front – as well as vehicles that are stopped in front. When you need it, automatic braking and steering assist are applied as necessary to help avoid a collision.

Hyundai SmartSense Technologies

- Highway Driving Assist
- High Beam Assist
- Lane Keeping Assist
- Lane Following Assist
- Forward Collision-Avoidance Assist with Pedestrian & Cyclist Detection
- Rear View Monitor
- Blind Spot Curtain Assist
- Blind Spot Monitor
- Power Rear Door

Premium Heads-Up Display with 3D Functions

- Blind Spot View Monitor

Mobile power strip.

IONIQ 5 is available with a fully integrated vehicle-to-load (V2L) power system. Use your vehicle’s battery to recharge power tools, bikes or phones for your next camping trip. An available optional 110-volt accessory allows IONIQ 5 to provide power even when the vehicle is not.

Getting ready: IONIQ 5 is available with a 50.5-kWh battery and a 58.1-kWh battery. The 50.5-kWh battery is capable of 250 miles of driving, while the 58.1-kWh battery range varies from 320 to 335 miles.

Charging IONIQ 5 is easy. plug in at your next rest stop, or plug into a home charger. The 50.5-kWh battery is fully charged in about eight hours, but the 58.1-kWh battery takes about 11 hours to charge.

FINISH
Your mobile living room.

When interior designers see how much interior space IONIQ 5 has for four people, they come up with a broad vision. Why not think of it as a smart living room? After all, IONIQ 5 has more comfort and more room to spread out than any vehicle in 3 places! Along with more space for you and your passengers, there’s more cargo room. And more real estate on the dash for a pair of 13.3” high-definition display screens – one for the instrument cluster, the other for navigation and entertainment.

Beyond space, our designers asked for ways to make you incredibly comfortable. The driver seat is available with a reclining seat function that supports your legs while you rest. The front seat design is tailored to allow more space for 3rd row passengers. These 2nd row seats also allow for multiple seating options – or fold down to dramatically increase the cargo space. Dual USB charging ports and an available Vehicle-to-Load (V2L) two-way power bank under the 2nd row seats ensure power is available throughout the cabin for your electronic devices.

Between the front seats, IONIQ 5’s center console is like a floating island with an available sliding feature that moves back and forth to create more freedom of access. The center console also offers ample storage space for your laptop, a wireless charging tray and includes a large storage compartment as well. So it’s packed, nice, and look up through the expansive glass roof in your IONIQ 5, the future has arrived.
Turns out the key to happiness isn’t actually a key. It’s an app.

What Hyundai offers its owners goes beyond our award winning vehicles. It includes BlueLink®, a range of innovative technologies that aren’t remarkable connectivity between you and your vehicle.

With the BlueLink app, you can remotely start your vehicle and adjust climate controls from your office or vehicle using your smartphone, Amazon Echo® or Google Home® smart assistant. You can also remotely activate front seat heating or available ventilation, and check to see if you’ve left a key or open key in your vehicle.

Download the available Hyundai Digital Key on your compatible Android™ smartphone, and you can use it unlock the door locks and turn off the vehicle. You can also assign digital keys to multiple drivers, who can instantly activate their personalized radio presets, instrument cluster display preferences and driver seat settings.

Every 1050Q comes standard with Apple CarPlay® and Android Auto™, and you can now control two phones to the audio system simultaneously via Bluetooth streaming. Good to know you can easily keep your digital devices powered up, too. A wireless charging pad is available, and three front USB charge ports are standard.

Hope makes every Hyundai better.
Each time we sell a new Hyundai, a portion goes to Hyundai Hope On Wheels® to help find a cure for childhood cancer. Over the last 23 years, Hyundai Hope On Wheels has donated more than $185 million. Hope is our greatest feature. And it comes standard on every Hyundai. For more information, please visit HyundaiHopeOnWheels.org.

Complimentary maintenance includes Hyundai-approved oil and oil filter change (except for electric vehicles and fuel cell electric vehicles) plus tire rotation at normal factory-scheduled maintenance intervals for 3 years or 36,000 miles, whichever comes first. More frequent maintenance due to severe driving or conditions is excluded. Offer valid only for new 2020-2022 Hyundai models purchased or leased on or after February 1, 2020. See your Hyundai dealer for further details and limitations.

Our commitment to Hyundai owners does not end with the transfer of keys. Wherever the road takes you, we've got your back with Owner Assurance, an umbrella of services and benefits that includes America's Best Warranty, 24/7 Roadside Assistance, innovative safety and car care features...and more.
