JEEP RENEGADE® 4x4 SYSTEMS

JEEP ACTIVE DRIVE Put your capability on automatic pilot. This available 4x4 system does the work for you, targeting exactly when you need a boost of traction. It features a single-speed Power Transfer Unit (PTU) that combines proven Jeep Brand capability with welcome efficiencies to deliver a double whammy of 4x4 prowess and efficiency. Jeep Active Drive can seamlessly transition from FWD to 4WD and back again, thanks to the system’s smart rear-axle disconnect that operates in tandem with the available Selec-Terrain® Traction Management System’s Auto mode. Under normal driving conditions, the front wheels provide most of the traction; however, should the front wheels start to lose grip, power automatically transfers to the rear wheel(s), so you seamlessly maintain optimal traction without having to take additional action.

JEEP ACTIVE DRIVE LOW This system gives Trailhawk its superpowers to easily conquer tough ridges, rocks and weather or the extra determination to pull a boat out of a lake. This one-speed system features Hill Descent Control that adds extra control over throttle, speed and braking, allowing you to smoothly travel down steep hills. Dial in to Rock mode when you need the boost of a 21:1 crawl ratio. Exclusive to Trailhawk.
SELEC-TERRAIN® GRIPPING CAPABILITY

The Selec-Terrain® Traction Management System quickly tailors your traction control with the turn of a dial. In an instant, you’ve got the right amount of grip and capability for the type of terrain you’re facing. By coordinating many vehicle systems, you’re able to navigate the most challenging conditions with ease. Dial settings include Auto, Snow, Sand, Mud and, exclusive on Trailhawk®, Rock mode.

AUTO
In this mode, Selec-Terrain does all the work, automatically adjusting vehicle dynamics to best suit the road. To help ensure optimal efficiency, the rear driveline disengages when not needed.

SNOW
Adjusts for ultimate performance over snow- and ice-covered roads by maximizing vehicle stability and minimizing oversteer. Major systems auto-engaged and managed in this mode include antilock brakes and traction control.

SAND
Converts to a uniquely calibrated Sand mode that utilizes an aggressive throttle and upshift points to tackle looser, sand-covered surfaces.

MUD
Maintains low-speed traction by allowing additional wheel-slip via specifically tuned chassis controls, differentials and transmission ratios that are geared to successfully tackle mud.

ROCK
Exclusive to Trailhawk, Rock mode delivers low-speed 4x4 capability, thanks to its rear-differential locking element. This allows Jeep, Renegade® to command the world’s most challenging terrain.
