More of what moves you.

European models shown throughout.
The smart fortwo has grown in every respect – not just in width. Thanks to its trendsetting design, clever solutions, innovative assistance systems, unparalleled turning circle and an amazing amount of free space, the smart fortwo has so much more of what you’re looking for. In short: alongside the old strengths, there are now a whole host of new ones. And that makes driving even more enjoyable.
Extremely short overhangs: the wheels are positioned on the outer ends of the vehicle – a highly unusual design feature in this form. And, in combination with the rear-engine concept, this is an intelligent, good-looking way to create a greater feeling of spaciousness.

Typically smart and unmistakable: the smart fortwo combines characteristic design features, such as the two-color concept consisting of the tridion safety cell and body panels, with unusual ideas and details. The result is a vehicle that clearly stands out on the road.

To give the front a more striking look and feel, the smart fortwo features an eye-catching light design and honeycomb pattern on the front grille. As an option, add the Lighting package for LED daytime running lights.

The body panels, which are plastic and feature a two-color look, are lightweight and durable, easily withstanding minor bumps and leaving the panels virtually unscathed.

The taillights are integrated into the rear end of the tridion safety cell. As an option, the sophisticated design can be made even more elegant with taillights using LED technology.

The optional panoramic roof – made of durable polycarbonate – not only looks good, but creates an even greater feeling of spaciousness.
The mix of materials and colors in the interior underlines the unique character of the smart fortwo – and gives every vehicle its own special touch.

The drawer in the center console is a clever idea: it creates space where there was none before to stow small items securely and out of sight.

The instrument cluster with a color 3.5” TFT display has all the data and information you need during your journey.

The smart fortwo shows true greatness, with its wide-opening doors and an amazingly spacious interior. From surprising stowage space solutions to details such as the design of the air vents, every detail combines functionality with emotional appeal.

>> FOR more fun per function.
Engine and transmission: To make the extremely compact design possible, the engine and transmission are housed at the rear of the smart fortwo. With everything from an efficient 3-cylinder, 89-hp turbocharged engine and 100 lb-ft of torque to a new manual 5-speed transmission, it offers plenty of driving fun.

For extra comfort, you can also opt for the twinamic automatic 6-speed dual-clutch transmission that shifts gears effortlessly. Even if you change gears automatically or use the optional shift paddles as part of the Sport package, gear shifts take just a few hundredths of a second.

Driving fun

>> FOR more punch per inch.

With unique features such as a rear-mounted engine and rear-wheel drive, the smart fortwo features an even sportier style.
Driving fun

With the shift paddles on the multifunction sport steering wheel, you have smooth gear changing available at your fingertips. This works in both manual and automatic modes.

The twinamic 6-speed dual-clutch transmission consists of two clutches—one to operate the uneven gears, and another to operate the even and reverse gears. Though both are active while the car is in motion, only one gear is engaged at any one time. When a gear is engaged, the next higher or next lower gear is in “standby” mode. Gear shifting is then performed by switching to the other clutch, which controls the next gear. This happens at lightning speed and without any loss of tractive power. It’s a more efficient way to shift gears, whether you’re in manual or automatic mode.

The various shifting options offered by twinamic let you decide how you wish to move. From efficient and comfortable to dynamic and sporty, you choose your preferred driving style.

In automatic mode, you can choose between the “Eco” or “Standard” gearshift. In both modes, gear shifting takes place automatically and without any loss of tractive power.

The “Eco” automatic gearshift shifts to the next gear at lower revs, for comfortable and fuel-efficient mobility.

In the “Standard” automatic gearshift, gear shifting is performed at higher revs. This is for when you want a sportier driving style and more dynamic acceleration.

In manual mode, you change gears with the shift lever and determine the shift points yourself.

*Available only with Sport package or Edition #1 package.
The tiniest turning circle: with a length of 8.8 feet and a Direct-Steer system with variable ratios, the smart fortwo has a turning circle of 22.8 feet that is nearly unrivaled. So when there's a free parking space on the other side of the road, a simple u-turn is all it takes. And thanks to the high seating position and greater visibility, you're likely to see plenty of free parking spaces.

*Measured from curb to curb.
The split tailgate facilitates loading and unloading. Simply open the top section to stow smaller items inside the car. To load larger items conveniently, simply fold down the lower section.

The passenger seat backrest can be folded forward by 90 degrees to expand your options: Items up to five feet in length fit easily in the smart fortwo.

With cargo volume of up to 9.2 cubic feet, the luggage compartment of the smart fortwo is surprisingly spacious. So what you take along with you is determined less by the available space and more by you yourself.

FOR more space per life.
The innovative infotainment solutions from smart open up a whole range of possibilities. The free smart cross connect app connects your mobile phone with the smart Audio-System, turning it into a multimedia control center. And with eight high-performance loudspeakers, including removable subwoofers, the optional JBL sound system always delivers a full sound.

Available as an option.

The universal smartphone cradle allows you to connect your mobile phone to your smart fortwo. Conveniently positioned and easy to operate, it’s directly integrated into the Audio-System, turning your smartphone into a central control for music, infotainment, and navigation.

The free smart cross connect app is the interface between your smartphone and your smart fortwo. It enables you to access your vehicle data on the road and opens up a range of possibilities – such as analyzing your driving dynamics. It also offers other useful functions outside your vehicle, like showing you the distance you’ve traveled and your fuel consumption. And not only does the app remember where you’ve parked – it also knows how long you’ve been there.

The JBL sound system includes a 6-channel DSP amplifier with a total power output of 240 watts – turning your smart fortwo into a small concert hall. Eight high-performance loudspeakers surround you with crystal-clear sound from all directions. The subwoofer in the luggage compartment, which is simple to remove without tools if required, delivers powerful bass that will send your pulse racing.
Proximity Warning Function
The optional forward collision warning function can help prevent rear-end collisions. If the distance between your vehicle and a moving or stationary object becomes too short, a visual warning in the instrument cluster alerts you so you can react quickly. And if there’s an additional risk of a collision, an acoustic warning will go off as well.

Crosswind Assist
Sudden gusts of wind can lead to tricky situations, especially if you are driving fast. Crosswind Assist, a standard feature, can detect deviations from straight-line stability and specifically brake individual wheels so that you do not have to countersteer as strongly.

Airbags
In addition to airbags for the driver and passenger, the smart fortwo also comes with knee bags, and head and thorax bags found in the driver- and passenger-seat backrests.

The tridion safety cell
The core element of the innovative smart safety system is specifically designed to provide unsurpassed protection. Made of 75% high-strength steel, the tridion safety cell helps protect occupants from harm. Plus, other components, like crash boxes and deformation elements, can ensure maximum safety in a minimum amount of space.

>> FOR more safety per feature.

The smart fortwo has a whole host of innovative assistance systems to prevent accidents from happening. And should something happen, the innovative tridion safety cell and eight airbags offer maximum protection.
Even the standard equipment in the smart fortwo is extraordinary. There are innovative safety functions like Crosswind Assist, ESP®, ABS, eight airbags, and cruise control, plus convenient features such as the Direct-Steer system, Hill-Start Assist, and an instrument cluster with a trip computer. Add to that intelligent stowage solutions like the passenger seat with a through-loading function, and you have a vehicle that is as advanced as it is unique.

>> FOR more pure convenience.

Exterior
- Body panels in black or white
- Tridion, grille and mirror caps in black
- Solid roof in black
- 15" steel wheels with hubcaps
- H4 halogen headlights with integrated LED daytime running lights

Interior
- Dashboard and door center panels in black grained finish

Equipment packages & options

Optional package available only with the Passion.

Edition #1 package.

Is sporty elegance your style?
Then the Edition #1 package is right up your street.

> Body panels and grille in white
> Tridion and mirror caps in orange
> Upholstery in black/orange fabric
> Sport package
> Lighting package
> Light and rain sensor
> Fog lights
> Panoramic roof
> Edition #1 floor mats

Sport package.

Not just for a sporty look outside your gym – this package will turn heads and make a dynamic impression.

> 16" 8-Y-spoke light-alloy wheels (R95)
> Sport suspension that lowers the vehicle by 10 mm
> Chrome exhaust tip
> Brushed stainless steel sport pedals with rubber studs

Lighting package.

See and be seen: The headlights’ welcome function will guide you as soon as you unlock your smart. The LED daytime running lights and taillights shine on throughout the day. And should it rain or get dark, the ever-vigilant rain and light sensor is on board.

> H4 halogen headlights with integrated LED daytime running lights
> LED taillights

Edition #1 package.

Is sporty elegance your style?
Then the Edition #1 package is right up your street.
Alloy wheels for boundless individuality: the design and coloring add visual highlights, from sporty to elegant.

1. 15" 8-spoke light-alloy wheels (R86) painted in black with a high-sheen finish, with front tires: 165/65 R15; rear tires: 185/60 R15

2. 15" twin 5-spoke light-alloy wheels (R87) painted in black with a high-sheen finish, with front tires: 165/65 R15; rear tires: 185/60 R15

3. 16" twin 5-spoke light-alloy wheels (R91) painted in black with a high-sheen finish, with front tires: 185/50 R16; rear tires: 205/45 R16

4. 16" 8-Y-spoke alloy wheels (R95) painted in black, with front tires: 185/50 R16; rear tires: 205/45 R16

>> FOR more personal charisma.
The two-color concept typical of smart has always been an eye-catcher. And with the new colors for the body panels, tridion safety cell and radiator trim, it’s now even more striking – giving you an even more individual look. You can also customize your smart fortwo with the exclusive range of available alloy wheels.

>> FOR more color on the roads.
With a smart, you always stay flexible – even when it comes to financing. Our leasing, financing and insurance products are designed to get you behind the wheel of your smart in no time at all, at attractive terms that can be tailored to your needs. Your smart dealer will be happy to advise you.

**Leasing**
When you lease a smart, you only pay for the use of the vehicle in low monthly installments. We will be pleased to inform you about our products that give you not only financial flexibility, but also full peace of mind with a wide range of insurance coverage.

**Financing**
Would you like to finance your smart with payments tailored to your needs? No problem. Talk to your smart dealer about the options that smart is able to offer you in cooperation with Mercedes-Benz Financial Services. These options continue right up until the moment you choose to keep your smart or exchange it for a new one.
Standard equipment.

**Exterior**
- Body panels in black or white
- Tridion, grille and mirror caps in black
- 15" steel wheels with hubcaps with front tires: 165/65 R15; rear tires: 185/60 R15
