

MR2 Spyder shown in Absolutely Red with available Black-leather trim

#### 05 MODEL GRADES

Here's a roll of tickets to one of the best rides going. The 2005 MR2 Spyder has a mid-mounted engine for exceptional balance and an outstanding *power-to-weight ratio* for cornering and acceleration that rivals the roller coaster. Available limited-slip differential and sequential manual transmission let you wring the most fun out of every curve. So fire it up, and keep your arms and legs inside the vehicle.

#### 05 INTERIORS

**Your sitting heart rate just went up.** When you're at the wheel of the MR2 Spyder, explosive reactions aren't confined to the engine. An available 6-speed sequential manual transmission is one reason you're feeling so energized. This race-derived feature provides all the thrills of a manual transmission without the inconvenience of a clutch pedal. And then there's the MR2 Spyder's perfectly balanced mid-engine layout: no back seat, no back-seat drivers. And the drilled aluminum sport pedals. The available Black-leather-trimmed seats. The black-on-white gauges... there are other ways to elevate your heart rate. But none that are this exhilarating.

1. The Toyota driver and front passenger airbags are Supplemental Restraint Systems (SRS). The driver and front passenger airbags are designed to deploy in severe (usually frontal) collisions where the magnitude and duration of the forward deceleration of the vehicle exceed the design threshold level. In all other accidents, the airbags will not inflate. To decrease the risk of injury from a deploying airbag, always wear seatbelts and sit upright in the middle of the seat as far back as possible from the airbag modules. Do not put objects in front of an airbag. Do not use rearward-facing child seats in any front passenger seat without switching off the passenger-side airbag. The force of a deploying SRS airbag may cause serious injury or death. Please see your *Owner's Manual* for further instructions.
