The Forward Control Land-Rover is the most recent addition to the multifarious Land-Rover family. Based on the Long, 109 inch wheelbase, chassis it is able to cope easily with a 30-cwt. payload on roads and country tracks and with a 25-cwt. payload across the roughest terrain. It has been designed to combine the accepted Land-Rover four-wheel drive mobility and robustness with a load capacity up to twice that of the Long Land-Rover. Because it has larger tyres (9'00 × 16 in.), a greater ground clearance (10 in.), and a better weight distribution between the axles, the cross-country performance of the Forward Control is exceptionally good. It has the same speed range as the Long Land-Rover, can climb a gradient of 1 in 2 when fully laden and has a side tipping angle of over 40 degrees.

Heater and passenger-side windscreen wiper extra.
With truck cab, fixed-side body and 3/4-length hood.

With truck cab and flat platform body.

Although the Forward Control Land-Rover is completely unlike any other Land-Rover in appearance it retains 75% of the standard Land-Rover parts. This is of particular significance to fleet users as those parts which are most often serviced are identical with those fitted to other Land-Rovers. A wide range of optional equipment is available for the Forward Control Land-Rover. For instance, provision has been made for mounting the Land-Rover hydraulic winch between the chassis members under the centre of the body. Because the vehicle has been designed specifically to fill the requirement for a vehicle able to carry heavy loads across the most rugged country there are no rear power take-off facilities. It will, however, be possible to drive body-mounted equipment from a centre power take-off.
ENGINE—FOUR CYLINDER. Overhead inlet and exhaust valves. Bore 90.49 mm. (3.562 in.), stroke 88.9 mm. (3.5 in.), capacity 2,286 c.c. (139.5 cu. in.). Maximum b.h.p. 77 at 4,250 r.p.m. Maximum torque 124 lb. ft. (17 mKg.) at 2,500 r.p.m.

Cylinder Head. Detachable, cast iron and carrying all valve gear.

Crankshaft. Forged steel, three bearing. Fully balanced and with counterweights.

Pistons. Low expansion aluminium alloy, tin-plated. Two compression rings and one scraper ring. Fully floating guide pins.

Carburettor. Downdraught. Solex 40 P.A.I.O.—SA.

Cooling System. Capacity 11 pints (5.6 litres).

Lubrication. Capacity 6 pints (3 litres).

Maximum Draw Bar Pull. 3,920 lb. (1,778 kg.).

ENGINE—SIX CYLINDER. (Available for Overseas Markets only). Overhead inlet and inclined side exhaust valves. Bore 77.8 mm. (3.063 in.), stroke 92.075 mm. (3.625 in.), capacity 2,625 c.c. (160.3 cu. in.). Maximum b.h.p. 90 at 4,500 r.p.m. Maximum torque 132 lb. ft. (18 mKg.) at 1,500 r.p.m.

Cylinder Head. Detachable, aluminium alloy (inclined at 22°).

Crankshaft. Forged steel, seven bearing. Fully balanced and fitted with vibration damper at front.

Carburettor. S.U. HD.6 horizontal.

Cooling System. Capacity 22½ pints (12.8 litres).

Lubrication. Capacity 10 pints (5.75 litres).

Maximum Draw Bar Pull. 3,750 lbs. (1,701 kg.).

FEATURES COMMON TO BOTH MODELS—PETROL ENGINE. Compression ratio 7 to 1.

Cylinders. Monobloc, cast integral with crankcase.

Main and Connecting Rod Bearings. Copper/lead lined, steel shell, lead/tin plated.

Camshaft. Forged steel. Drive by Duplex roller chain. Chain tension maintained by self-adjusting jockey sprocket controlled by coil compression spring and oil pressure.

Connecting Rods. Forged steel.

Ignition. Coil and battery, automatic advance. Battery 12 volt 37 amp. hr.

Fuel Supply. 16 gallon (73 litres) tank located at rear of chassis. Additional fuel tank available.

Air Cleaner and Silencer. Oil-Bath type with built-in centrifugal pre-cleaner.

Lubrication. By pressure from gear-type pump forcing oil to all bearings, timing chain and valve gear. Full-flow oil filter.

CLUTCH. DS type. Single dry plate 9½ in. (241 mm.) diameter.

TRANSMISSION. Transmission to rear and front axles by open propeller shaft via two-speed transfer box.

GEARS. Four forward speeds and reverse. Two-speed transfer box in conjunction with main gearbox gives eight forward speeds and two reverse.

Ratios : Main Gearbox | Transfer box | High Ratio | Low Ratio
--- | --- | --- | ---
First gear ... | ... | 25.9 | 49.4
Second gear ... | ... | 15.96 | 30.9
Third gear ... | ... | 10.86 | 20.7
Top gear ... | ... | 7.19 | 13.72
Reverse gear ... | ... | 21.7 | 41.4

REAR AXLE. Fully floating, spiral bevel type. Ratio 4.7 to 1.

FRONT AXLE. Fitted with differential similar to rear axle. Drive to front wheels through totally enclosed universal joints.

BRAKES. Hydraulically operated servo assisted foot brakes requiring light pedal pressure and infrequent adjustment. Front brakes have two leading shoes. Mechanically actuated handbrake operates on transmission shaft to rear axle.

STEERING. Worm and nut with recirculating ball ; variable ratio 19.6 to 1 straight ahead, 29.9 to 1 full lock. Right or left-hand steering as required.

CHASSIS. Side and cross members of box section forming exceptionally rigid assembly.

BODY FRAME. Full length, channel section.

SPRINGS. Semi-elliptic front and rear. Telescopic type shock absorbers front and rear.

WHEELS. Detachable disc wheels, 9½ × 16 tyres.

CENTRE POWER TAKE OFF. (At extra cost). Arranged to drive (by V-belts) portable equipment mounted in the body.

BODY. Body panels of non-corroding light alloy, all external steel fittings heavily galvanised. All bodywork finished in Land-Rover Mid-Grey.
